

How to embed Kanopy and other video into Blackboard (WebCT)

Choosing a Video from the Library website

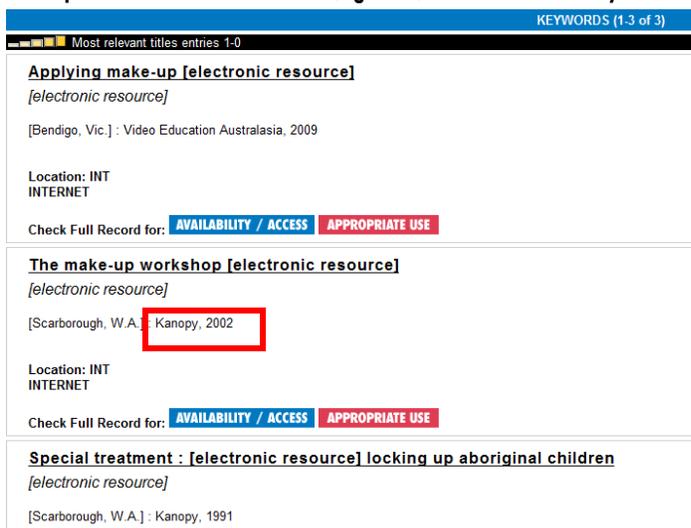

1. Go to the VU Library Homepage: <http://library.vu.edu.au>
2. From the library homepage, select 'Online video search'

3. Search for the video: enter the title of the video or a key search term and press Search.

4. A list of relevant videos will appear, note that any Kanopy video will be listed with "Kanopy" under the title. Some Kanopy video titles will not appear when searching "Online video search" try searching for the title directly in [Kanopy VU Portal](#). Other videos available from other providers will also be listed (eg: VEA). Choose the video you wish to use and click on the 'Availability / Access' link.

5. Click on the 'Video online' link. A page with the video will open.

Title The make-up workshop [electronic resource]
 Publisher [Scarborough, W.A.] : Kanopy, 2002

Appropriate Use - - Click on the following to connect to:
[Video Online \(Windows Media\)](#)

Linking the video within Blackboard (WebCT)

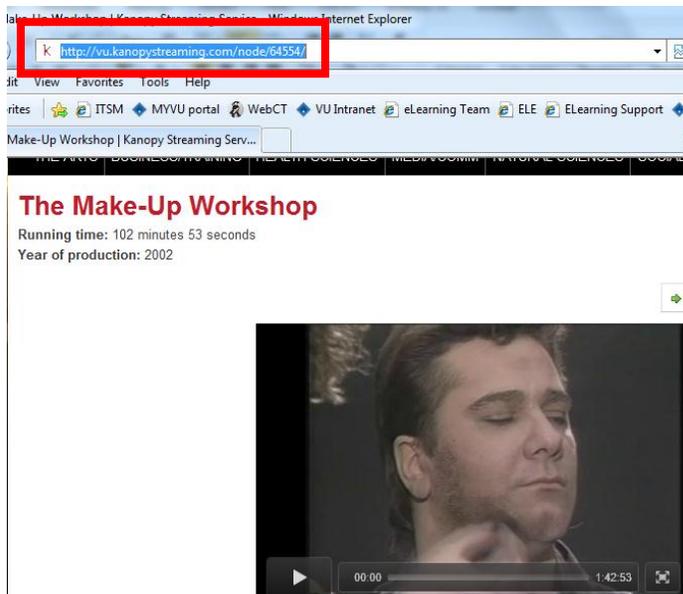

There are two ways you can potentially include video in Blackboard (WebCT):

- Linking to the video (for all videos)
- Embedding the video (available only for Kanopy)

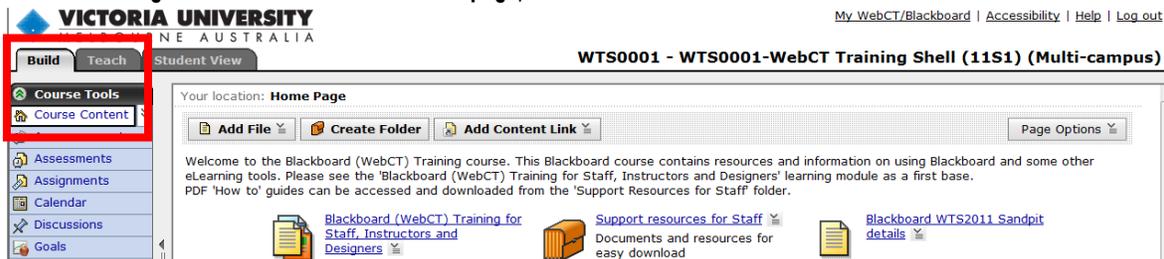

For Kanopy videos, you will have both options available. For other videos (eg: VEA), only the link option will be available.

