

# Bachelor of Education (P-12)

## Course code: EBED

### Course Requirements

To attain the Bachelor of Education (P-12) students will be required to complete 384 credit points consisting of:

- 240 credit points of Core studies
- 96 credit points of Major studies
- 48 credit points (either Option A or B)

**Option A:**

This option is recommended for students who choose to undertake a second Secondary teaching method.

- 48 credit points of Minor Studies

**OR**

**Option B:**

This option is suitable for students who require more flexible enrolment opportunities.

- 48 credit points of any Minors or Elective units.

#### Additional Notes

- Students are required to meet the required benchmarks for LANTITE prior to commencement of their second year placement units.
- Students are required to pass the Literacy and Numeracy Test for Initial Teacher Education (LANTITE) in order to be eligible to graduate from their Victorian Institute of Teaching-accredited program.
- Students will need to monitor the VIT website for details in relation to the tests that will be considered; a link to advice and fact sheets about the test and to the external test provider. Refer to [www.vit.vic.edu.au](http://www.vit.vic.edu.au)
- Students also complete a minimum of 80 days Professional Experience comprising well-structured, supervised and assessed teaching practice.
- This course has organised 103 days, which substantially improves the minimum.

Students are required to enrol in all units for semester 1 and 2, and are not permitted to enrol in more than 48 credit points per semester as a full-time load.

### Credit Points

A credit point is used to measure the study load for a unit. A standard unit consists of 12 credit points, with each completed unit's credit points adding up to meet your required total of credit points to complete your course.

## Prerequisites

A number of units within the degree have 'prerequisites'. These prerequisites must be met before enrolment in the unit is permitted. Generally these prerequisites require the successful completion of a unit or units taken at an earlier stage in the course. Students should pay particular attention to these prerequisite requirements as failure to meet these can seriously hinder progression through the course.

## Core

A unit that must be completed

## Major

The subject area that you will specialise in during your degree, comprising a set of units within a particular discipline. For example, a business degree has majors such as marketing and banking & finance. At Victoria University a major is made up of 96 credit points (equivalent to 8 units)

## Minor

A subject area that is the second focus of a degree, comprising a smaller set of units than a major within a particular discipline. At Victoria University a minor is made up of 48 credit points (equivalent to 4 units).

### Information and Digital Technologies (Education) - EMAINF

Information and Digital Technologies are a ubiquitous force transforming how we work, interrelate and communicate. Once a technology located within the area of work, digital media is moving into all areas of everyday life, and practitioners are required to develop new applications such as in the areas of entertainment, health and education. Concurrently, technology is now at a point where those with higher education level Information and Digital Technologies can co-opt technology to create projects.

### Mathematics (Education) - EMAMTH

Mathematics is a core discipline for understanding and explaining much of the modern world. From film making, weather forecasting, to analysis of sports scores, to banking and finance, all aspects of science, through computing – including gaming, media and communications, mathematics provides the underpinning that makes it all possible. Mathematics is also an intellectual journey that is second to none.

Mathematics can provide you with many wonderful “aha!” moments when you see the truth of something, or the connections between two seemingly different topics. It also provides superb “brain-training”, with its logical rigour, and its emphasis on problem solving. Mathematics is also supremely satisfying to teach, as you introduce your students to its riches, its applications, and its beauty. Now is a good time to study mathematics, as there is a huge shortage of well-trained teachers. With a mathematics method you will be welcome at any school!

### Science (Education) - EMASCI

The major in science will introduce you to a wide range of topics in at least two fields including biology, environmental science, chemistry, or physics and allow you to develop a deep understanding of the interrelationships between the various content elements of the sciences. The major will be a strong mix of theoretical and practical based studies of how science is discussed, the basic scientific knowledge it contains and the experimental process from where the information has been collected.

This will teach you how to analyse both data and the literature and apply critical thinking skills to defend the ideas you have developed. These studies will allow you to have a basic understanding of the fields within the sciences, allowing for future work in teaching or the broader field of science.

### Aboriginal Yulendj (Knowledge) and Community - EMIAGL

With UNESCO's acknowledgment that Indigenous groups globally are challenged from 'development', global warming and globalisation and the Australian government's adoption of the UN Declaration on the Rights of Indigenous Peoples, how might Indigeneity assert itself legally, politically, culturally, socially and technologically to secure/ensure an equitable and respected place in a multicultural globalised Australian context?

How might key Aboriginal issues underpinned by self-determination, land and country, treaty, economic development, urban and regional planning, traditional owners, cultural heritage and art, human rights, ethics and community development be considered and applied in a changing world and in Australian civics and citizenship, workplaces and community?

The Aboriginal Yulendj (Knowledge) and Community minor will be available for students enrolled in VU undergraduate programs and it will use Moondani Balluk (embrace people) units in decolonial and postmodern theories to consider a range of complex topics concerning personal and national identity in a changing global world. In this minor, students will explore, analyse and deconstruct their own disciplinary and lived perspectives as well as explore, reflect and understand the impacts and outcomes of colonisation for Aboriginal individuals, families and communities in South East Australia. Topics to be explored include history, human rights, traditional owners, sovereignty, governance and societal structures, coloniality and systems of power and community ethics.

### Mathematics (Education Minor) - EMIMTH

Mathematics is a core discipline for understanding and explaining much of the modern world. Mathematics can provide you with many wonderful “aha!” moments when you see the truth of something, or the connections between two seemingly different topics. It also provides superb “brain-training”, with its logical rigour, and its emphasis on problem solving. Mathematics is also supremely satisfying to teach, as you introduce your students to its riches, its applications, and its beauty. Now is a good time to study mathematics, as there is a huge shortage of well-trained teachers. With a mathematics method you will be welcome at any school!

### Teaching English as an Additional Language - EMIEAL

Teaching English as an Additional Language (TEAL) is a dynamic, global profession. With English being the international language of business, education, research and cross-cultural communication, qualified TEAL professionals are in great demand worldwide. You will gain important teaching skills and can be qualified to teach international students, migrant and refugees in Australia, and in many contexts overseas. You can travel, teach, learn new culture and expand your horizon.

The program provides grounding in TEAL theory and practice through discussions, projects and presentations in linguistic, educational and socio-cultural aspects of language learning, and in the methodology of teaching and learning English in second and foreign language settings. The ESL classroom is usually seen as a dynamic, empowering and creating environment where a teacher acts as a guide, a facilitator and a resource to maximise each individual's participation and contribution.
