HOW TO USE THIS HANDBOOK

Victoria University’s 2018 College of Sport and Exercise Science Handbook is designed to provide students with detailed information on course structures and unit details for undergraduate and postgraduate courses offered by the college in 2018.

The definition of fields used in course tables throughout this handbook include:

Credit Point – the number of credit points a unit contributes towards the total points needed to complete a course.

PLEASE NOTE

This handbook provides a guide to courses available within Victoria University’s College of Sport and Exercise Science in 2018.

Although all attempts have been made to make the information as accurate as possible, students should check with the college that the information is accurate when planning their courses.

NOTE: Prospective students are strongly advised to search the University’s online courses database at www.vu.edu.au/courses for the most up-to-date list of courses.

This handbook includes descriptions of courses that may later be altered or include courses that may not be offered due to unforeseen circumstances, such as insufficient enrolments or changes in teaching personnel. The fact that details of a course are included in this handbook can in no way be taken as creating an obligation on the part of the University to teach it in any given year or in the manner described. The University reserves the right to discontinue or vary courses at any time without notice.

OTHER INFORMATION

Information about course fees, articulation and credit transfer, recognition of prior learning, admission and enrolment procedures, examinations, and services available to students can be accessed on the University’s website or by contacting the University directly.

### Majors/Minors

### UNITS
College of Sport and Exercise Science

Below are details of courses offered by the College of Sport and Exercise Science in 2018.

This information is also available online on the University’s searchable courses database at www.vu.edu.au/courses

NOTE: Courses available to international students are marked with the (I) symbol.

Bachelor of Exercise Science (Sport Practice)

Course Code: AHEHD

Campus: Footscray Park.

About this course: This undergraduate program will deliver a balance of units across the biological sciences, social sciences and humanities. The degree will be widely respected throughout the sports, fitness, exercise and human movement professions. This course will provide graduates with the foundation knowledge and skills for entry into professional careers in exercise and sport such as exercise and sport science, rehabilitation, community fitness and health, as well as research. The degree has two main components:

- a foundation program in first year where students take introductory level units in kinesiology, biomechanics, human physiology, exercise psychology and research methods;
- an advanced program in the second and third year consisting of a number of specified units.

Course Objectives: On successful completion of this course, students will be able to:

1. Provide exercise interventions for apparently healthy populations, including high performance and recreational athletes;
2. Integrate the biological and social scientific knowledge and professional skills that underpin professional practice in the fields of exercise and sport science;
3. Critically analyse and synthesise knowledge gathered from exercise and sport science research;
4. Exercise judgement to solve routine exercise science problems using social, ethical, economic, regulatory and global perspectives;
5. Operate as an independent and collaborative professional who can communicate knowledge and ideas clearly and coherently;
6. Critically apply exercise and sport science knowledge and skills to solve routine problems in sport practice settings;
7. Adapt legal and ethical frameworks in order to work effectively in socially and culturally diverse communities and contexts; and
8. Continue to develop a broad and coherent body of professional sport practice so as to undertake postgraduate studies and research in exercise rehabilitation and related fields.

Careers: Graduates of the Exercise Science (Sport Practice) course will find employment in: Clinical and Sports rehabilitation; Sports Science; Strength and Conditioning Coaching; Fitness/Skills Coaching; Personal Training; Health and Fitness Instructing; Lecturing; and Exercise and Sports Science Research.

Course Duration: 3 years

Admission Requirements: Successful completion of an Australian Senior Secondary Certificate (VCE or equivalent) including Units 3 and 4: a study score of at least 25 in English (EAL) or at least 20 in any other English.

Admission Requirements International: Successful completion of an Australian Senior Secondary Certificate (VCE or equivalent), OR Successful completion of an Australian Diploma or Advanced Diploma (or equivalent). PLUS IELTS (or equivalent): Overall score of 6 with no band less than 6.0.

Admission Requirements Mature Age: Applicants with relevant work, education and/or community experience will be considered for admission to the course.

Admission Requirements VET: Successful completion of a cognate (similar discipline) Australian Diploma or Advanced Diploma (or equivalent) will be granted advanced standing on a case by case basis.

Selection Processes: OtherNB: The accrediting body for this course, Exercise and Sport Science Australia (ESSA) requires that no awarding of advanced standing or recognition of prior learning for noncredentialed / experiential learning is permitted. Students will require a Working with Children Check and National Police Check to be eligible to undertake and participate in workplace visits, placements or projects. Use the following site links to obtain additional information:

COURSE STRUCTURE

To attain the Bachelor of Exercise Science (Sport Practice), students will be required to complete 288 credit points consisting of:

- 96 credit points of First Year Core units
- 192 credit points of Professional Core units

First Year Core Units

AHE1101 Structural Kinesiology 12
AHE1105 Research Methods for Exercise Professionals 12
AHE1107 Human Growth and Lifespan Development 12
AHE1112 Resistance Training 12
AHE1202 Biomechanics 12
RBM1174 Human Physiology 12
SCL1002 Exercise Physiology 12
SCL1003 Exercise and Sport Psychology 12

Professional Core Units

AHE2005 Nutrition and Diet for Exercise and Physical Education 12
AHE2006 Exercise Interventions for Healthy Populations 12
AHE2102 Sports Biomechanics 12
Bachelor of Exercise Science (Clinical Practice)

Course Code: S6HE

Campus: Footscray Park.

About this course: This undergraduate program delivers a balance of units across the biological sciences, social sciences and humanities. The degree will be widely respected throughout the sports, fitness, and exercise rehabilitation professions. This course provides graduates with the foundation knowledge and skills for entry into professional careers in exercise and sport such as exercise and sport science, rehabilitation, community fitness and health, as well as research. The degree has two main components:

- A foundation program in first year where students take introductory level units in kinesiology, biomechanics, human physiology, exercise psychology and research methods.
- An advanced program in the second and third year consisting of a number of specified units.

Course Objectives: On successful completion of this course, students will be able to:

1. Provide exercise interventions for apparently healthy populations, including high performance and recreational athletes, and the general population;
2. Integrate the biological and social scientific knowledge and professional skills that underpin professional practice in the fields of clinical exercise science;
3. Critically analyse and synthesise knowledge gathered from clinical exercise science research;
4. Exercise judgement to solve routine exercise science problems using social, ethical, economic, regulatory and global perspectives;
5. Operate as an independent and collaborative professional who can communicate knowledge and ideas clearly and coherently;
6. Critically apply clinical exercise science knowledge and skills to solve routine problems in clinical practice settings;
7. Adopt legal and ethical frameworks in order to work effectively in socially and culturally diverse communities and contexts; and
8. Continue to develop a broad and coherent body of professional clinical practice so as to undertake postgraduate studies and research in exercise rehabilitation and related fields.

Careers: Graduates of the Exercise Science (Clinical Practice) course will find employment in: Clinical and Sports Rehabilitation; Exercise Science; Strength and Conditioning Coaching; Fitness/Skills Coaching; Personal Training; Health and Fitness Instructing; Lecturing; and Exercise and Sports Science Research.

Course Duration: 3 years

Admission Requirements: Completion of an Australian Senior Secondary Certificate (VCE or equivalent) including Units 3 and 4: a study score of at least 25 in English (EAL) or at least 20 in any other English.

Admission Requirements International: Completion of an Australian Senior Secondary Certificate (VCE or equivalent), OR Successful completion of an Australian Diploma or Advanced Diploma (or equivalent) PLUS IELTS (or equivalent): Overall score of 6 with no band less than 6.0

Admission Requirements Mature Age: Applicants with relevant work, education and/or community experience will be considered for admission to the course.

Admission Requirements VET: Completion of a cognate (similar discipline) Australian Diploma or Advanced Diploma (or equivalent) will be granted advanced standing of a maximum 96 credit points (Diploma) or 144 credit points (Advanced Diploma). OR Completion of a non-cognate (not similar) Australian (or equivalent) Diploma or Advanced Diploma will be granted advanced standing on a case by case basis.

Selection Processes: Other NB: The accrediting body for this course, Exercise and Sport Science Australia (ESSA) requires that no awarding of advanced standing or recognition of prior learning for non-credentialed / experiential learning is permitted. Students will require a Working with Children Check and National Police Check to be eligible to undertake and participate in workplace visits, placements or projects. AHE2127 Motor Learning 12
The Master of Clinical Exercise Science and Rehabilitation (AMEP) is accredited by the National University Course Accreditation Program (NUCAP) which is the accreditation body for Exercise and Sports Science Australia (ESSA). Graduates of the Master of Clinical Exercise Science and Rehabilitation (AMEP) will be qualified as Exercise Physiologists (CEPs). They will also gain access to a Medicare Provider number and be able to work as a registered Allied Health professional (eg Clinical Exercise Physiologist) under the Australian government’s Medicare health schemes.

Course Objectives: On successful completion of this course, students will be able to:

1. Apply knowledge and expertise to the application of exercise in the field of preventive medicine and rehabilitation;
2. Interpret and apply specific skills and competencies in the areas of cardiovascular, metabolic, respiratory, musculoskeletal, and neurological rehabilitation, which will assist in gaining accreditation with Exercise and Sports Science Australia (ESSA);
3. Critically analyse, reflect on and implement skills for clinical practice;
4. Refine and adapt evaluation skills and tools to self-assess;
5. Design and conduct active research.

Careers: On successful completion of AMEP, students will gain accreditation as Exercise Physiologists with Exercise and Sports Science Australia (ESSA) and will be eligible to gain a provider number and work under the compensable health care schemes such as Medicare.

Course Duration: 1.5 years

Admission Requirements: Successful completion of an ESSA accredited Bachelor/Honours Degree in Exercise Science or Exercise Physiology; OR Successful completion of an ESSA accredited Bachelor/Honours Degree and have completed all areas of study required for ESSA Exercise Science (full) membership. Applicants will be required to demonstrate completion of all areas of study required for ESSA Exercise Science membership (full) and have completed 140 hours of exercise prescription for apparently healthy clientele. Please check your exercise science graduate entry eligibility on the ESSA website at https://www.essa.org.au/membership/ways-to-join-essa/#assessment

Admission Requirements International: In addition to satisfying the Bachelor/Honours Degree or Mature Age admission requirements, International Students must provide evidence of proficiency in the English language as demonstrated by: International English Language Testing System or its equivalent - overall score of 7 and no individual band score less than 7.

Admission Requirements Mature Age: Current ESSA Accredited Exercise Physiologists who would like to broaden research knowledge and skills and potentially pursue a research pathway are welcome to apply.

Selection Processes: Other A prerequisite for admission to AMEP is ESSA Exercise Science membership (full) or eligibility for ESSA Exercise Science membership and completion of 140 hours of exercise prescription for apparently healthy clientele. To check whether your prior study would meet current ESSA Exercise Science requirements, download the ASSESSMENT for POSTGRADUATE ACCREDITED EXERCISE PHYSIOLOGIST (AEP) study application form — NON NUCAP from ESSA website https://www.essa.org.au/wp-content/uploads/2016/07/2016-Graduate-Entry-GE-assessment-non-NUCAP_final_updated.pdf and section E https://www.essa.org.au/wp-content/uploads/2015/12/ESSA-Exercise-Science-Standards.pdf. Please complete both forms and submit them with your log book to ESSA. Once ESSA have provided you with the Graduate Entry Assessment or the ESSA Exercise Scientist membership, include that with your application for the Master of Clinical Exercise Science and Rehabilitation. Applicants who do not fit under the above criteria can contact the AMEP course coordinator (Michael.Butson@vuw.ac.nz) to discuss your application in person.

