- General business systems integration
- Internetworking integration
- Project Management
- Systems design, development and analysis
- Network administration and infrastructure management

What employers have to say...

“Co-operative Education students... have provided us with their own unique skills and fresh and innovative ideas which have benefited our company and clients alike. Through hiring co-op students, employers are able to train and mould the students to the company’s objectives which will only act as an advantage for any company big or small.”

Office Manager

SPE

“Telstra Super actively supports the co-op program, by employing students in the role of Helpdesk Support. We welcome their enthusiasm and a strong will to learn and improve their skill sets. We will continue to support this program on an ongoing basis. If you are a potential graduate employer interested in supporting the VU Co-op program, don’t hesitate - employ a student now.”

Network Services Manager

TELSTRA SUPER PTY LTD

“With the IT downturn since 2001 it’s really hard for students to get jobs, particularly as graduates. What we are finding is that students... who have finished the co-op year have been regularly offered positions”.

Senior Lecturer

VICTORIA UNIVERSITY

Student testimonials...

“My time here... has assisted me in developing my analytical and problem solving skills. My position has helped in not only my technical skills but also my communication and organisational skills. This has been a wonderful opportunity... and I would recommend co-operative education to all students.”

Francesca

SPE

“Co-op has enabled me to get involved with IT, be part of a team, as well as participate in network upgrades, user support, training users and being trained myself! My technical skills have improved 100%. Co-op has given me great industry experience - something I would never be able to learn in a university class!”

Natalie

BOYD GROUP

“I’ve thoroughly enjoyed my time at Australia Post. It has provided the opportunity to work on a diverse range of projects and enabled me to gain practical experience that will provide a competitive advantage when seeking employment as a graduate.”

Duncan

AUSTRALIA POST