Linking to your video

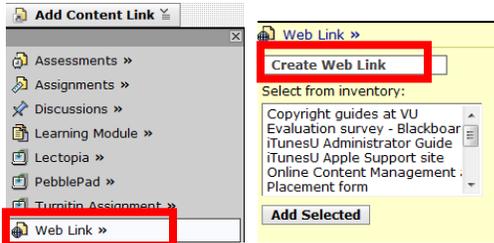

1. Ensure the video you wish to link to is open in your browser, as per the previous steps.
2. Go to the address bar at the top of the browser and copy the whole URL.

3. Log into Blackboard (WebCT) and navigate to the unit you wish to add the link to.
4. Ensure you are in the 'Build' tab (only those with Build rights can add content), and navigate to the area in your unit you want to add the link (eg: on the 'Course Content' home page, or a folder under course content)

5. Click the 'Add Content Link' button and choose 'Web Link', then 'Create Web Link'

6. In the 'Create Web Link' window, give the link a Title (required), and, if you like, a description (optional).
7. In the 'Web Address (URL)' field, paste the url you copied earlier from the other webpage containing your video. It is recommended ticking the 'Open in a new browser option'.

Create Web Link

*Title:

Description:

Item Visibility: Show Item
 Hide Item

Web Address (URL)

*

Open in a new browser window

8. Click 'Save' when done. A link to your video should now be available within Blackboard (WebCT).

Note: When viewing or previewing your video, or for students viewing the video, it is best to view under 'Student View'.

Note: If you receive an alert box in your browser asking if you wish to display secure and unsecure content/items, it is important to ensure that both secure and unsecure items are allowed. This ensures the page is not blocked from being displayed and is displayed correctly.

In the *left example* (Windows 7), choose "No" to allow all items to display correctly.

In the *right example* (Windows XP), choose 'Yes' to allow all items to display correctly.

Please refer to the examples above for the option that best suits your alert and choose the appropriate selection.

Choosing the incorrect setting will most likely result in a blank page. If you find the option you choose results in a blank page being displayed, you may need to clear your browser history/cache. Contact ITS Service Desk on 03 9919 2777 for support in clearing your browser cache.

Embedding video (available for Kanopy only)

1. Ensure the video you wish to link to is open in your browser, as per the previous steps.
2. Click on the 'Embed in LMS' button

The Make-Up Workshop

Running time: 102 minutes 53 seconds
Year of production: 2002

3. Embed code for the item will appear on the screen. Choose the size of the video you want appearing/embedded into Blackboard (WebCT), then copy the embed code listed in the text area.

Embed this video in Moodle/BlackBoard/LMS

Copy/Paste this code to embed the video into Moodle, Blackboard or any other LMS.

```
<iframe width="480" height="390" src="http://wallaby.vu.edu.au:2048/login?url=http://vu.kanopystreaming.com/embed/64564" frameborder="0" allowfullscreen></iframe>
```

Options

If you wish to embed a larger sized player, select your frame size below before copying and pasting the embed code above. (The code changes based on your selection).

Small

425x349

Medium

480x390

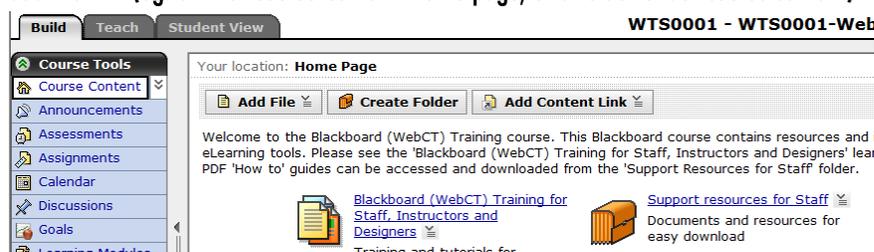

Large

640x510

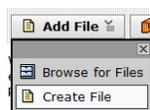

Jumbo

960x750

4. Log into Blackboard (WebCT) and navigate to the unit you wish to add the link to.
5. Ensure you are in the 'Build' tab (only those with Build rights can add content), and navigate to the area in your unit you want to add the link (eg: on the 'Course Content' home page, or a folder under course content)

6. Select 'Add file', then 'Create file'

7. Add a title to your file
8. Paste the embed code in the 'Content' box and tick the 'Use HTML' checkbox (see below)

Create File

*Title: Embedded Make-up video

*Content:

```
<iframe width="480" height="390"
src="http://wallaby.vu.edu.au:2048/login?
url=http://vu.kanopystreaming.com/embed/64554"
frameborder="0" allowfullscreen></iframe>
```

Use HTML

File name: If no file name is entered, the title will be used as the file name.

Item Visibility: Show Item Hide Item

Your file will be saved in the root directory of File Manager.

Goals
Associate goals with this page.

9. Click 'Save'. The file should now be saved to your course area in Blackboard (WebCT).

10. To preview/view the video, it is recommended that you navigate to the 'Student View' tab to click on the link. The video will be embedded into a page within WebCT (see below).