COURSE STRUCTURE

To attain the Master of Clinical Exercise Science and Rehabilitation, students will be required to complete 144 credit points (equivalent to 12 units) consisting of:

- 96 credit points (equivalent to 8 units) core units
- 48 credit points (equivalent to 4 units) either the minor thesis or research coursework units

Year 1, Semester 1

SCL6201 Psychology for Rehabilitation 12
Bachelor of Fitness

Course Code: SBF1
Campus: Footscray Park.

About this course: The Bachelor of Fitness provides knowledge and skills in the field of fitness through discipline-specific studies in health, exercise science, and management. Designed by professionals and academics with industry experience to offer flexibility and professional development at a degree level for professionals looking for the next step in their fitness career. The course is a response to industry needs for Bachelor level study specifically in fitness and will provide you high level skills and knowledge to be successful as a leader in this field. Students complete studies in areas including exercise science, health, marketing, management, nutrition, ethics, personal training, resistance training, group fitness (e.g., exercise to music, bootcamp, aqua aerobics, mind and body, cycle, boxing, circuit), fitness training systems (e.g., functional fitness, plyometric, and cross training), and fitness training for all populations. The Bachelor of Fitness provides for a variety of fitness industry careers and graduate destinations including in fitness centres, gyms, aquatic facilities, community facilities, corporate facilities, corporate and community health, recreation facilities, and personal training businesses. Minors are available in health and nutrition, sport management, sport coaching, and advanced sport science. Graduates from the Bachelor of Fitness can apply for Exercise Professional Registration with Fitness Australia (FA) and as an Advanced Personal Trainer with Physical Activity Australia.

Course Objectives: On successful completion of this course, students will be able to:
1. Integrate knowledge and skills from health, exercise and management disciplines to become a fitness leader in the fitness profession;
2. Design evidence-based practice in fitness and health to support the fitness needs of individuals, groups, and the community;
3. Analyse and synthesise information gathered from health, exercise, management and fitness research to develop knowledge and understanding of fitness and as a basis for independent lifelong learning;
4. Evaluate and apply information and creatively solve problems related to professional practice in fitness;
5. Work as an independent and collaborative professional who can clearly and coherently communicate fitness knowledge and ideas; and
6. Analyse and evaluate evidence-based approaches to address a variety of fitness and health related issues.

Careers: The Bachelor of Fitness provides for a variety of fitness industry careers and graduate destinations including in fitness centres, gyms, aquatic facilities, community facilities, corporate facilities, corporate and community health, recreation facilities, and personal training businesses.

Course Duration: 3 years

Admission Requirements: Completion of an Australian Senior Secondary Certificate (VCE or equivalent) including Units 3 and 4: a study score of at least 25 in English (EAL) or 20 in any other English.

Admission Requirements Mature Age: Applicants with relevant work, education and/or community experience will be considered for admission to the course.

Admission Requirements VET: Completion of a cognate (similar discipline) Australian Diploma or Advanced Diploma (or equivalent) will be granted advanced standing of a maximum 96 credit points (Diploma) or 144 credit points (Advanced Diploma). OR Completion of a non-cognate (not similar) Australian (or equivalent) Diploma or Advanced Diploma will be granted advanced standing on a case by case basis.

COURSE STRUCTURE

To attain the Bachelor of Fitness, students will be required to complete 288 credit points consisting of:
- 96 credit points of First Year Core units
- 144 credit points of Professional Core units
- 48 credit points of minor studies from the approved list

Bachelor of Fitness
Course Code: SBF1
Campus: Footscray Park.
Course Objectives: On successful completion of this course, students will be able to:

1. Integrate conceptual understandings of training and conditioning needs, program design, service delivery, performance evaluation, barriers to participation and relevant sport and exercise science principles, with advanced specialist knowledge within the discipline of psychological studies;
2. Critically analyse theoretical and technical knowledge in diverse contexts, and adapt and apply reated counseling and psychological skills to the effective and professional delivery of sport, exercise and active recreation programs;
3. Critically review and apply information with initiative and judgement in order to both anticipate and creatively solve problems related to the delivery of sport, exercise, and active recreation services in contemporary settings;
4. Exhibit professional judgment, ethical standards, and social sensitivity by adapting knowledge and skills to make decisions, either individually or collaboratively, that provide inclusive, sustainable, and culturally relevant sport, exercise, and active recreation experiences;
5. Reflect on personal learning and skills in relation to career goals with a view to implementing creative strategies to promote lifelong learning, and establishing pathways for the attainment of further professional development and educational training;
6. Apply personal and interpersonal competencies, work-group skills, and leadership abilities to the professional delivery of exercise, fitness and conditioning programs. This will be done while also accommodating the divergent and complex cultures of Australia and other regions around the world; and
7. Contribute to the organisation and delivery of sport, exercise, and active recreation programs with personal accountability, integrity, and social responsibility for outcomes, and do it through dynamic 21st Century work teams that use resources efficiently, provide high levels of participant satisfaction, and deliver widespread social utility.

Careers: Graduates of this course have successfully moved on to higher levels of education (Honours, Masters and PhD) in the fields of sport, exercise and health psychology and have become accredited sport and exercise psychologists. The psychology specialisation is designed to provide preparation for a fourth year of study in psychology for graduates wishing to achieve professional accreditation. With further postgraduate study, graduates may pursue a career as a registered (sport and exercise) psychologist. Graduates often continue with further postgraduate study in related fields. Graduates will have the skills to work in many different employment areas such as exercise and sport sciences, fitness, athlete counselling and coaching, working with large organisations, teams and individuals. They may also find employment in areas such as welfare, community services and human resources, or undertake further study to qualify as teachers or social workers.

Course Duration: 4 years

Admission Requirements: Successful completion of an Australian Senior Secondary Certificate (VCE or equivalent) including Units 3 and 4 with a minimum study score of 25 in English (EAL) or 20 in any other English.

Admission Requirements International: Successful completion of an Australian Senior Secondary Certificate (VCE or equivalent), OR Successful completion of an Australian Diploma or Advanced Diploma (equivalent) PLUS IELTS (equivalent): Overall score of 6 with no band less than 6.0

Admission Requirements Mature Age: Applicants with relevant work, education and/or community experience will be considered for admission to the course.

Admission Requirements VET: Successful completion of a cognate (similar discipline) Australian Diploma or Advanced Diploma (or equivalent) will be granted advanced standing of a maximum 96 credit points (Diploma) or 144 credit points (Advanced
Diploma). OR Successful completion of a non-cognate (not similar) Australian (or equivalent) Diploma or Advanced Diploma will be granted advanced standing on a case by case basis.

**Selection Processes:** Other Students will require a Working with Children Check and National Police Check to be eligible to undertake and participate in workplace visits, placements or projects. Use the following site links to obtain additional information: http://www.workingwithchildren.vic.gov.au/ http://www.police.vic.gov.au/content.asp?Document_ID=274.

**COURSE STRUCTURE**
To attain the Bachelor of Sport Science (Human Movement)/Bachelor of Psychological Studies, students will be required to complete 384 credit points consisting of: 96 credit points First Year Core units 48 credit points Core units 240 credit points Professional Core units.

### First Year Core Units
- AHE1101 Structural Kinesiology 12
- AHE1112 Resistance Training 12
- APP1012 Psychology 1A 12
- APP1013 Psychology 1B 12
- APP1016 Foundations of Psychological Research 12
- ASX1003 Foundations of Social Science Research 12
- RBM1174 Human Physiology 12
- SCL1003 Exercise and Sport Psychology 12

### Year 2, Semester 1
- AHE1105 Research Methods for Exercise Professionals 12
- AHE1107 Human Growth and Lifespan Development 12
- AHE1202 Biomechanics 12
- SCL1002 Exercise Physiology 12

### Year 2, Semester 2
- APP2013 Psychology 2A 12
- APP2101 Intercultural and Developmental Issues in Psychology 12
- APS2040 Quantitative Social Research Methods 1 12
- SPE3100 Psychosocial Aspects of Health and Physical Activity 12

### Year 3, Semester 1
- APP2014 Psychology 2B 12
- APP3035 Research Methods in Psychology 12
- APP3036 History and Theories in Psychology 12
- APS2030 Qualitative Social Research Methods 1 12

**Year 3, Semester 2**
- AHE2005 Nutrition and Diet for Exercise and Physical Education 12
- AHE2127 Motor Learning 12
- APP3037 Clinical Aspects of Psychology 12

### Year 4, Semester 1
- AHE3120 Exercise Science Career Development 12
- AHE3116 Social Dimensions of Sport and Exercise 12
- APP3028 Fieldwork 12

12 credit points (equivalent to 1 unit) of psychological studies elective units from the list provided.

### Year 4, Semester 2
- AHE3111 Sport and Social Analysis 12
- AHE3200 Professional Ethics 12
- APP3023 Psychological Issues in the Workplace 12
- AHE3125 Applied Exercise Psychology 12

### PSYCHOLOGICAL STUDIES ELECTIVE LIST
24 credit points (equivalent to 2 units) of psychological studies elective units from the list below.

- APP3015 Counselling Theory and Practice 12
- APP3016 Group Behaviour 12
- APP3018 Organisations and Work 12
- APP3019 Psychobiology 12
- APP3020 Psychoanalysis 12
- APP3021 Psychology of Adjustment 12
- APP3025 Psychological Assessment 12
- APP3026 Cognitive Psychology 12

**Bachelor of Sport Science (Human Movement)/Bachelor of Sport Management**

Course Code: SBHS
Campus: Footscray Park.
About this course: This double degree in Sport Science (Human Movement) and Sport Management (Sport & Active Communities) or (Outdoor Recreation leadership) provides students with a sound knowledge and critical appreciation of both the skills and understandings of human movement, and the structure, practices and participant needs of the Australian sport, exercise and active recreation sector. This course will provide graduates with the foundation knowledge and skills for entry into a breadth of professional careers. They include first, exercise and sport science, rehabilitation, community fitness and health, and personal training and second, community sport development, planning for sport and active recreation, and consulting and research in sport participation.

Course Objectives: On successful completion of this course, students will be able to:
1. Integrate conceptual understandings of strategic planning, operational management, fitness assessments, training and conditioning needs, program design, service delivery, performance evaluation, and relevant business and exercise science principles, with advanced specialist knowledge within the discipline of sport, exercise, and active recreation;
2. Critically analyse theoretical and technical knowledge in diverse contexts, and adapt and apply related skills to the effective management of sport and active recreation services and the professional delivery of exercise, fitness and conditioning programs;
3. Critically review and apply information with initiative and judgement in order to both anticipate and creatively solve problems related to the management and delivery of sport, exercise, and active recreation services in contemporary settings;
4. Exhibit professional judgement, ethical standards, and social sensitivity by adapting knowledge and managerial skills to make decisions, either individually or collaboratively, that provide inclusive, sustainable, and culturally relevant sport, exercise, and active recreation experiences;
5. Communicate a coherent and independent exposition of industry knowledge and operational skills in both oral and written form to a range of audiences;
6. Reflect on personal learning and skills in relation to career goals with a view to implementing creative strategies to promote lifelong learning, and establishing pathways for the attainment of further professional development and educational training;
7. Apply personal and interpersonal competencies, work-group skills, and leadership abilities to the effective management of sport and active recreation enterprises, and the professional delivery of exercise, fitness and conditioning programs. This will be done while also accommodating the divergent and complex cultures of Australia and other regions around the world; and
8. Contribute to the organisation and delivery of sport, exercise, and active recreation programs with personal accountability, integrity, and social responsibility for outcomes, and do it through dynamic 21st Century work-teams that use resources efficiently, provide high levels of participant satisfaction, and deliver widespread social utility.

