

## BOOKINGS

To make a booking please contact the clinic directly on 9919 7897. The clinic is only attended when the students are signed on for clinic sessions so please leave a message on the answering machine and a student will contact you during clinic hours.

As this is a teaching clinic, all students require the same opportunities to develop experience in this field and because of this, we are unable to guarantee client requests for particular students.

## CANCELLATIONS

Please give 24 hours notice when cancelling appointments to give students the opportunity to offer your appointment time to others.

# DERMAL THERAPY TEACHING CLINIC

At the Dermal Therapy Teaching Clinic students studying a Bachelor of Health Science (Dermal Therapies) provide a variety of treatment modalities that would be found in supporting roles in dermatology, plastic and cosmetic surgery practices.

Based in the heart of Melbourne's CBD our clinic offers a unique and valuable service to members of the public, while providing students with practical opportunities to experience working in a clinic environment. As a tertiary education institution, we provide the highest quality equipment and products for students to work with and treatments are performed under the supervision of qualified and experienced Dermal Clinicians.

Students are educated to treat a variety of conditions such as

- Pre/post operative skin care
- Acne
- Rosacea and dilated capillaries on face and body
- Inflammatory and conditions and disorders
- Uneven skin colour and pigmentation
- Ageing skin and sun damage
- Scarring
- Fluid retention and swelling
- Excess or unwanted hair
- Unwanted tattoos
- Skin tags
- Leg veins

## PRICE LIST

### INITIAL VISIT CONSULTATION **NO CHARGE**

On your first visit you will have an extensive consultation where your expectations and concerns will be discussed and a complete and accurate history will be taken so that students can recommend an appropriate treatment plan. You will need to allow 40-60mins for your first visit and consultation.

### DIATHERMY **FROM \$20**

Used for the treatment of skin tags and dilated facial capillaries.

### MICRODERMABRASION FACE AND BODY **FROM \$45**

Used to refine thickened and proliferative skin conditions but may also encourage collagen synthesis, giving a healthier and firmer looking skin. A minimum of 4-6 treatments is required for best results.

### CHEMICAL PEELS **\$45-\$135**

A range of peels are available and will be determined by the student clinician in consultation with you. These include a range of strengths, ingredients and benefits, which the student clinician will recommend based your skin condition, goals, available downtime and lifestyle.

Many peels require the skin to be prepped with prescribed topical skin care and necessitate sun avoidance, as well as conscientious sunscreen use. Chemical peels are used to conditions such as ageing, pigmentation disorders, acne and scarring.

### ULTRASOUND AND ELECTROPORATION **FROM \$30**

Used primarily for infusion of active agents and for wound healing. Time and number of sessions will vary depending on conditions being treated.

### MANUAL LYMPHATIC DRAINAGE (MLD) **POA**

MLD aims to improve lymph circulation, increasing fluid uptake and systemic immunity, all essential to support the healthy functioning of the skin and other body systems. Beneficial pre and post surgery, as well in the treatment of lymphoedema.

### LOW LEVEL LASER THERAPY **FROM \$20**

This therapy uses various wavelengths of light to encourage the cells in the skin to function optimally. It can be used post operatively to improve wound healing and reduce scarring. Conditions such as eczema, psoriasis, rosacea, acne, and slow healing conditions also benefit. A course is needed and up to 3 treatments may be required per week.

### LIGHT EMITTING DIODE (LED) LIGHT THERAPY **\$50**

Two different wavelengths of light can be used with this treatment to either increase collagen production and improve circulation, or to control bacteria in the treatment of acne. A course is needed and up to 3 treatments may be required per week.

### PERMANENT HAIR REMOVAL (ELETRO-EPIILATION) **FROM \$5**

All methods of permanent epilation are available, offering lasting options for all hair and skin colours. Clients seeking permanent results for unwanted fine or de-pigmented hair (grey/blonde) may be suitable for this modality. A consultation and test patch is required, and a series of treatments may be recommended.

### HIGH LEVEL LASER, LIGHT AND IPL TREATMENTS

Students are taught to perform a wide range of laser and IPL based treatments to treat various conditions ranging from hair reduction to tattoo removal.

Consultation: NO CHARGE

Patch test: \$5.00

Skin tightening with Titan: \$50 +\$2.00 per shot

Diode laser hair reduction: from \$75

IPL rejuvenation: \$50 + 50c per shot, \$600 cap

nd:YAG hair reduction: \$50 + 50c per shot, \$600 cap
