Bachelor of Education (P-12)

To attain the Bachelor of Education (P-12) students will be required to complete 384 credit points consisting of:

- 240 credit points of Core studies
- 96 credit points of Major studies
- 48 credit points (either Option A, B or C below)

Students are required to pass the Literacy and Numeracy Test for Initial Teacher Education (LANTITE) in order to be eligible to graduate from their Victorian Institute of Teaching-accredited program.

**Option A**
*(This option is recommended for students who choose to undertake a second Secondary teaching method. This option is not available to students majoring in Humanities, Biology or Environmental Science)*

- 48 credit points of Minor Studies

**Option B**
*(This option is mandatory for students who choose to major in Humanities, Biology and Environmental Science and teach to Senior Secondary levels)*

- 24 credit points of Part units
- 24 credit points of Elective units

**Option C**
*(This option is suitable for students who require more flexible enrolment opportunities)*

- 48 credit points of any Minors or Elective units.

**Additional Notes**

- Students are required to meet the required benchmarks for LANTITE prior to commencement of their second year placement units.
- Students will need to monitor the VIT website for details in relation to the tests that will be considered; a link to advice and fact sheets about the test and to the external test provider. Refer to www.vit.vic.edu.au
- Students also complete a minimum of 80 days Professional Experience comprising well-structured, supervised and assessed teaching practice.
Note: Students are required to enrol in all units for semester 1 and 2, and are not permitted to enrol in more than 48 credit points per semester as a full-time load.

Core/Elective Core (a unit that must be completed) & Elective (you have some choice in what you select).

Prerequisites A number of units within the degree have 'prerequisites'. These prerequisites must be met before enrolment in the unit is permitted. Generally these prerequisites require the successful completion of a unit or units taken at an earlier stage in the course. Students should pay particular attention to these prerequisite requirements as failure to meet these can seriously hinder progression through the course.

Date of Publication: This information is current at the publication date: 9/08/2019. It is provided as information only and does not form part of a contract between any person and Victoria University.

EDUCATION MAJORS

Art (Education) EMAEAR

The Art major will develop individual art making and understanding of fine art history and theory. Working closely with professional artists, undertaking this major will allow you to conceive, produce and evaluate artworks incorporating methodologies of painting, drawing, installation, digital art and photography. Art theoretical content, discourse and research of significant artists will encourage rigorous critical analytical and interpretative thinking about art and develop the capacity to apply creative thinking and innovation broadly. During the major you will engage with the wider visual arts community and workplace exhibiting works, visiting exhibitions and writing reviews.
COURSE DELIVERY PLAN 2020

ACF3003 Digital Fine Art Photography Major 1B2 12 FP

Biology (Education) EMABIO
The major in biology will introduce you to a wide range of biology topics and allow you to develop a deep understanding of the interrelationships between the various facets of life. The major will be a strong mix of theoretical and practical based studies of how science is discussed, the basic scientific knowledge it contains and the experimental process from where the information has been collected. This will teach you how to analyse both data and the literature and apply critical thinking skills to defend the ideas you have developed. Topics include the investigation the molecules of life, ecology and evolution, how the world works at the cellular level, how the body defends itself from foreign invaders and how biology is used in commercial applications. These studies will allow you to have a basic understanding of the field of biological science, allowing for future work in teaching or the broader field of science.

Digital Media (Education) EMADIG
Digital media is a ubiquitous force transforming how we work, interrelate and communicate. Once a technology located within the area of work, digital media is moving into all areas of everyday life, and practitioners are required to develop
new applications such as in the areas of entertainment, health and education. Concurrently, technology is now at a point where those with higher education level digital media can co-opt technology to create projects.

English (Literary Studies) (Education) EMAENG

The major in English (Literary Studies) introduces you to a broad range of literary texts and ways of reading them. The emergence of modern literary theories and ways of understanding literary texts and “literature” itself has had an enormous influence on the way in which we think about our language and society, history and culture, politics and identity. Literary Studies will help you develop essential critical skills that strengthen your ability to contribute to a broad range of issues and debates. From Jane Austen to Christos Tsiolkas, Olde England to New Zealand, romance to realism, poetry to politics, individual units cross a broad range of authors, places and issues. Throughout the major, you will develop skills in methods of reading, analysis and interpretation that equip you for further work in journalism, teaching and the broader literature industry.

Environmental Science (Education) EMAENV

The world around us all is changing at an ever increasing pace, and Environmental Science offers the key to better understanding and managing these changes. By investigating the relationships between the physical, chemical and biological components of the natural world the human race can actively develop solutions to varied environmental problems. Studies will cover topics including management of natural resources, sustainability, the impact of pollution, climate change, deforestation and habitat destruction among other issues will affect us in the coming decades. As well as its focus on the Sciences this major incorporates ideas from a broad range of disciplines - from geography to economics and politics, in addition to the philosophies and ethics that underpin activity in these areas.