Careers: Graduates from the double degree in Sport Science (Human Movement) and Sport Management will be prepared to undertake professional responsibilities in a variety of sport, exercise and active recreation settings. Graduates will find work as manager, administrators and sport scientists in not only professional sport, but also recreation clubs, state and national sporting bodies, community sport clubs and agencies, leisure centres, privately-run gyms and fitness centres, stadiums and facilities, community service organisations, outdoor recreation facilities, adventure therapy providers, corporate health programs, all levels of government sport and active recreation services, commercial sport, and sports management consultancies. Additionally, many graduates will undertake further postgraduate study in a number of related fields.

Course Duration: 4 years

Admission Requirements: Successful completion of an Australian Senior Secondary Certificate (VCE or equivalent) including Units 3 and 4 with a minimum study score of 25 in English (EAL) or 20 in any other English.

Admission Requirements International: Successful completion of an Australian Senior Secondary Certificate (VCE or equivalent) OR Successful completion of an Australian Diploma or Advanced Diploma (or equivalent) PLUS IELTS (or equivalent): Overall score of 6 with no band less than 6.0

Admission Requirements Mature Age: Applicants with relevant work, education and/or community experience will be considered for admission to the course.

Admission Requirements VET: Successful completion of a cognate (similar discipline) Australian Diploma or Advanced Diploma (or equivalent) will be granted advanced standing of a maximum 96 credit points (Diploma) or 144 credit points (Advanced Diploma). OR Successful completion of a non-cognate (not similar) Australian (or equivalent) Diploma or Advanced Diploma will be granted advanced standing on a case by case basis.

Selection Processes: Other Students will require a Working with Children Check and National Police Check to be eligible to undertake and participate in workplace visits, placements or projects. Use the following site links to obtain additional information: http://www.workingwithchildren.vic.gov.au/; http://www.police.vic.gov.au/content.asp?Document_ID=274.

COURSE STRUCTURE
To attain the Bachelor of Sport Science (Human Movement)/Bachelor of Sport Management, students will be required to complete 384 credit points consisting of:
- 96 credit points First Year Core units
- 48 credit points Core units
- 96 credit points Sport Science (Human Movement) Professional Core units
- 96 credit points Major studies from the approved list
- 48 credit points Minor studies from the approved list

Students who commenced in 2014, 2015 and 2016, must successfully complete any combination of 4 units from the following eight Sport Management College Core units:
- SSM1101 Introduction to Sport and Active Recreation
- SSM1102 Foundations of Sport and Active Recreation
- SSM1103 Management Principles for Sport and Active Recreation
- SSM1104 Community Building for Sport and Active Recreation
- SSM1201 Marketing for Sport and Active Recreation
- SSM1202 Financial Management for Sport and Active Recreation
- SSM1203 Human Resources for Sport and Active Recreation
- SSM1204 Ethics and Integrity Management in Sport and Active Recreation

First Year Core Units
SCL1003 Exercise and Sport Psychology
About this course: The Bachelor of Outdoor Education and Environmental Science provides knowledge and skills through discipline specific studies in outdoor education, outdoor recreation, environmental science and general science. Designed by professionals and academics in these disciplines this course offers a highly attractive pathway to a diverse range of graduate outcomes. For students wishing to pursue a teaching degree the course will be highly attractive as it satisfies 3 major teaching areas for the Victorian Institute of Teaching (VIT) therefore offering a pathway into the M Teach. The major areas covered are general science, environmental science and outdoor and environmental studies. For students not wishing to pursue a teaching pathway the course will be highly attractive as it will open a diverse range of graduate destinations with an outdoor adventure recreation or environmental science focus. Students would find themselves ideally suited for a range of scientific roles in organisations such as the CSIRO, Local Catchment Management Authorities (CMAs) and local council roles related to the environment and sustainability. Graduates will also find themselves ideally placed for any eco/adventure tourism or scientific roles with a field based requirement. This relates to the specific skills and knowledge gained through the outdoor education component of their course that provides them with the skills and knowledge to ensure their own and others safety by managing risk appropriately and achieving organisational objectives in a diverse range of environments and conditions. Students will complete studies in science based areas such as biology, flora and fauna, ecology, conservation and sustainability. As well as general knowledge areas such as indigenous understanding and community building alongside outdoor education specific areas such as leadership, group and resource management, risk and safety, specific adventure activity skill development (bushwalking, canoeing, white water rafting, mountain biking, rock climbing and alpine activities) and theoretical and philosophical foundations. Graduates will also have the opportunity to complete external industry based qualifications (e.g. Wilderness First Aid, Swift Water Rescue during the completion of their units).

Course Objectives: On successful completion of this course, students will be able to:

1. Integrate knowledge and skills from the outdoor education, general science and environmental science disciplines to become a leader in their area of expertise;
2. Develop and design evidence-based practice in outdoor education and environmental science to support a diverse range of individual, group, community and stakeholder needs;
3. Analyse and synthesise information gathered from outdoor education and environmental science research to develop knowledge and understanding of professional identity and discipline specific requirements and as a basis for independent lifelong learning;
4. Evaluate and apply information to creatively
solve problems related to professional practice in outdoor education and environmental science;  
5. Work as an independent and collaborative professional who can clearly and coherently communicate outdoor education and environmental science knowledge and ideas;  
6. Analyse and evaluate a diverse range of policies and procedures to enable the safe delivery and implementation of field-based programs across the outdoor education and environmental science disciplines; and 
7. Develop skill specific knowledge and technique in a broad range of outdoor adventure activities to use as a platform for the development of meta-skills related to outdoor education and environmental science.

Careers: Students would find themselves ideally suited for a range of scientific roles in organisations such as the CSIRO, Local Catchment Management Authorities (CMAs) and local council roles related to the environment and sustainability. Students will also find themselves ideally placed for any outdoor/eco/adventure tourism or scientific roles with a field-based requirement. The course satisfies three separate VIT major teaching areas and therefore potential transition into a Master of Teaching degree.

Course Duration: 3 years

Admission Requirements: Completion of an Australian Senior Secondary Certificate (VCE or equivalent) including Units 3 and 4: a study score of at least 25 in English (EAL) or 20 in any other English.

Admission Requirements Mature Age: Applicants with relevant work, education and/or community experience will be considered for admission to the course.

Admission Requirements VET: Completion of a cognate (similar discipline) Australian Diploma or Advanced Diploma (or equivalent) will be granted advanced standing on a case by case basis.

Selection Processes: Other Students will require a Working with Children Check and National Police Check to be eligible to undertake and participate in workplace visits, placements or projects. Use the following site links to obtain additional information: http://www.workingwithchildren.vic.gov.au/ http://www.police.vic.gov.au/content.asp?Document_ID=274 The field lab activities and assessments within specific units in this course may have extra fees required due to the complex staffing, logistical and resourcing requirements of facilitating extended farming experiences in remote locations.

COURSE STRUCTURE

To attain the Bachelor of Outdoor Education and Environmental Sciences, students will be required to complete 288 credit points consisting of:

- 96 credit points First Year Core units
- 192 credit points Professional Core units

Bachelor of Physical Education and Sport Science

Course Code: SBPH

Campus: Footscray Park.

About this course: This course provides knowledge and skills in physical education and sport science through discipline specific studies in sport, exercise science and health. Students complete units in areas including games and sports, skill acquisition, motor development, anatomy, kinesiology, exercise physiology, biomechanics, individual fitness activities, aquatics, and nutrition. Graduates from this course can gain careers in physical education and sport science, fitness and health and coaching. The course covers the Victorian Institute of Teaching (VIT) discipline specialist area guidelines in secondary Physical Education and secondary Health, so that graduates who complete a Master of Teaching will be qualified to teach Health and Physical Education. Students can also complete a third discipline, which could include methods such as: English, History, Mathematics, and Biology.
Course Objectives: On successful completion of this course, students will be able to:

1. Integrate knowledge and skills from the health, physical education and sport science to become a leader in their area of expertise;
2. Analyse and evaluate theoretical knowledge and technical information from physical education and sport science research to develop knowledge and understanding of professional identity and discipline specific requirements and as a basis for independent lifelong learning;
3. Evaluate and apply information to creatively solve problems related to professional practice, including developing appropriate activities for participation in physical education and sport in contemporary settings;
4. Operate as an independent and collaborative professional who can clearly and coherently communicate physical education and sport science knowledge and ideas;
5. Design evidence-based practice to deliver innovative programs in physical education and sport science;
6. Interpret a variety of physical education and sport science related issues and evaluate professional, evidence-based approaches to address the specific issues; and
7. Adapt knowledge and managerial skills to make decisions that provide inclusive, sustainable and culturally relevant outcomes to issues in physical education and sport science.

Careers: Graduates from the Bachelor of Physical Education and Sport Science can gain careers in physical education, sport science, fitness and health, exercise rehabilitation and coaching. Graduates from this course who complete postgraduate study in education (Master of Teaching) will be qualified to teach in secondary schools. The course covers all the requirements set out by the Victorian Institute of Teaching (VIT) discipline specialist area guidelines in secondary physical education and secondary health.

Course Duration: 3 years

Admission Requirements: Completion of an Australian Senior Secondary Certificate (VCE or equivalent) including Units 3 and 4: a study score of at least 25 in English (EAL) or 20 in any other English.

Admission Requirements International: Completion of an Australian Senior Secondary Certificate (VCE or equivalent) OR Completion of an Australian Diploma or Advanced Diploma (or equivalent). PLUS IELTS (or equivalent): Overall score of 6 with no band less than 6.0

Admission Requirements Mature Age: Applicants with relevant work, education and/or community experience will be considered for admission to the course.

Admission Requirements VET: Completion of a cognate (similar discipline) Australian Diploma or Advanced Diploma (or equivalent) will be granted advanced standing of a maximum 96 credit points (Diploma) or 144 credit points (Advanced Diploma). OR Completion of a non-cognate (not similar) Australian (or equivalent) Diploma or Advanced Diploma will be granted advanced standing on a case by case basis.

Selection Processes: Other Students will require a Working with Children Check and National Police Check to be eligible to undertake and participate in workplace visits, placements or projects. Use the following site links to obtain additional information: http://www.workingwithchildren.vic.gov.au/

COURSE STRUCTURE

To attain the Bachelor of Physical Education and Sport Science, students will be required to complete 288 credit points consisting of:

- 96 credit points of First Year Core units
- 144 credit points of Professional Core units
- 48 credit points of Minor studies from the approved list

First Year Core

AHE1101 Structural Kinesiology 12
AHE1202 Biomechanics 12
RBM1174 Human Physiology 12
SCL1002 Exercise Physiology 12
SCL1003 Exercise and Sport Psychology 12
SPE1002 Inclusion and Diversity in Physical Activity 12
SPE105 Aquatic and Athletic Movement Activities 12
SSM1205 Introduction to Adventure in Sport and Active Recreation 12

Professional Core

SHE1001 Nutrition and Health for Physical Education 12
AHE2127 Motor Learning 12
SHE2001 Adolescent Health 12
SHE2002 Sexuality and Relationships 12
SPE2000 Rhythmic and Expressive Movement 12
SPE2007 Minor Games 12
SPE2004 Growth and Motor Development 12
AHE3116 Social Dimensions of Sport and Exercise 12
AHE3200 Professional Ethics 12
SPE3002 Major Games 12
SPE3004 History of Sport 12
SPE3005 Perspectives On Physical Education 12

Minors

EMIMDA Media Studies (Education Minor)
AMIDIG Digital Media
AMLIT Literary Studies
AMPSY Psychology
AMHIS History
About this course: The Bachelor of Sport Science provides knowledge and skills for entry into professional careers in sport. Students complete a range of subjects across the biological sciences, social sciences and humanities to understand the science of sport and its practical application in professional contexts. Depending on interest and career goals, students can select to major in Sport Performance, which focuses on analysing and improving performance, health and participation in sport and exercise; Human Movement, which provides a holistic understanding of human movement, particularly in sport and physical activity contexts or Sport Coaching, which focuses on the development of coaching knowledge and skills through studies ranging from community-based coaching to advanced units that focus on talent identification and athlete/coach development. The Bachelor of Sport Science provides students with:

- a foundation program in first year where students take introductory level units in kinesiology, biomechanics, human physiology, exercise psychology and research methods.
- an advanced program in the second and third year consisting of a number of core units in Sport Science
- space for the completion of one academic major and space for the completion of an additional academic minor, where the student can specifically tailor their program towards areas of future professional interest.

