The Australian Health Policy Collaboration at Victoria University works with and supports a collaborative network of organisations and leading chronic disease experts, bringing together Australia’s leading thinkers to translate rigorous research into good policy. The second collaboration has developed health targets and indicators for 2025 that, together, will reduce preventable chronic diseases and reduce the health impacts of chronic conditions.

Australia’s Health Tracker and Getting Australia’s Health on Track are the policy-focused reports compiled by the national collaboration.

Australia’s Mental and Physical Health Tracker is the latest report card as part of the Australia’s Health Tracker series. Australia’s Mental and Physical Health Tracker brings attention to the issue of higher risk factors and incidence of preventable chronic disease amongst Australians with mental health conditions.

More than 50 organisations continue to support a systemic and sustained approach to the prevention and management of chronic diseases in Australia.

Collaborating Organisations

Alliance for Research in Exercise, Nutrition and Activity (ARENA)
Australia and New Zealand Obesity Society
Australian Centre for Health Research
Australian Dental Association
Australian Disease Management Association
Australian Federation of AIDS Organisations
Australian Health Care Reform Alliance
Australian Health Promotion Association
Australian Healthcare and Hospitals Association
Australian Indigenous Health Alliance
Australian Institute for Musculoskeletal Science
Australian Psychological Society
Australian Women’s Health Network
Baker IDI Heart and Diabetes Institute
Better Health Plan for the West
Brimbank City Council
Calvary Institute
Cancer Council Australia
Catholic Health Australia
Charles Perkins Centre, University of Sydney
Chinese Women’s Centre
Cochrane Collaboration
Collaboration of Australian Sport
CSIRO
Dietitians
Diabetes Australia
Foundation for Alcohol Research and Education
George Institute for Global Health
Health Western Australia
Inferior West Primary Care Partnership
JAN Health for Women’s Health
Kathy Hailes
Kinder Foundation
Mental Health Australia
Musculoskeletal Alliance
National Heart Foundation
National Rural Health Alliance
National Stroke Foundation
NCD FREE
Network of Alcohol and other Drug Agencies
Networking Health Victoria
Obesity Australia
Overcoming Multiple Sclerosis
People’s Health Movement OZ
Public Health Association of Australia
Royal Flying Doctor Service
School of Medicine, University of Notre Dame
School of Psychology and Public Health, La Trobe University
Services for Australian Rural and Remote Allied Health
Social Determinants of Health Alliance
South Australian Health and Medical Research Institute
Suicide Prevention Australia
Tasmanian Public Health Institute
Victoria University
Victorian Health Promotion Foundation
YMCA

Australia needs a healthier future for all. We can, and we must, do better.
Mental health is a significant and growing issue in Australia, affecting individuals, families and the economy. Too often, the burden of mental illness affects physical health, and poor mental health affects access to care for other health conditions.

There are more than four million Australians living with mental health conditions, including anxiety, depression and more rarely, psychotic disorders.

People with mental health conditions are much more likely to smoke, engage in risky drinking, and do less physical activity than other Australians. While one in two Australians live with a chronic condition, three in four people with mental health conditions live with a second, third or fourth chronic disease.

We have known for a long time that people with mental health conditions are more likely to have physical health issues, and less likely to have those issues addressed. We need to ensure that people being treated for mental health conditions have their physical health regularly assessed.

People with chronic health conditions such as heart conditions, arthritis, back pain, diabetes, asthma and cancer should also be assessed regularly for mental health issues to target prevention and early intervention.

The combined effects of poor physical health and mental health conditions affect welfare and education, health services and costs, productivity, employment, and social participation.

Improving the physical health of people living with mental health conditions, and conversely, the mental health of people living with physical health conditions, must become priority to improve the health of all Australians.

This report card looks at the health of adult Australians by mental health status in relation to other health risk factors and co-morbid chronic diseases. Australia’s Health Trackers will be updated regularly and will track progress towards a healthier Australia by 2025.

AUSTRALIA’S MENTAL AND PHYSICAL HEALTH TRACKER 2018

This report card looks at the health of adult Australians by mental health status in relation to other health risk factors and co-morbid chronic diseases. Australia’s Health Trackers will be updated regularly and will track progress towards a healthier Australia by 2025.
