Preliminary program

One-day GEMPACK Course 16 June 2015

**Complementing the 18th Annual Conference on Global Economic Analysis,
17-19 June, Melbourne.**

Instructor: Dr Michael Jerie

16 June 2015
9am - 4.30pm

Victoria University City Convention Centre, Level 12
[City Flinders Campus](#)
300 Flinders Street
Melbourne
Australia

This one-day GEMPACK training course presents several practical exercises aimed at the experienced user, with a focus on topics that go beyond running simulations and analysis of results. Basic GEMPACK skills are assumed. **Participants are to bring their own laptops.** Lunch, morning and afternoon tea will be provided.

Price AU\$	
800	Standard
500	GTAP conference registrant discount
250	GTAP conference registrant discount, early career researcher*

* An early career researcher must be a currently enrolled graduate student, or have graduated within the last 5 years.

Preliminary Program.

The course will be delivered as a sequence of exercises through which participants work under the guidance of the tutors. Each exercise focuses on a particular topic aimed at extending and improving your productivity as a GEMPACK user.

Topics Include*:

- How to make mappings in ViewHAR
- ViewHAR; Generating Tablo code, comparing HAR/SL4 files, viewing SL4 files
- TABmate; autcreate CMF files, Run CMF button
- Parameters in CMF files
- RunDynam; make policy the base, running simulations from batch scripts
- Report generation and post-processing solutions SLTOHT, postsim statements, special report variables, for both comparative static and recursive dynamic models
- Condensation; tuning a model for faster runtimes
- Singular matrix problem
- Arithmetic error problems

*Topics are subject to change or addition.