Course Objectives: On successful completion of this course, students will be able to:
1. Integrate the biological and social scientific knowledge and professional skills that underpin professional practice in the field of sport science;
2. Critically analyse and synthesise knowledge gathered from sport science research;
3. Exercise judgement and apply knowledge to solve routine sport science problems using social, ethical, economic, regulatory and global perspectives;
4. Operate as an independent and collaborative professional who can communicate knowledge and ideas clearly and coherently;
5. Adapt legal and ethical frameworks in order to work effectively in socially and culturally diverse communities and contexts; and,
6. Continue to develop a broad and coherent body of professional practice so as to undertake postgraduate studies and research in sport science and related fields.

Careers: Graduates of the Sport Science course can find employment in:
- Sports Science;
- Strength and Conditioning Coaching;
- Health;
- Sport Coach;
- Sport Development and Community Coaching Officer;
- Sport Nutrition;
- Sport Performance;
- Sport Organisations and Governance;
- Community Sport and Health Promotion;
- Exercise and Sports Science Research.

Course Duration: 3 years

Admission Requirements: Completion of an Australian Senior Secondary Certificate (VCE or equivalent) including Units 3 and 4: a study score of at least 25 in English (EAL) or 20 in any other English.

Admission Requirements International: Completion of an Australian Senior Secondary Certificate (VCE or equivalent) or Completion of an Australian Diploma or Advanced Diploma (or equivalent) PLUS IELTS (or equivalent): Overall score of 6 with no band less than 6.0

Admission Requirements Mature Age: Applicants with relevant work, education and/or community experience will be considered for admission to the course.

Admission Requirements VET: Completion of a cognate (similar discipline) Australian Diploma or Advanced Diploma (or equivalent) will be granted advanced standing of a maximum 96 credit points (Diploma) or 144 credit points (Advanced Diploma). OR Completion of a non-cognate (not similar) Australian (or equivalent) Diploma or Advanced Diploma will be granted advanced standing on a case by case basis.

COURSE STRUCTURE

To attain the Bachelor of Sport Science, students will be required to complete 288 credit points consisting of:

- 96 credit points First Year Core units
- 48 credit points Professional Core units
- 96 credit points Major studies selected from the approved list.
- 48 credit points Minor studies selected from the approved list.

SMIAE Applied Anatomy for Exercise minor is only available to students who undertake SMASPP Sport Performance major.

First Year Core Units
- AHE1101 Structural Kinesiology 12
- AHE1105 Research Methods for Exercise Professionals 12
- AHE1107 Human Growth and Lifespan Development 12
- AHE1112 Resistance Training 12
- AHE1202 Biomechanics 12
- RBM1174 Human Physiology 12
- SCL1002 Exercise Physiology 12
The career options for students completing this course will be both extensive and professionally engaging. The following enterprises will drive the demand for jobs that require a deep understanding of planning, strategy, finances, marketing, people management, and marketing, and the application of these professional skills to (1) commercial business, (2) corporate sport, and (2) community sport and active recreational settings.

- Professional services,
- Business consulting,
- Government and the public service
- Sport governing bodies,
- Sports clubs,
- Stadia and arenas,
- Local government agencies,
- Gyms and leisure centres,
- Leisure planning and sport development units,
- Community welfare development agencies,
- Sports and leisure consultancies,
- The motor racing industry,
- The horse racing industry,
- Schools,
- Outdoor adventure camps,
State government agencies,
Adventure sport businesses,
Corporate training consultancies,
Local government community leisure units,
Health education agencies, and
Youth work programs

Course Duration: 4 years

Admission Requirements: Completion of an Australian Senior Secondary Certificate (VCE or equivalent) including Units 3 and 4: a study score of at least 25 in English (EAL) or 20 in any other English.

Admission Requirements International: Completion of an Australian Senior Secondary Certificate (VCE or equivalent). OR Completion of an Australian Diploma or Advanced Diploma (or equivalent) PLUS IELTS (or equivalent): Overall score of 6 with no band less than 6.0

Admission Requirements Mature Age: Applicants with relevant work, education and/or community experience will be considered for admission to the course.

Admission Requirements VET: Completion of a cognate (similar discipline) Australian Diploma or Advanced Diploma (or equivalent) will be granted advanced standing of a maximum 96 credit points (Diploma) or 144 credit points (Advanced Diploma). OR Completion of a non-cognate (not similar) Australian (or equivalent) Diploma or Advanced Diploma will be granted advanced standing on a case by case basis.

Selection Processes: Other Students will require a Working with Children Check and National Police Check to be eligible to undertake and participate in workplace visits, placements or projects. Use the following site links to obtain additional information:

COURSE STRUCTURE

To qualify for the awards of Bachelor of Sport Management and Bachelor of Business, students will be required to complete 384 credit points consisting of:

- 144 credit points First Year Core units
- 48 credit points Core units including International Business Challenge and Sport Management Career Development units
- 96 credit points Sport Management major from approved list
- 96 credit points Business major from approved list (includes applied business challenge unit)

Sport Management majors:
- Sport and Active Communities
- Outdoor Recreation Leadership

Business majors:
- Accounting
- Event Management
- Human Resource Management
- Marketing

First Year Core Units
BE01105 Economic Principles 12
BM01102 Management and Organisation Behaviour 12
SSM1101 Introduction to Sport and Active Recreation 12
SSM1102 Foundations of Sport and Active Recreation 12
BA01101 Accounting for Decision Making 12
BC01102 Information Systems for Business 12
BH01171 Introduction to Marketing 12
SSM1203 Human Resources for Sport and Active Recreation 12

Year 2, Semester 1
BE01106 Business Statistics 12
BL01105 Business Law 12
BPD1100 Integrated Business Challenge 12
SSM1104 Community Building for Sport and Active Recreation 12

Year 2, Semester 2
SSM2003 Ethics in Sport Management and Active Recreation 12

36 credit points (equivalent to 3 units) Sport Management specialisation units

Year 3, Semester 1
SSM2002 Career Development and Employability 1 12
12 credit points (equivalent to 1 unit) Sport Management specialisation unit
24 credit points (equivalent to 2 units) Business specialisation units

Year 3, Semester 2
12 credit points (equivalent to 1 unit) Sport Management specialisation unit
36 credit points (equivalent to 3 units) Business specialisation units

Year 4, Semester 1
24 credit points (equivalent to 2 units) Sport Management specialisation units
24 credit points (equivalent to 2 units) Business specialisation unit

Year 4, Semester 2
SSM3003 Career Development and Employability 2 12
BPD2100 International Business Challenge 12
12 credit points (equivalent to 1 unit) Sport Management specialisation unit
Course Objectives: On successful completion of this course, students will be able to:
1. Integrate conceptual understandings of strategic planning, operational management, staff development, program design, service delivery, performance evaluation, and relevant business principles, with advanced specialist knowledge and managerial know-how within the discipline of sport, exercise, and active recreation;
2. Critically analyse theoretical and technical knowledge in diverse contexts, and adapt and apply related skills to the effective management of sport, exercise and active recreation services;
3. Critically review and apply information with initiative and judgement in order to both anticipate and creatively solve problems related to the management of sport, exercise, and active recreation services in contemporary settings;
4. Exhibit professional judgement, ethical standards, and social sensitivity by adapting knowledge and managerial skills to make decisions - be it individually or collaboratively - that provide inclusive, sustainable, and culturally relevant sport, exercise, and active recreation experiences;
5. Communicate a coherent and independent exposition of industry knowledge and operational skills in both oral and written form to a range of audiences;
6. Reflect on personal learning and skills in relation to career goals with a view to implementing creative strategies to promote lifelong learning, and establishing pathways for the attainment of further professional development and vocational training;
7. Apply personal and interpersonal competencies, work group skills, and leadership abilities to the effective management of sport, exercise, and active recreation enterprises, while also accommodating the divergent and complex cultures of Australia and other regions around the world; and
8. Contribute to the organisation and delivery of sport, exercise, and active recreation programs with personal accountability, integrity, and social responsibility for outcomes, and do it through dynamic 21st Century work teams that use resources efficiently, provide high levels of participant satisfaction, and deliver widespread social utility.

Careers: Graduates from the Bachelor of Sport Management will be ready for employment in a variety of positions in a broad range of settings. Students graduating from the Sport and Active Communities major will be ideally placed to work as administrators, officers and managers in:

- Sport governing bodies,
- Sports clubs,
- Stadia and arenas,
- State government agencies that focus on physical activity policies and issues,
- Gyms and leisure centres,
- Leisure planning and sport development units within local government spaces,
- Community welfare development agencies,
- Sports and leisure consultancies,
- The motor racing industry, and
- The horse racing industry.

Students graduating from the Outdoor Recreation Leadership major will be ideally placed to work as educators, leaders, and trainers for outdoor adventure programs in:

- Schools,
- Outdoor adventure camps,
- State government agencies,
- Adventure sport businesses,
- Corporate training consultancies,
- Local government community leisure units,
- Health education agencies, and
- Youth work programs.

Course Duration: 3 years

Admission Requirements: Completion of an Australian Senior Secondary Certificate (VCE or equivalent) including Units 3 and 4 with a minimum study score of 25 in English (EAL) or 20 in any other English.

Admission Requirements International: Completion of an Australian Senior Secondary Certificate (VCE or equivalent). OR Completion of an Australian Diploma or Advanced Diploma (or equivalent) PLUS IELTS (or equivalent): Overall score of 6 with no band less than 6.0

Admission Requirements Mature Age: Applicants with relevant work, education and/or community experience will be considered for admission to the course.
Admission Requirements: Completion of a cognate (similar discipline) Australian Diploma or Advanced Diploma (or equivalent) will be granted advanced standing on a maximum of 96 credit points (Diploma) or 144 credit points (Advanced Diploma). OR Completion of a non-cognate (not similar) Australian (or equivalent) Diploma or Advanced Diploma will be granted advanced standing on a case by case basis.

Selection Processes: Other Students will require a Working with Children Check and National Police Check to be eligible to undertake and participate in workplace visits, placements or projects. Use the following site links to obtain additional information: http://www.workingwithchildren.vic.gov.au/

COURSE STRUCTURE

To attain the Bachelor of Sport Management students will be required to complete 288 credit points (equivalent to 24 units) consisting of:

- 96 credit points of First Year Core units
- 96 credit points of Major studies from the approved list
- 48 credit points of Professional Development in Sport & Outdoor Recreation Minor studies
- 48 credit points of Minor studies from the approved list.