Food Technology (Education) EMAFTE

In the ever-changing and ever-challenging modern world in which we live, a multitude of issues such as food security, emotional health, sustainability, consumer excesses and a widening poverty gap are often at the forefront of public consciousness. Food technology is an area of study that will prepare you to respond to a range of real-life challenges such as the above. Through the development of life skills, you will build capacity for critical and creative decision-making and problem-solving related to fundamental needs and practical concerns of individuals, families and communities, both locally and globally. Food Technology is an interdisciplinary area of study that encompasses hospitality, food science and nutrition and community studies. The focus of this specialist area is on the well being of people in their everyday lives. Effective Technology education will aid you to become empowered, active and informed members of society.
Health (Education) EMAHEA

Being healthy is significant in all our lives. As a result, it is important for us to be aware of how to maintain good health, make informed choices to look after ourselves, and seek appropriate health advice. Studying health will help you to develop skills and knowledge to make decisions about your own health, inform others, and also to recognise the importance of health in society. The major in Health provides you with an understanding of the individual and societal influences on health and human development. You will study areas covering health, human development, family, and nutrition.

Humanities (Education) EMAHUM

Knowledge of the past has always been central to human awareness. For more than a century, the study of History has underpinned the Western liberal tradition. History is connected with the search for meaning. It conveys communal memory, creating a sense of personal and group identity by locating individuals in time and space. The study of History offers each of us the chance to understand, even bridge, other cultures. The major in Humanities offers opportunities to sample this diverse human experience. We offer studies in the modern history of Australia, Asia, Europe, the Middle East, Russia, the United States of America, and sport. Our aim is to both challenge and excite you as you move through the study of History, beyond your own lives to those of people in other times and other places. We also aim to develop an appreciation of the contributions historians make to an understanding of contemporary society.

## Mathematics (Education) EMAMTH

Mathematics is a core discipline for understanding and explaining much of the modern world. From film making, weather forecasting, to analysis of sports scores, to banking and finance, all aspects of science, through computing – including gaming, media and communications, mathematics provides the underpinning that makes it all possible. Mathematics is also an intellectual journey that is second to none. Mathematics can provide you with many wonderful “aha!” moments when you see the truth of something, or the connections between two seemingly different topics. It also provides superb “brain-training”, with its logical rigour, and its emphasis on problem solving. Mathematics is also supremely satisfying to teach, as you introduce your students to its riches, its applications, and its beauty. Now is a good time to study mathematics, as there is a huge shortage of well-trained teachers. With a mathematics method you will be welcome at any school!

MEDIA STUDIES (EDUCATION) EMAMDA

The media occupies a central place in our society and culture and makes a significant contribution to the world around us. As new media and communication technologies are introduced, and delivery costs of content decrease, we are entering an entirely new era of media production and consumption. A major in Media Studies enables you to undertake a sequence of units focusing on contemporary media forms and practices. This specialised area of study draws together a mix of units, some with an emphasis on analysis and research, and some with a large hands-on practical component, including cinema studies, digital radio and television production.

MUSIC (EDUCATION) EMAMSC

Undertaking a major study in Music offers you the exciting opportunity to specialise in your own musical interests. You will develop skills, concepts, and methodologies in music theory, composition, general musicianship, music history, arranging, orchestrating, improvising, conducting, and music performance. Developing competencies to meet the needs of a diverse range of learners, through theoretical study in combination with practical classroom experience, this study area prepare you to become creative and inspiring teachers for the next generation of young musicians.

COURSE DELIVERY PLAN 2020

Outdoor Education (Education) EMAOUT

The most fun you can have! If you want to learn about adventure with highly qualified outdoor professionals and through hands on experiences in rock climbing, white water rafting, hiking, and skiing as well as develop an in-depth understanding about the natural environments and places you will visit and why people choose to go there, then the Outdoor Education major is for you. The use of industry partnerships and critical evidence based practice to inform teaching will ensure that during the course you will learn all the skills needed to lead in the outdoors and teach VCE Outdoor and Environmental studies. The Outdoor Education major provides the opportunity for students to build highly valued character traits including leadership, integrity, cultural sensitivity, and psychological resilience.

