"It really prepared me for work in the health and nutrition industry. During my final semester, I travelled to India on a study tour and was fully immersed in Indian food culture. We focused on maternal and early childhood health, and collected data regarding the nutritional status of Indian tribe sub-populations and their food intake. The entire experience has given me an advantage in liaising with health professionals, as well an understanding of the diverse needs and goals of a different country and culture. It was an opportunity that I learnt so much from."

THE NEW WAY TO DO UNI

AT VU WE KNOW THERE’S MORE THAN ONE WAY TO SUCCEED AT LEARNING, SO WE PROVIDE MULTIPLE WAYS TO ACHIEVE A WORLD-CLASS EDUCATION AND EXCITING CAREER.

WHY IS VU’S BLOCK MODEL BETTER FOR ME?

1. YOU’LL FOCUS ON ONE SUBJECT AT A TIME
   Complete one subject every four weeks before moving on to the next. At other universities, you need to complete multiple subjects at once, while at VU you’ll be fully focused on each subject.

2. YOU’LL BUILD YOUR CONFIDENCE
   The progression of subjects in the Block Model will give you early feedback and success, and build confidence in your studies from day one.

3. YOU’LL FEEL SUPPORTED
   Smaller classes mean you have more one-on-one time with your teachers and classmates. And with a timetable that can allow flexibility outside of uni, you can work, and spend time with family, friends and pursue other interests.

GET FUTURE FOCUSED WITH BLENDED LEARNING

Study at Victoria University Polytechnic, VU’s TAFE division, and you’ll learn with our multi-award winning Blended Learning model. Blended Learning is flexible, industry-based and focused on preparing you for the modern workplace. It replaces paper-based theory tuition with a combination of user-friendly online learning and face-to-face workshops. Online components mean you can learn anytime, anywhere – and then you’ll refine your skills through practical learning and on-the-job work placements.

VU BLOCK MODEL

In 2018 VU was the first Australian university to introduce the VU Block Model. This new approach to learning is focused on making your transition into university easier, your chances of study success greater, and giving you the skills to succeed when you enter the workforce.

PATHWAYS

Course 'pathways' offer an easy transition between courses at different levels, so that you can start with a certificate and progress right through to postgraduate study – in many cases gaining credits along the way. Students starting in Higher Education degrees can also add to their portfolio of skills with practical, hands-on training through our TAFE programs.