Minors not available for students completing the Outdoor Recreation Leadership Major are:

- SMIOUT Outdoor Recreation Leadership

Minors not available for students completing the Sport and Active Communities Major are:

- SMISAC Sport and Active Communities

Graduate Diploma in Sport Business and Integrity

Course Code: SGSI
Campus: City Flinders.

About this course: The Graduate Diploma in Sport Business and Integrity addresses the dual responsibilities sport managers now have, which is to not only run leagues and associations, manage facilities, deliver events, and administer clubs at the highest professional level, but also grow the game, meet its social obligations, build communities, and use sport’s kudos and good standing to eliminate barriers to participation and reduce social disadvantage. It aims to provide a multi-disciplinary program that delivers a sound base of professional capabilities that will enable graduates to not only assemble and strategically organise resources to meet the growing needs of diverse communities, but also do it in such a way that sport’s integrity is sustained, and its public value is optimised. Students who complete the course will be able to apply for employment as sport integrity managers, community relations managers, corporate and community partnership managers, sport development managers, player agents, and sport planning managers.

Course Objectives: On successful completion of this course, students will be able to:

1. Synthesise knowledge gained from the Graduate Certificate in Sport Integrity with advanced specialist understandings of strategic management.
2. Exhibit independent judgement when balancing strategies that focus on integrity issues, social development issues, resource-use issues, and, growth and sustainability issues.
3. Critically apply legal and ethical principles to decision making processes when dealing with integrity, resource use, and social development.
4. Design, justify, and implement integrity-based strategic initiatives; involving structural, cultural and operational change that enables sporting enterprises to build and broaden sport participation at both the competitive and informal levels.
5. Advise the organisation in the delivery of quality sport experiences through dynamic 21st Century work-teams that operate within ethical frames highlighting personal accountability, social responsibility, social value, and participant satisfaction.
6. Articulate and report complex knowledge about sport integrity, strategy, and sport development issues in coherent and accessible ways to a range of specialist and non-specialist audiences.

Careers: Students who complete the course will be able to apply for positions such as sport integrity managers, community relations managers, corporate and community partnership managers, sport development managers, and sport planning managers.
Course Duration: 1 year

Admission Requirements: Successful completion of a Bachelor degree in either Sport — which includes sport studies and/or managerial and leadership units; or, Successful completion of a Bachelor degree in Business.

Admission Requirements International: In addition to satisfying the Bachelor/Bachelors Degree or Mature Age admission requirements, International Students must provide evidence of proficiency in the English language as demonstrated by: International English Language Testing System or its equivalent - overall score of 6.5 and no individual band score less than 6.

Admission Requirements Mature Age: In the absence of a Bachelor/Bachelors Degree, a minimum of 10 year’s experience as a sport professional / manager.

COURSE STRUCTURE

To attain the Graduate Diploma in Sport Business and Integrity, students will be required to complete 96 credit points (equivalent to 8 units) consisting of:

Bachelor of Sport and Exercise Science (Honours)

Course Code: SHSP
Campus: Footscray Park.

About this course: The Bachelor of Sport and Exercise Science (Honours) program provides a course of advanced study which builds on and extends knowledge gained in relevant undergraduate degrees in sport and exercise science related disciplines. It provides students with the research experience, advanced analytical skills and theoretical background necessary to undertake professional work and as a pathway for research (Masters or PhD) and further learning.

Course Objectives: On successful completion of this course, students will be able to:

1. Synthesise coherent and advanced knowledge of the underlying principles and concepts in one or more disciplines in sport and exercise science and knowledge of research principles and methods;
2. Hypothesise, propose and execute a piece of research and scholarship in sport and exercise science with some independence;
3. Review, evaluate, consolidate and synthesise knowledge to devise solutions to complex problems in research;
4. Exercise critical thinking and judgement in constructing new understanding in sport and exercise science;
5. Implement technical skills to design, plan, and use research knowledge in a project in sport and exercise science;
6. Adapt knowledge and skills to reflect on personal development in research and scholarship.

Careers: Research (Masters or PhD) Professional work in sport and exercise

Course Duration: 1 year

Admission Requirements International: To qualify for admission to the course, applicants must have successfully completed an undergraduate degree in a sport and/or exercise related discipline. An applicant will usually have attained a Credit (C) average and a Distinction (D) in units of study related to the intended discipline of Honours study. Entry into the Honours course will normally occur not more than two years after the completion of the first degree.

Admission Requirements Mature Age: To qualify for admission to the course, applicants must have successfully completed an undergraduate degree in a sport and/or exercise related discipline. An applicant will usually have attained a Credit (C) average and a Distinction (D) in units of study related to the intended discipline of Honours study. Entry into the Honours course will normally occur not more than two years after the completion of the first degree.

Selection Processes: Other/In consultation with the honours coordinator.

COURSE STRUCTURE

To attain the Bachelor of Sport and Exercise Science (Honours), students will be required to complete 96 credit points (equivalent to 3 units) consisting of:

- 48 credit points (equivalent to 2 Units) of Core studies
- 48 credit points (equivalent to 1 Unit) of Thesis studies

Master of Sports Science (Football Performance)

Course Code: SMOB
Campus: Footscray Park.

About this course: The football industry continues to grow through the development of professional leagues and increasing participation at all levels, leading to increased demand for improved performance by players, and better player management. In response, sport organizations now seek professionals and specialists with high-level skills in sports science, coaching and talent management. Developed on the needs of industry and the demand for expert graduates with a holistic education in the field of football science, the course leverages on knowledge from areas of sport science, coaching, strength and conditioning and management, to provide students with a rounded education in the sport sciences as applied to different football codes.

Course Objectives: On successful completion of this course, students will be able to:

1. Contextualise knowledge and theory with expertise from different sport-related
disciplines to shape innovative practice in football science and performance; 2. Advise specialist and non-specialist stakeholders exhibiting a variety of interpersonal skills to communicate effectively in an environment with competing pressures, priorities and power dynamics; 3. Devise and implement a substantial research based project or evidence-based capstone task which exhibits evidence of independent thought in the field of football science; 4. Analyse and evaluate current issues in sport to exemplify and guide ethical behaviour and integrity within diverse national and international contexts; 5. Formulate and implement plans, in response to contemporary and future sports/football challenges and evaluate outcomes adoption and improvement; 6. Exemplify initiative and leadership in the application of the principles of football management in national and international contexts, utilising strategic thinking / planning, personal and interpersonal competencies and work-group skills.

**Careers:** Graduates from the Master of Sports Science (Football Performance) may be employed in the following roles:

- Director of Sports Science
- High Performance manager
- Head of Strength and Conditioning

**Course Duration:** 1.5 years

**Admission Requirements:** Completion of a cognate (similar discipline) Bachelor/Honours Degree; OR Completion of a non-cognate (any discipline) Bachelor/Honours Degree and four years full-time work experience post-graduation as approved by the College.

**Admission Requirements: Mature Age:** Completion of a cognate (similar discipline) Graduate Certificate/Graduate Diploma; OR In the absence of a Bachelor/Honours Degree, 7 years full-time work experience post-graduation as approved by the College.

**COURSE STRUCTURE**

To attain the Master of Sports Science (Football Performance), students will be required to complete 144 credit points (equivalent to 12 units) consisting of:

- 96 credit points (equivalent to 8 units) core units
- 12 credit points (equivalent to 1 unit) elective unit. Students to select from the elective options provided. Please check any prerequisite requirements prior to enrolling.
- 36 credit points (equivalent to 2 units) comprising either:

**OPTION 1** Major research project (Minor Thesis unit) **OPTION 2** Capstone task (Applied Research Project unit)

**Year 1, Semester 1**

- SFS7011 Current Issues and Trends in Football 12
- SFS7012 Sport Integrity and Ethics 12
- SFS7015 Monitoring Load and Recovery in Football 12
- SFS7010 Applied Sports Statistics 12

**Year 2, Semester 1**

- SFS7011 Enhancing Muscular Performance 12
- SFS7012 Sports Analytics 12
- SFS7014 Developing Talented Players 12
- SFS7016 Learning to Lead People in High Performance Teams 12

**Year 2, Semester 2**

- SFS7011 Minor Thesis 36
- SFS7013 Applied Research Project 36
- SFS7008 Industry Internship 12
- SFS7016 Performance Analysis in Football 12

**About this course:** The Master of Sport Business and Integrity addresses the pressures that contemporary sport managers face when having to deal with their core obligations, which are to, implement sport programs that are financially and operationally sustainable, deliver them in such a way that they provide value for money experiences for participants, and lead to socially responsible outcomes, and, finally, ensure they are underpinned by values that privilege trustworthiness, fair play, transparency, and integrity. The Master of Sport Business and Integrity will combine cutting-edge theory with intensive case analysis, teach best-practice strategic management, and give students the opportunity to undertake professional-level research that can lead to postgraduate level studies. As such, the course will deliver a unique set of professional capabilities that will enable graduates to maximise not only their management capabilities, but also sports’ public value. Students who complete the course will be able to apply for employment as senior managers in sport enterprises. They will be especially suited to high-level positions in facility and event planning, player welfare, sport development, policy development and strategic planning. This course includes a set of two units, SSI7002 Sport Facility and Event Management & SSI7003 Global Sport Business, offering a two week study abroad experience in Madrid, Spain which “lifts and shifts” the classroom from the VU home campus to Real Madrid and includes guest speakers. The cost is included in the unit fees and covers standard airfare, accommodation and a meal plan. Students wishing to upgrade or deviate from the set plan are responsible for the additional costs. Mid-year enrolments are not eligible to do the study tour in their first semester.
**Course Objectives:** On successful completion of this course, students will be able to:

1. Synthesise conceptual understandings of strategic management with advanced specialist knowledge in the field of sport integrity.
2. Evaluate the nature of illegal, corrupt, and anti-social conduct in sport, and how it threatens the credibility and integrity of sport.
3. Critically apply legal and ethical principles to decision making processes when dealing with problematic issues in sport.
4. Design, justify, and implement strategic initiatives - involving structural, cultural and operational change - that enables sporting enterprises to implement policies and practices that grow the sport by placing integrity in the forefront.
5. Creatively utilise cross-disciplinary knowledge and high quality sport research to build partnerships, attract resources, and build systems for attracting diverse groups of participants.

**Careers:** Graduates of the Master of Sport Business and Integrity will be suited to a range of management and leadership roles in Sport Business. Professional capabilities in sport integrity, sport partnerships, sport media and communication and sport facility and event management are examples that will enable graduates to maximise their management and leadership capabilities but add to sports' public value. International agencies, national, local government and private as well as the non-profit sectors will be attracted to these graduates. Graduates will be qualified to apply for positions as chief executive officers of professional sporting clubs, general managers of state and national governing bodies, community development managers, player welfare managers, resource planning directors, team managers, public relations and corporate affairs managers, sport venue managers, sport project managers, sport event managers, and media managers.

**Course Duration:** 1.5 years

**Admission Requirements:** Successful completion of a Bachelor degree in Sport that includes studies in management and leadership or Successful completion of a Bachelor degree in Business, or Successful completion of a Graduate Certificate in Sport Integrity or Successful completion of a Graduate Diploma in Sport Business and Integrity.

