Bachelor of Physical Education and Sport Science

COURSE CODE: SBPH

CAMPUS	Footscray Park (FP)
COLLEGE	College of Sport and Exercise Science
STUDY MODE	Full Time or Part Time
DURATION	3 years Full Time or Part Time equivalent
FEE TYPE	For information on course fees, refer to http://vu.edu.au/fees
APPLICATION METHOD	VTAC - https://vtac.edu.au Direct Application - https://gotovu.custhelp.com/app/landing
TIMETABLE	vu.edu.au/timetables
COURSE REQUIREMENTS	To attain the Bachelor of Physical Education and Sport Science, students will be required to complete 288 credit points consisting of: <ul style="list-style-type: none">• 96 credit points of First Year Core units• 144 credit points of Professional Core units• 48 credit points of Minor studies from the approved list
FURTHER INFORMATION	Unit and course information is available from the University course search site at http://vu.edu.au/course-search or go to https://askvu.vu.edu.au or Phone VUHQ on 03 9919 6100
COURSE CHAIR	Fiona Mclachlan Michael Spittle
COURSE ADVICE	CSES.ADMIN@vu.edu.au

Note: Students are required to enrol in all units for semester 1 and 2, and are not permitted to enrol in more than 48 credit points per semester as a full-time load.

Core/Elective Core (a unit that must be completed) & Elective (you have some choice in what you select).

Prerequisites A number of units within the degree have 'prerequisites'. These prerequisites must be met before enrolment in the unit is permitted. Generally these prerequisites require the successful completion of a unit or units taken at an earlier stage in the course. Students should pay particular attention to these prerequisite requirements as failure to meet these can seriously hinder progression through the course.

Date of Publication: This information is current at the publication date: 26/08/2020. It is provided as information only and does not form part of a contract between any person and Victoria University.

MINORS

Biology NMIBIO

The minor in biology will introduce you to a range of biology topics and allow you to develop an understanding of the interrelationships between the various facets of life. A strong mix of theoretical and practical based studies of how science is discussed, the basic scientific knowledge it contains and the experimental process from where the information has been collected, will teach you how to analyse both data and the literature and apply critical thinking skills to defend the ideas you have developed. Topics include the investigation the molecules of life, ecology and evolution, how the world works at the cellular level, how the body defends itself from foreign invaders and how biology is used in commercial applications.

Chemistry NMICHE

This minor in Chemistry will introduce you to the principles and practices of modern chemistry. Building upon the fundamental principles of chemistry which are introduced in the first year units, Analytical Methods 1 and Organic Synthesis introduce students to instrumental analytical chemistry and the theoretical and practical aspects of synthetic organic chemistry. These units provide basic training in the preparation, purification and characterisation of organic compounds and their complimentary modern spectroscopic, chromatographic and spectrometric methods of analysis.

For students interested in teaching chemistry, taking the four (4) units in this minor adequately prepares students to deliver units 1, 2, 3 and 4 of the VCE chemistry curriculum.

Digital Media AMIDIG

Digital media is a ubiquitous force transforming how we work, interrelate and communicate. Once a technology located within the area of work, digital media is moving into all areas of everyday life, and practitioners are required to develop new applications such as in the areas of entertainment, health and education. Concurrently, technology is now at a point where those with higher education level digital media can co-opt technology to create projects.

Environmental Science NMIENV

The world around us is changing at an ever increasing pace, and Environmental Science offers the key to better understanding and managing these changes. By investigating the relationships between the physical, chemical and biological components of the natural world the human race can actively develop solutions to varied environmental problems. Studies will cover topics including management of natural resources, sustainability, the impact of pollution, climate change, deforestation and habitat destruction among other issues will affect us in the coming decades. A minor in Environmental Science incorporates ideas from a broad range of disciplines - from the natural sciences, to geography, economics and politics, in addition to the philosophies and ethics that underpin activity in these areas.

History AMIHIS

Knowledge of the past has always been central to human awareness. For more than a century, the study of History has underpinned the Western liberal tradition. History is connected with the search for meaning. It conveys communal memory, creating a sense of personal and group identity by locating individuals in time and space. The study of History offers each of us the chance to understand, even bridge, other cultures. The minor in History offers opportunities to sample this diverse human experience. Our aim is to both challenge and excite you as you move through the study of History, beyond your own lives to those of people in other times and other places. We also aim to develop an appreciation of the contributions historians make to an understanding of contemporary society.

Literary Studies AMILIT

This minor provides an integrated set of units in literary studies. It introduces students to key theories and texts central to the discipline. Students are introduced to different critical perspectives that shape contemporary commentary, and are invited to consider the impact of different speaking positions on how the field of literary studies is being shaped. Assessment tasks for the minor include short exercises, oral presentations, essays, and formal examinations.

Mathematics/Statistics NMIMST

After developing a solid grounding in science and mathematics from the core units in first year, this specific group of units allows you to pursue a breadth minor in mathematics and statistics.

These disciplines are at the heart of all modern science: from modelling of scientific problems to analyzing data. This minor includes the fundamental mathematics and statistics as used in modern applications, and will also provide you with the

COURSE DELIVERY PLAN 2021

grounding to be an active and independent learner. This minor places great emphasis on applications, and also on the use of technology: from hand-held calculators to modern "industry strength" computer systems. As a science graduate with a solid grounding in mathematics and statistics you will be well placed to enter the workforce.

Much modern science requires the creation of a good mathematical model as an underpinning; this minor will provide the necessary tools to be able to create such models, analyze them, and use them for testing, evaluation, and prediction. As well, data produced from laboratory or field studies needs to be rigorously analysed, and this minor introduces the technical skills necessary for such analysis.

This minor is appropriate for student undertaking major studies in a range of science discipline areas who wish to complement their studies with some training in applied mathematics and statistics, and in the use of technology to support those fields.

Media Studies (Education Minor) EMIMDA

The media occupies a central place in our society and culture and makes a significant contribution to the world around us. As new media and communication technologies are introduced, and delivery costs of content decrease, we are entering an entirely new era of media production and consumption. A minor in Media Studies enables you to undertake a sequence of units focusing on contemporary media forms and practices. This specialised area of study draws together a mix of units, some with an emphasis on analysis and research, and some with a large hands-on practical component, including digital radio and television production.

Outdoor Recreation Leadership SMIOUT

Love being outdoors, and looking for an adventure? If you want to learn about adventure with highly qualified outdoor professionals through hands on experiences in rock climbing, white water rafting, hiking, and skiing as well as develop an in-depth understanding about outdoor recreation, education and adventure sports, then Outdoor Recreation Leadership is

for you. The use of industry partnerships and critical evidence based practice to inform teaching will ensure that during the course you will learn all the skills needed to lead in the outdoors. Outdoor Recreation Leadership provides the opportunity for students to build highly valued character traits including communication, group leading, integrity, cultural sensitivity, and psychological resilience.

Psychology AMIPSY

The psychology minor equips you with a theoretical understanding of a range of psychological topics such as motivation and emotion, biological, cognitive, social, and personality psychology. Analytical, research and statistical skills, and understanding of relationships and communication are also developed through study of this minor.

Sport Coaching SMISCO

The minor provides students with the foundational skills required to coach safely and effectively at the community, domestic and representative levels. Students will develop an individual coaching philosophy and style, use relevant technology, practice coaching in controlled settings (e.g., Learning in the workplace), develop program planning skills, and how to deliver applied exercise prescription programs. This minor is planned to provide students with a balance between the theory of coaching science and practical application of key concepts.
