

City Campus transcript

Best location ever, it's right in the middle of the city, we've got everything around us. Plenty of variety when it comes to food and shopping and everything else, so yeah it's good it you've got a nice long lunch break!

I just love the view, it's just awesome, I just love it!

It's really good that it's near a train line, from the street - you can't get more central than that. We've got two stations so five minutes walk to either one. We're really close to Flagstaff station, less than a block away and we're also close to Melbourne Central as well.

I love the atmosphere of the campuses, the students I've studied with have all been fantastic.

The teachers are good because they have industry length and experiences.

They're there to help, they're there to teach, you're there to learn and they're just great, they're really good.

Very encouraging, they've got plenty of time for you and make sure you get through

There's a lot more support here than at other universities, the lecturers actually have time to sit down and have a chat with you.

The osteopathy course is actually a very hands on course, you've got 5 years of experience when you step out of that door.

We're really lucky because it is a law campus and it's really tailored to us, so we've got the Moot court - And I appear on behalf of the prosecution.

There's pretty state-of-the-art type of studios, they've all been really well set up.

The best thing about the course is working in the design studio, where we get to work on projects for real life clients.

We get to experience the treatments as well as perform the treatments, which is excellent, it's a luxurious course to study!

I've made heaps of friends at uni.

They're a fantastic bunch, I think there's more than a couple that I will probably be lifelong friends with.

Everyone's really nice and welcoming, everyone's really warm and friendly, so I think it's really awesome here quite honestly.

At the moment I'm studying 2 days a week. That's one of the beauties of this place is the flexibility and the time.

You can do different amounts of units per semester.

There's a lot of mature age students like me, so we have this kind of love of wanting to be here because it's something we've wanted to do all our lives and finally get here.

We're new, we're young - the extra resources and the extra support are all there. It gets us ready for the real world, it gives us a good feel about what's really out there.

I think it's the best course for you, if you do want to work hard and you want to commit yourself and if you enjoy the course then you'll go far.