**Admission Requirements International:** In addition to satisfying the Bachelor/Honours Degree or Mature Age admission requirements, International Students must provide evidence of proficiency in the English language as demonstrated by International English Language Testing System or its equivalent - overall score of 6.5 and no individual band score less than 6.

**Admission Requirements Mature Age:** In the absence of a Bachelor/Honours Degree, a minimum of 10 years' experience as a sport professional / manager.

**Selection Processes:** Other International students must be eligible for an additional visa to undertake the Real Madrid study tour.

**COURSE STRUCTURE**

To attain the Master of Sport Business and Integrity, students will be required to complete 288 credit points (equivalent to 24 units) consisting of:

- 120 credit points (equivalent to 10 units) core units

Plus either / or **OPTION 1**

- 12 credit points (equivalent to 1 unit) sport business project unit; and,

Option 2

- 24 credit points (equivalent to 2 units) thesis unit.

**OPTION 2**

**Year 1, Semester 1**

**Graduate Certificate in Sports Science (Football Performance)**

**Course Code:** STFB  

**Campus:** Footscray Park.

**About this course:** The football industry continues to grow through the development of professional leagues and increasing participation at all levels, leading to increased demand for improved performance by players, and better player management. In
response, sport organisations now seek professionals and specialists with high-level 
skills in sports science, coaching and talent management. Developed on the needs of 
industry and the demand for expert graduates with a holistic education in the field of 
football science, the course leverages on knowledge from areas of sport science, 
coaching, strength and conditioning and management, to provide students with a 
rounded education in the sport sciences as applied to different football codes.

Course Objectives: On successful completion of this course, students will be able to:
1. Contextualise knowledge and theory in relation to current issues in sport, using 
expertise from different sport related disciplines to shape innovative practice in 
football science and performance; 2. Articulate the complexities of sport integrity 
issues in general and responsible behaviour in particular, to a range of audiences;
3. Analyse and evaluate current issues in sport to exemplify and guide ethical 
behaviour and integrity within diverse national and international contexts; 4. Formulate and present in response to contemporary and future sports/football 
challenges and evaluate outcomes to adapt and improve performance; and, 5. Analyse and critique contemporary perspectives related to applied research in sports 
science.

Careers: Graduates from the Graduate Certificate of Sports Science (Football Performance) may be employed in the following roles:
- Sports Scientist
- Performance Analyst
- Strength and Conditioning Coach

Course Duration: 0.5 years

Admission Requirements: Successful completion of a Bachelor Degree in an area related to Sport and Exercise Science/Human Movement.

Admission Requirements Mature Age: In the absence of a Bachelor/Honours Degree, 7 years full-time work experience including at least 3 of the 7 years gained while working in a dedicated supervisory/management role in a related field as approved by the College.

COURSE STRUCTURE
To attain the Graduate Certificate in Sports Science (Football Performance), students will be required to complete 48 credit points (equivalent to 4 units) consisting of:
- 48 credit points (equivalent to 4 units) of core units.

Year 1, Semester 1
- SFS6001 Current Issues and Trends in Football 12
- SFS6002 Sport Integrity and Ethics 12
- SFS6005 Monitoring Load and Recovery in Football 12
- SFS7010 Applied Sports Statistics 12

Graduate Certificate in Performance Analysis (Football)
Course Code: STPA
Campus: Online.

About this course: Professional and semi-professional football clubs are constantly seeking a competitive advantage that can contribute to success. Among the different areas that have been identified as being able to provide such competitive advantage, performance analysis — and in particular video analysis — is seen as fundamental. Clubs at all level are seeking experienced performance analysts who not only have outstanding knowledge of the relevant technology, but also an overall understanding of performance and sport science, making performance analysis truly integrated with other established disciplines and roles. This course will provide students with the theoretical knowledge and practical skills to be successful performance analyst. The course features an initial face-to-face burst mode, online learning, and practical session in collaboration with one of the world’s leading performance analysis companies.

Course Objectives: On successful completion of this course, students will be able to:
1. Contextualise knowledge and theory in relation to current issues in sport, using expertise from different sport related disciplines to shape innovative practice in football science and performance; 2. Analyse and evaluate current issues in sport to exemplify and guide ethical behaviour and integrity within diverse national and international contexts; 3. Formulate and present in response to contemporary and future sports/football challenges and evaluate outcomes to adapt and improve performance; 4. Analyse and critique contemporary perspectives and theories related to research in the field of Sport and in particular Football; and, 5. Implement an industry recognised best practice analysis program to exhibit fundamental video analysis skills in the football codes.

Careers:
- Sport Scientist
- Performance Analyst

Course Duration: 0.5 years

Admission Requirements: Completion of an Australian Bachelor degree (or equivalent) in Sport Science, Sport Coaching or similar. OR Completion of an Australian Bachelor Honours degree (or equivalent) in Sport Science, Sport Coaching or similar.

Admission Requirements Mature Age: In the absence of a Bachelor/Honours Degree, 7 years full-time work experience including at least 3 of the 7 years gained while working in a dedicated supervisory/management role in a related field.

COURSE STRUCTURE
To attain the Graduate Certificate in Performance Analysis in Football, students will be required to complete 48 credit points consisting of:
- 48 credit points professional core units

SFS6001 Current Issues and Trends in Football 12
SFS6005 Monitoring Load and Recovery in Football 12
SFS7010 Applied Sports Statistics 12
SFS7016 Performance Analysis in Football 12
Graduate Certificate in Sport Integrity

Course Code: STSI
Campus: City Flinders.

About this course: The Graduate Certificate in Sport Integrity addresses the continuing concern about sport’s capacity to act on the positive social values it has traditionally upheld. It has four aims. First, it will educate participants about the global scale and scope of illegal, corrupt, and anti-social conduct in sport. Second, it will give participants an ethical framework for interrogating the causes and consequences of these practices, and the harms they impose on both stakeholders and the broader community. Third, it will give participants the knowledge, competencies and skills to effectively manage threats to a sport’s integrity. Fourth, it will enable participants to build sporting cultures that place credibility, good standing, and integrity front and centre. Graduates from the course will be able to apply for positions as community development officers, integrity officers, player relations officers, and stakeholder relations officers.

Course Objectives: On successful completion of this course, students will be able to:
1. Integrate conceptual understandings of strategic management with advanced specialist knowledge in the field of sport integrity and ethics;
2. Utilise cross-disciplinary knowledge to analyse the scale and scope of illegal, corrupt, and anti-social conduct in sport;
3. Evaluate the nature of illegal, corrupt, and anti-social conduct in sport, and how it threatens the credibility and integrity of sport;
4. Exemplify independent judgement when interrogating the causes and consequences of these practices;
5. Exhibit the application of legal and ethical principles to decision making processes when dealing with integrity issues in sport;
6. Design and justify strategic initiatives involving structural, cultural, and operational change enabling sporting enterprises to adopt practices which focus on integrity and use it as a tool for creating additional public value;
7. Contribute to the organisation and delivery of quality sport experiences through dynamic 21st Century work teams that operate within ethical frames that highlight personal accountability, social responsibility, participant satisfaction, and public value;
8. Communicate complex knowledge about sport integrity issues in general and responsible social behaviour in particular, in coherent and accessible ways to a range of specialists and non-specialist audiences.

Careers: Graduates of courses in the Master of Sport Business and Integrity will be suited to a range of management and leadership roles. Professional capabilities in sport integrity, sport partnerships, sport media and communication and sport facility and event management are examples that will enable graduates to maximise not only their management and leadership capabilities but also their sports’ public value. The international, national and state private, government and non-profit sectors would be attracted to these graduates, in particular professional sport governing bodies and teams, major sport events and facilities, the sporting goods industry, government departments and the fitness industry. Graduates of this course may apply for positions such as community development officers, integrity officers, player relations officers, player welfare officers, player agents, and stakeholder relations officers.

Course Duration: 0.5 years

Admission Requirements: Successful completion of a Bachelor degree in either Sport — which includes sport studies and/or managerial and leadership units; or, Successful completion of a Bachelor degree in Business.

Admission Requirements Mature Age: In the absence of a Bachelor/Honours Degree, a minimum of 10 years experience as a sport professional/manager.

COURSE STRUCTURE

To attain the Graduate Certificate in Sport Integrity, students will be required to complete 48 credit points (equivalent to 4 units) consisting of:
- 48 credit points (equivalent to 4 units) of core units.

SMAHUM Human Movement

Locations: Footscray Park

The Human Movement major draws on a combination of social science and practical units to provide students with the foundation knowledge and skills to understand sport, exercise, health, and the body. This major is grounded in the holistic traditions of understanding human movement from a variety of critical perspectives and allows the articulation into one of several diverse minors. The human movement major will be especially exciting for students who enjoy a combination of theoretical, conceptual and hands on learning activities.

- SPE2000 Rhythmic and Expressive Movement 12
- SPE2001 Major and Minor Games 12
- SPE2002 Games and Sports 12
- SSM2002 Career Development and Employability 1 12
- AHE3111 Sport and Social Analysis 12
- AHE3116 Social Dimensions of Sport and Exercise 12
- SPE3004 History of Sport 12
- SPE3100 Psychosocial Aspects of Health and Physical Activity 12

SMAOUT Outdoor Recreation Leadership

Locations: Footscray Park

The Outdoor Recreation Leadership Major exposes students to a diverse range of outdoor recreational programs that not only deliver special experiences, but also provides unique learning situations that build a breadth of capabilities, including the capacity to plan, organise, and program complex outdoor recreational activities at the highest professional level. It also provides the opportunity for students to build highly valued character traits including integrity, cultural sensitivity, and psychological resilience. The course will enable students to gain employment in the fields of outdoor recreation, adventure sports, outdoor education, and corporate training.

- SSM2001 Theory and Instruction of River Craft 12
- SSM2102 Foundations of Outdoor Education and Adventure Sports 12
- SSM2201 Bushwalking Leadership 12
- SSM2202 Safety in the Outdoors 12
- SSM3001 Expedition Leadership 12
- SSM3002 Outdoor and Environmental Philosophy 12
- SSM3101 Environmental Inquiry, Sustainability and Communities 12
**SMAPES Physical Education and Sport**  
*Locations: Footscray Park*
This major supplements the college major (nutrition, biomechanics, psychology and kinesiology) and professional core to complete the necessary physical education units as required by the Victorian Institute of Teaching. This major equips students with knowledge and skills in physical education and sport science through discipline-specific studies in sport and exercise science. Students complete units in areas including: games and sports, skill acquisition, motor development, human and exercise physiology, adapted movement, aquatics and athletics. Two capstone units are used to provide students with opportunities to integrate the knowledge and skills accumulated across their course. The physical education and sport major in conjunction with the coaching professional core represents the requisite studies for prospective physical educators preparing to enter a Master of Teaching.

**SMASCO Sport Coaching**  
*Locations: Footscray Park*
The Sport Coaching major is made up of eight units that focus on the development of students coaching knowledge and skills enabling them to work at all levels of sport participation from community, school, state, national, international and professional sport settings. Students will develop a sophisticated understanding of coaching practice through studies ranging from community-based coaching to advanced units that focus on talent identification and athlete/coach development. By completing this major, students will have both a deep understanding of coaching theory and a range of practical coaching skills highly sought after in the sport workforce in roles such as sport coach and sport development officer/manager.

**SMASAC Sport and Active Communities**  
*Locations: Footscray Park*
The Sport and Active Communities Major gives attention to community sport, its relationship with elite and professional sport, and how it can be managed to optimise participant satisfaction, build sustainable communities, and deliver social utility. It also covers team-sport management, gym and exercise program administration, and community-based physical activity programming. The course thus enables graduates to enter a broad range of administrative, management, and professional-support positions in governing bodies, sport clubs, sport facilities, sport events, local government, and community welfare agencies.