Physical Education (Secondary) (Education) EMAPES

Physical education (Secondary) provides you with knowledge and skills in developing movement skills, physical activities and movement concepts as a foundation for lifelong physical activity participation and enhanced performance. The major offers you a challenging, enjoyable and physically active area of study. Movement and physical activity concepts are informed by a range of movement sciences including: the biophysical (anatomy, physiology, exercise physiology, biomechanics, skill acquisition, growth and motor development) and the psycho-social (history, sociology, psychology). You will also develop knowledge and skills to support participation and performance in a range of movement and physical activity contexts, including fundamental movement skills, games and sports, aquatics, rhythmic and expressive movement, athletics, and fitness.

Student Welfare (Education) EMASWE

Student Welfare is a dynamic sequence that provides you with an understanding of young people and children as they transition into adolescence. Students will be engaged in discussing issues, strategies and options for working with young people. The focus is on improving your practice as a teacher. Schools want teachers with a robust mix of skills given the diversity of children and young people in the public setting. The youth work units can be undertaken in a student welfare sequence or as stand-alone electives. These units are offered in summer and winter semesters to be more flexible for students to complete.

EDUCATION MINORS

NOTE:

- The minors for Digital Media, Food Technology, English (Literary studies), Mathematics, Media, Student Welfare and Teaching English as an Additional Language are required by the VIT for the completion of Minor sequences for teaching in secondary schools.
- The minors for Gender Studies, Indigenous Studies, Writing, Outdoor Education and Sociology provide additional options for student to choose their electives for Options B, C and D.
COURSE DELIVERY PLAN 2020

Aboriginal Yulendj (Knowledge) and Community EMIAGL

With UNESCO's acknowledgement that Indigenous groups globally are challenged from 'development', global warming and globalisation and the Australian government's adoption of the UN Declaration on the Rights of Indigenous Peoples, how might Indigeneity assert itself legally, politically, culturally, socially and technologically to secure/ensure an equitable and respected place in a multicultural globalised Australian context?

How might key Aboriginal issues underpinned by self-determination, land and country, treaty, economic development, urban and regional planning, traditional owners, cultural heritage and art, human rights, ethics and community development be considered and applied in a changing world and in Australian civics and citizenship, workplaces and community?

The Aboriginal Yulendj (Knowledge) and Community minor will be available for students enrolled in VU undergraduate programs and it will use Moondani Balluk (embrace people) units in decolonial and postmodern theories to consider a range of complex topics concerning personal and national identity in a changing global world. In this minor, students will explore, analyse and deconstruct their own disciplinary and lived perspectives as well as explore, reflect and understand the impacts and outcomes of colonisation for Aboriginal individuals, families and communities in South East Australia. Topics to be explored include history, human rights, traditional owners, sovereignty, governance and societal structures, coloniality and systems of power and community ethics.

Biology (Education Minor) EMIBIO

The minor in biology will introduce you to a range of biology topics and allow you to develop an understanding of the interrelationships between the various facets of life. A strong mix of theoretical and practical based studies of how science is discussed, the basic scientific knowledge it contains and the experimental process from where the information has been collected, will teach you how to analyse both data and the literature and apply critical thinking skills to defend the ideas you have developed. Topics include the investigation the molecules of life, ecology and evolution, how the world works at the cellular level, how the body defends itself from foreign invaders and how biology is used in commercial applications.

Chemistry NMICHE

This minor in Chemistry will introduce you to the principles and practices of modern chemistry. Building upon the fundamental principles of chemistry which are introduced in the first year units, Analytical Methods 1 and Organic Synthesis introduce students to instrumental analytical chemistry and the theoretical and practical aspects of synthetic organic chemistry. These units provide basic training in the preparation, purification and characterisation of organic compounds and their complimentary modern spectroscopic, chromatographic and spectrometric methods of analysis. For students interested in teaching chemistry, taking the four (4) units in this minor adequately prepares students to deliver units 1, 2, 3 and 4 of the VCE chemistry curriculum.

Cultural Studies (Education Minor) EMICUL

Gender is one of the major ways that human society is organised, whether considered from a social or cultural perspective. Gender Studies has developed over the last three decades into a complex and influential academic specialisation. The ideas of Gender Studies, and in particular the theories and practices of feminism, have significantly shifted the ways of knowing across many fields of academic inquiry. The Cultural Studies minor provides you with a critical education in major theories and applications about the place of gender.

## Digital Media (Education Minor) EMIDIG

Digital media is a ubiquitous force transforming how we work, interrelate and communicate. Once a technology located within the area of work, digital media is moving into all areas of everyday life, and practitioners are required to develop new applications such as in the areas of entertainment, health and education. Concurrently, technology is now at a point where those with higher education level digital media can co-opt technology to create projects.