**SMASPP Sport Performance**  
*Locations: Footscray Park*
The Sport Performance major is made up of eight units that are organised around a theme of analysing and improving performance, health and participation in sport and physical activity contexts. Students will develop their understanding of performance through studies in sport sciences including biomechanics, kinesiology, physiology, sociology, and motor control. By completing this major, students are prepared for progressing on to honours/postgraduate study in areas informed by the biological sciences.

AHE3126 Motor Control 12

SMIAAE Applied Anatomy for Exercise
Locations: Footscray Park, St Albans
In this minor students develop knowledge and skills in regional anatomy and its application to exercise and sport science. Students will undertake studies in functional anatomy, training and conditioning and exercise prescription. This minor may provide support for further study in allied health areas such as physiotherapy and osteopathy.

RM1100 Functional Anatomy of the Trunk 12
RM1200 Functional Anatomy of the Limbs 12
SCL3003 Corrective Exercise Prescription and Injury Management 12
SCL3101 Advanced Training and Conditioning 12

SMIABK Advanced Biomechanics and Kinesiology
Locations: Footscray Park
Students develop advanced knowledge and skills in various disciplines of sport science, especially focused on the biomechanical and kinesiological analysis of movement. By completing this minor in combination with the core units in a course, students can improve their chances of entry into honours and postgraduate courses associated with the sport science disciplines.

AHE2102 Sports Biomechanics 12
AHE2202 Functional Kinesiology 12
AHE3101 Advanced Biomechanics 12
AHE3126 Motor Control 12

SMIAPR Advanced Physiology and Prescription
Locations: Footscray Park
This minor is available to students completing sport and exercise related courses (ABHF and ABHG). Students develop knowledge and skills in fitness and conditioning, resistance training and exercise prescription outside of their specialisation in exercise and sport science. By completing this minor in combination with the core units in your course, students can apply for accreditation as an exercise instructor (gym instructor) and personal trainer with Physical Activity Australia.

AHE3100 Advanced Exercise Physiology 12
AHE3114 Sport Physiology 12
SCL3003 Corrective Exercise Prescription and Injury Management 12

SMIFIP Fitness Programming
Locations: Footscray Park
This unit set is designed to develop theoretical knowledge and technical skills in assessing and applying fitness strategies and approaches. An understanding of how engagement and adherence in physical activity can be fostered through planning, developing and delivering different types of fitness activities, will be applied to practice. Students will develop their knowledge and skills through exploration of a range of fitness activities such as choreographed and non-choreographed exercise to music activities, cross training, kettlebell TRX, plyometrics, bootcamp, aqua aerobics, mind and body, cycle, boxing, and circuits, with an orientation towards developing functional movement outcomes for clients.

SCL1001 Personal Training 12
SR2000 Group Fitness 12
SR2001 Fitness Training Systems 12
SR3000 Fitness Training for all Populations 12

SMIFIT Fitness and Conditioning
Locations: Footscray Park
This minor is available to students completing sport and exercise science related courses (ABHF and ABHG). Students develop knowledge and skills in fitness and conditioning, resistance training and exercise prescription outside of their specialisation in exercise and sport science. By completing this minor in combination with the core units in your course, students can apply for accreditation as an exercise instructor (gym instructor) and personal trainer with Physical Activity Australia.

SCL1001 Personal Training 12
AHE2129 Advanced Resistance Training 12
SR2000 Group Fitness 12
SR2001 Fitness Training Systems 12

SMIGAM Games and Sports
Locations: Footscray Park
This minor is for students wanting to actively participate in practical units in the area of physical activity. Students will undertake practical classes where they will instruct others, improve their own performances, learn new skills and be able to plan and prepare activities for a range of individuals and groups.

AHE2006 Exercise Interventions for Healthy Populations 12
AHE3219 Adapted Physical Education 12
SPE2000 Rhythmic and Expressive Movement 12
SPE2001 Major and Minor Games 12
SPE2200 Games and Sports 12
SMIHEA Health (Sport Science Minor)
Locations: Footscray Park
Being healthy is important to all of us. Our health is influenced by a range of individual and behavioural factors as well as physical and social environments. Studying health will help you to develop skills and knowledge to make decisions about your own health, inform others, and also to recognize the importance of health in society. You will also become aware of how to support and promote healthy behaviours of others. The minor in Health provides you with an understanding of the individual and societal influences on health and human development. You will study areas covering adolescent health, sexuality and relationships, social bases of health and health promotion and policy.

SSM3005 The International Olympic Movement 12

SMIOUT Outdoor Recreation Leadership
Locations: Footscray Park, St Albans
Love being outdoors, and looking for an adventure? If you want to learn about adventure with highly qualified outdoor professionals through hands on experiences in rock climbing, white water rafting, hiking, and skiing as well as develop an in-depth understanding about outdoor recreation, education and adventure sports, then Outdoor Recreation Leadership is for you. The use of industry partnerships and critical evidence based practice to inform teaching will ensure that during the course you will learn all the skills needed to lead in the outdoors. Outdoor Recreation Leadership provides the opportunity for students to build highly valued character traits including communication, group leading, integrity, cultural sensitivity, and psychological resilience.

SSM2102 Foundations of Outdoor Education and Adventure Sports 12
SSM2201 Bushwalking Leadership 12
SSM3101 Environmental Inquiry, Sustainability and Communities 12
SSM2202 Safety in the Outdoors 12

SMIPDS Professional Development in Sport and Outdoor Recreation
Locations: Footscray Park
The required minor provides students opportunities for professional development and offers the opportunities to learn and apply their knowledge and skills in making informed decisions on the basis of ethics, sustainability, and social responsibility. The Minor will have a distinctive appeal to students with an interest in ethics, diverse and sustainable sports provision, and building vibrant communities through sport and recreation.

SSM2002 Career Development and Employability 1 12
SSM2003 Ethics in Sport Management and Active Recreation 12
SSM3000 Inclusion and Social Responsibility in Sport and Active Recreation 12
SSM3003 Career Development and Employability 2 12

SMIPEP Physical Education (Primary)
Locations: Footscray Park
Physical Education (Primary) provides you with knowledge and skills to enable participation and performance in movement and physical activities appropriate for children. You will undertake studies in Human Movement, including growth and movement development and skill acquisition and in skill activity areas including minor and major games, ball handling, fundamental motor skills, and rhythmic and expressive movement. You will develop skills to support movement competence and confidence such as fundamental movement skills, movement strategies, creatively sequencing different movements, and performing more complicated movement patterns as a foundation for lifelong physical activity participation and performance. Movement is central to physical education and you will engage in practical movement activities to support your learning.

AHE1106 Exercise Psychology

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit aims to develop an integrated understanding of why people do or do not exercise, the physical and psychological consequences of such behaviours and the challenge exercise psychologists and health professionals in general face when working with individuals in an exercise/sport setting. The unit also focuses on how people can be motivated to exercise and be physically active, and investigates psychological barriers to exercise. Further, the unit covers some of the possible adverse health effects associated with excessive exercise behaviour including burnout and eating disorders.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Analyse antecedents, correlates, and consequences of exercise behaviour; 2. Evaluate the exercise behaviour of individuals by applying basic psychological theories; 3. Articulate the physical and psychological benefits of exercise and physical activity; 4. Review the psychological needs for exercise in various special populations; and 5. Integrate skills and knowledge learned from the study of exercise psychology into (simulated) counselling experiences.

Class Contact: Lecture 1.5 hrs Tutorial 1.0 hr

Assessment: Examination, Multiple-choice test, 20%. Project, Report on Interview, 30%. Examination, End-semester short answer, short essay and problem solving questions, 50%.

AHE1206 Sport Psychology

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit provides a grounding in a broad range of sport psychology themes by introducing students to concepts, theories, measurement techniques, and research in the field of sport psychology. The purpose is to learn about the effects of mental processes on sport performance and sport behaviour. Students are introduced to individual differences in sport behaviour; the role of personality in sport participation; the role of motivation in sport participation and performance; the role of arousal and anxiety in sport performance; and the influence of interpersonal and group interactions on sport performance.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Contrast and explain the fundamentals of the main schools of psychology; 2. Evaluate theoretical perspectives in sport psychology; 3. Investigate how psychological interventions including goal setting, anxiety management, attention and imagery relate to performance in sport; 4. Explore how social psychology affects leadership, attributions, team dynamics and aggression in sport; 5. Explain the fundamental characteristics of experimental design and implementation in sport psychology; and 6. Engage in a hands-on experience of how sport psychologists carry out experiments and research.

Class Contact: Lecture 1.5 hrs Tutorial 1.0 hr

Required Reading: Selected readings will be made available via the unit VU Collaborate site.

Assessment: Test, Mid-semester (before wk 6), 20%. Laboratory Work, Practical investigation experiment (tutorial quizzes), 40%. Report, Reflective Workbooks, 20%. Examination, Final exam, 20%.

AHE1251 Coaching Active Communities

Locations: Footscray Park.

Prerequisites: Nil.

Description: Community sports coaches play a critical role in providing opportunities for sport participants to develop motor skills, physical health, and psychosocial skills. In particular, the community sports coach can have a significant impact on participants' enjoyment of sport. Furthermore, the contemporary epidemic of inactivity and obesity in Australia means there is potential for community sports coaches to have a significant impact in this area in the future. This unit enables students to gain knowledge and experience working as a community sports coach. Students also gain skills in how to work with volunteers, parents, other coaches, and sporting clubs/organisations.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Conceptualise the role of community sports coaches, and the significance of community sport programs in Australian society; 2. Adapt and work with diverse populations and groups including children and adolescents, as well as parents, officials, volunteers, fellow coaches, sporting clubs and organisations, stakeholders, and the community; 3. Plan and deliver sport training programs that focus on basic skill development, psychosocial development, physical activity, and enjoyment; and 4. Evaluate their own and others' sport coaching performance.

Class Contact: Lecture 1.0 hr Tutorial 1.5 hrs Includes 2 experiential sport coaching sessions in the community.

Required Reading: Selected readings will be made available via the unit VU Collaborate site.

AHE2000 Clinical Biomechanics

Locations: Footscray Park.

Prerequisites: AHE1202 - Biomechanics

Description: This unit investigates the biomechanics concepts and theories used to evaluate normal and pathological movement. The practical part of the unit provides students with useful experience in applying biomechanical techniques, measurement and assessment of human movement (mostly gait). This applied learning is used to assess unhealthy movement function and the prescription and evaluation of treatment methods.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Utilise biomechanics principles, concepts and theory and relate them to the context of common movement tasks in normal and pathological conditions; 2. Describe the phases of the gait cycle using kinesiology, kinematics and kinetics principles, concepts and theories; 3. Analyse and evaluate gait data and synthesise the evidence in a service report to a client; 4. Evaluate the benefits and limitations associated with different measurement equipment used in biomechanics; and 5. Contrast differences between two running conditions utilising biomechanical theory.