## Environmental Science (Education Minor) EMIENV

The world around us all is changing at an ever increasing pace, and Environmental Science offers the key to better understanding and managing these changes. By investigating the relationships between the physical, chemical and biological components of the natural world the human race can actively develop solutions to varied environmental problems. Studies will cover topics including management of natural resources, sustainability, the impact of pollution, climate change, deforestation and habitat destruction among other issues will affect us in the coming decades. A minor in Environmental Science incorporates ideas from a broad range of disciplines - from the natural sciences, to geography, economics and politics, in addition to the philosophies and ethics that underpin activity in these areas.

Health (Education Minor) EMIHEA

Being healthy is significant in all our lives. As a result, it is important for us to be aware of how to maintain good health, make informed choices to look after ourselves, and seek appropriate health advice. Studying health will help you to develop skills and knowledge to make decisions about your own health, inform others, and also to recognise the importance of health in society. The minor in Health provides you with an understanding of the individual and societal influences on health and human development. You will study areas covering health, human development, family, and nutrition.

COURSE DELIVERY PLAN 2020

Literary Studies (Education Minor) EMILIT
The minor in Literary Studies introduces you to a broad range of literary texts and ways of reading them. The emergence of modern literary theories and ways of understanding literary texts and "literature" itself has had an enormous influence on the way in which we think about our language and society, history and culture, politics and identity. Literary Studies helps you to develop essential critical skills that strengthen your ability to contribute to a broad range of issues and debates. From Jane Austen to Christos Tsiolkas, Olde England to New Zealand, romance to realism, poetry to politics, individual units cross a broad range of authors, places and issues. Throughout the minor, you will develop skills in methods of reading, analysis and interpretation that equip you for further work in journalism, teaching and the broader literature industry.

Mathematics (Education Minor) EMIMTH
Mathematics is a core discipline for understanding and explaining much of the modern world. Mathematics can provide you with many wonderful “ahah!” moments when you see the truth of something, or the connections between two seemingly different topics. It also provides superb “brain-training”, with its logical rigour, and its emphasis on problem solving. Mathematics is also supremely satisfying to teach, as you introduce your students to its riches, its applications, and its beauty. Now is a good time to study mathematics, as there is a huge shortage of well-trained teachers. With a mathematics method you will be welcome at any school!

COURSE DELIVERY PLAN 2020

Media Studies (Education Minor) EMIMDA
The media occupies a central place in our society and culture and makes a significant contribution to the world around us. As new media and communication technologies are introduced, and delivery costs of content decrease, we are entering an entirely new era of media production and consumption. A minor in Media Studies enables you to undertake a sequence of units focusing on contemporary media forms and practices. This specialised area of study draws together a mix of units, some with an emphasis on analysis and research, and some with a large hands-on practical component, including digital radio and television production.

Psychology (Education Minor) EMIPSY
The psychology minor equips you with a theoretical understanding of a range of psychological topics such as motivation and emotion, biological, cognitive, social, and personality psychology. Analytical, research and statistical skills, and understanding of relationships and communication are also developed through study of this minor.

## COURSE DELIVERY PLAN 2020

### Student Welfare (Education Minor) EMISWE

Student Welfare is a dynamic sequence that provides you with an understanding of young people and children as they transition into adolescence. We talk about the issues, strategies and options. This unit will improve your practice as a teacher. Schools want teachers with a robust mix of skills given the diversity of children and young people in the public setting. You can undertake the youth work units in a student welfare sequence or as stand-alone electives.

### Teaching English as an Additional Language (TEAL) (Education Minor) EMIEAL

Teaching English as an Additional Language (TEAL) is a dynamic, global profession. With English being the international language of business, education, research and cross-cultural communication, qualified TEAL professionals are in great demand worldwide. You will gain important teaching skills and can be qualified to teach international students, migrant and refugees in Australia, and in many contexts overseas. You can travel, teach, learn new culture and expand your horizon. The program provides grounding in TEAL theory and practice through discussions, projects and presentations in linguistic, educational and socio-cultural aspects of language learning, and in the methodology of teaching and learning English in second and foreign language settings. The ESL classroom is usually seen as a dynamic, empowering and creating environment where a teacher acts as a guide, a facilitator and a resource to maximise each individual’s participation and contribution.

Writing (Education Minor) EMIWRT
The Writing minor is designed for students who enjoy writing and who want to develop practical and analytical skills, combined with a sound theoretical understanding, in the area of creative and professional writing. Lectures and practical writing workshops give students a firm foundation in a range of writing genres, including fiction writing, scriptwriting, journalism and editing. All units balance the practical development of expertise in writing, and analysis of the writing of others, within a broader social and cultural context.