Class Contact: Lab 2.0 hrs Lecture 2.0 hrs

Assessment: Test, Ten online quizzes throughout semester multiple choice, 25%.
AHE2002 Clinical Exercise Studies 1  
**Locations:** Footscray Park.  
**Prerequisites:** Nil.  
**Description:** In this unit, students are introduced to the field of clinical exercise therapy. The unit deals with professional and ethical issues such as: the role and limits of clinical exercise practitioners (including the Australian Association for Exercise and Sports Science (AAESS) Code of Ethics); the roles of other health professionals in chronic disease management; and the scope of practice available to clinical exercise practitioners within the two broad categories of chronic disease management (rehabilitation and prevention) and functional conditioning (incorporating both conditioning and conditioning for daily living). The therapeutic and preventive value of exercise and physical activity is assessed for people living with, or at risk of, chronic diseases, injuries or disabilities. Students are introduced to key concepts of clinical epidemiology and are guided to uncover evidence bases concerning the benefits of exercise for people living with cardiopulmonary, metabolic, musculoskeletal and neurological pathologies.  
**Credit Points:** 12  
**Learning Outcomes:** On successful completion of this unit, students will be able to:  
1. Distinguish the scopes and limitations of professional roles available to clinical exercise practitioners;  
2. Investigate the wide range of chronic diseases, specifically the core populations as identified by Exercise and Sport Science Australia (ESSA) and critically analyse their relationship to current lifestyle, including inactivity, nutrition and other lifestyle decisions;  
3. Use initiative to investigate the risk categories of the current lifestyle diseases and apply professional judgment to select appropriate testing, monitoring and exercise prescription protocols including the industry scope of practice;  
4. Critically analyse factors that lead to short and long term participation (adherence) in exercise and physical activity programs; and  
5. Investigate the core ethical and practitioner behaviour issues concerning clinical exercise practice.  
**Class Contact:** Lecture: 2 hours per week; Lab: 2 hours every fortnight.  
**Required Reading:** Haywood VH 2010, 6th edn Advanced fitness assessment and exercise prescription Human Kinetics Champaign, IL ACSM 2014, 9th ed ACSM's guidelines for exercise testing and prescription.  
**Assessment:** Examination, Mid-semester exam - multiple choice questions and short answer questions, 25%; Examination, Clinical Readiness Skills Examination, 25%; Assignment, Case-based study, 25%; Examination, Final examination - clinical skills, 25%; Hurdle: To gain an overall pass in this unit students must successfully pass the Clinical Readiness Skills Examination Total effective word limit 3000 words.  

AHE2005 Nutrition and Diet for Exercise and Physical Education  
**Locations:** Footscray Park.  
**Prerequisites:** Nil.  
**Description:** This unit provides an introduction to nutrition for health, exercise and sport performance. It enables students to understand the roles of the main nutrient groups, as well as various vitamins, minerals and nutritional supplements and ergogenic aids for the promotion of healthy living, prevention of chronic lifestyle-related diseases and enhancement of exercise and sport performance and recovery. Students study the influences of various diets and eating patterns on conditions such as overweight/obesity, and a diverse range of lifestyle disease. Students will understand the interrelationships between nutrition and exercise in terms of energy balance, disordered eating and body composition assessment methods.  
**Credit Points:** 12  
**Learning Outcomes:** On successful completion of this unit, students will be able to:  
1. Articulate the scopes of practice of exercise and sport scientists, nutritionists and dietitians in Australia with regards to nutrition;  
2. Analyse and evaluate food and nutrient intakes for health and wellness throughout the lifespan, including regulation of body mass and composition, and sport and exercise performance enhancement;  
3. Analyse and discuss nutrition information derived from both popular media sources and scientific research (peer-reviewed journal articles);  
4. Demonstrate assessment of food and nutrient intake using common methods, and interpret results; and  
5. Appraise topical and recurring trends and practices in nutrition.  
**Class Contact:** Lecture 1.0 hr Tutorial 1.5 hrs  
**Required Reading:** Selected readings will be made available via the unit VU Collaborate site.  
**Assessment:** Project, A self-investigation of food and nutrient intake, 10%.  
**Description:** This unit discusses the design and delivery of exercise and physical activity services for apparently healthy individuals, including athletes. Students develop an understanding of client-focused exercise delivery, and the challenges of behaviour change that are often needed for long-term participation in exercise and physical activity. The unit investigates how variables including the client’s history of exercise, physical activity and injury, the client’s goals, likes and dislikes, barriers and opportunities (e.g. sociocultural, socioeconomic factors, socio-psychological), and the client’s current exercise and functional capacities affect program prescription and uptake. Students learn the importance of professional ethics (including the Exercise and Sports Science (AAESS) Code of Ethics); the roles of other health professionals in chronic disease management; and the scope of practice available to clinical exercise practitioners.  
**Credit Points:** 12  
**Learning Outcomes:** On successful completion of this unit, students will be able to:  
1. Apply understanding to conduct pre-participation screening and risk stratification;  
2. Devise appropriate exercise interventions that take account of clients’ goals, physical activity preferences, barriers and motives for physical activity;  
3. Select and conduct exercise assessment methods and procedures that are appropriate to clients and monitor clients’ signs and symptoms during physical activity;  
4. Select and apply safe, client-centred exercise limits and appropriate and effective intensity ranges for physical activity and exercise;  
5. Design, implement and assess exercise and physical activity interventions that address the variables of mode, intensity, duration, frequency, volume and progression of exercise; and  
6. Communicate all of the above to clients and other exercise and health practitioners in appropriate language for each situation.
Lecture 2.0 hrs Tutorial 3.0 hrs
Lecture: 12 x 2 hrs
Tutorial: 3 x 1 hr

On successful completion of this unit, students will be able to:

1. Clarify the role of sports biomechanics and recognise and distinguish its relationship with complementary roles;
2. Employ professional judgement to apply appropriate methods to set up, record, analyse and interpret sports skills;
3. Scrutinise and assess the athletic performance of skills by applying biomechanical principles to provide servicing for the enhancement of technique;
4. In collaboration with others, demonstrate responsibility and accountability for own learning and professional practice; and
5. Present a clear coherent and independent exposition of knowledge and ideas to differentiated audiences (specifically sporting and scientific).

AHE2102 Sports Biomechanics

Locations: Footscray Park, External sporting organisations as advised by lecturer or organised by students.

Prerequisites: AHE2102 - Biomechanics; NEF1102 - Engineering Physics 1 Either / Or

Description: In this unit, students further develop the analytical skills learned in first year biomechanics and apply these skills to real-world sporting applications. Using qualitative and quantitative biomechanical analysis skills, cameras and analysis software, biomechanical principles are used to evaluate the strengths and weaknesses of an individual's technique. Students perform a research-based analysis and a servicing-based report for an athlete to explore both the scientific aspect of sports biomechanics as well as the applied component when this data needs to be condensed and presented in a coach/athlete friendly way. Students also explore high level lab-based technologies to explore the forces and motions in sports skills, balance and injury.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Identify and describe concepts associated with the acute physiological responses to exercise;
2. Explain the process of the interaction between muscle metabolism, the endocrine and cardiorespiratory systems;
3. Describe the chronic physiological responses to exercise training; and
4. Apply practical skills required in exercise physiology laboratory work and research.

Class Contact: Lab 2.0 hrs; Lecture 1.0 hrs
Lecture: 12 x 2 hrs; Laboratory: 6 x 2 hrs.

Assessment: Test, A series of short answer and multiple choice tests covering practical and theoretical knowledge (tests will occur before week 6 of semester), 20%. Test, A series of short answer and multiple choice tests covering practical and theoretical knowledge (tests will occur after week 6 of semester), 30%. Examination, Final examination - short answer and multiple choice questions, 50%. Hurdle 1: To gain an overall pass in this unit students must attend and complete 80% of laboratory sessions. Hurdle 2: Successful completion of practical laboratory skills test.

AHE2127 Motor Learning

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit aims to develop an integrated understanding of the wide range of factors that affect the process of motor learning and motor skill performance and provide an introduction to theoretical and practical aspects of experimental design and procedures used in motor learning research.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Appraise psychological and constraints-led approaches to motor learning;
2. Create solutions to common motor skill learning situations by applying principles related to optimal learning of motor skills;
3. Assess motor skill instruction and integrate empirical findings to develop evidence-based approaches to instruction;
4. Analyse results from applied motor learning experiments and evaluate findings.

Class Contact: Lab 1.0 hrs; Lecture 2.0 hrs

Assessment: Test, Exam, 20%. Assignment, Practical laboratory report, 40%.

AHE2129 Advanced Resistance Training

Locations: Footscray Park.

Prerequisites: AHE1112 - Resistance Training

Description: This unit of study deals with the research-based knowledge and understanding of the acute and chronic physiological responses to exercise, as well as the physiological basis of exercise performance. The unit examines: the metabolic supply of energy to exercising muscle; the acute responses of the cardiovascular, respiratory, thermoregulatory, neural, endocrine and muscular systems to exercise; and the chronic physiological responses to exercise training. Students are introduced to practical aspects of exercise physiology through experiments and procedures in the exercise physiology laboratory. Practical sessions cover topics such as: cardiovascular and respiratory responses to exercise, metabolism at rest and during exercise and maximal oxygen consumption. This unit is taught from both a theoretical and practical perspective to enhance students' understanding of exercise physiology principles.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Identify and describe concepts associated with the acute physiological responses to exercise;
2. Explain the process of the interaction between muscle metabolism, the endocrine and cardiorespiratory systems;
3. Describe the chronic physiological responses to exercise training; and
4. Apply practical skills required in exercise physiology laboratory work and research.

Class Contact: Lab 2.0 hrs; Lecture 1.0 hrs
Lecture: 12 x 2 hrs; Laboratory: 6 x 2 hrs.

Assessment: Examination, Mid-Semester Exam (exam will be in week 6 of semester), 20%. Case Study, Written report of a case study analysis, and demonstration of practical skills, 40%. Examination, Final written examination, 40%. Hurdle 1: To gain an overall pass in this unit students must attend and complete 80% of the laboratory sessions.

AHE2104 Exercise Physiology

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit of study deals with the research-based knowledge and understanding of the acute and chronic physiological responses to exercise, as well as the physiological basis of exercise performance. The unit examines: the metabolic supply of energy to exercising muscle; the acute responses of the cardiovascular, respiratory, thermoregulatory, neural, endocrine and muscular systems to exercise; and the chronic physiological responses to exercise training. Students are introduced to practical aspects of exercise physiology through experiments and procedures in the exercise physiology laboratory. Practical sessions cover topics such as: cardiovascular and respiratory responses to exercise, metabolism at rest and during exercise and maximal oxygen consumption. This unit is taught from both a theoretical and practical perspective to enhance students' understanding of exercise physiology principles.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:

1. Identify and describe concepts associated with the acute physiological responses to exercise;
2. Explain the process of the interaction between muscle metabolism, the endocrine and cardiorespiratory systems;
3. Describe the chronic physiological responses to exercise training; and
4. Apply practical skills required in exercise physiology laboratory work and research.

Class Contact: Lab 2.0 hrs; Lecture 1.0 hrs
Lecture: 12 x 2 hrs; Laboratory: 6 x 2 hrs.

Assessment: Test, A series of short answer and multiple choice tests covering practical and theoretical knowledge (tests will occur before week 6 of semester), 20%. Test, A series of short answer and multiple choice tests covering practical and theoretical knowledge (tests will occur after week 6 of semester), 30%. Examination, Final examination - short answer and multiple choice questions, 50%. Hurdle 1: To gain an overall pass in this unit students must attend and complete 80% of laboratory sessions. Hurdle 2: Successful completion of practical laboratory skills test.
contemporary practice of advanced resistance training conditioning for healthy and athletic populations. Students gain practical experience in powerlifting, Olympic lifting, and associated accessory and supplemental exercises (e.g., plyometrics and other speed/power movements) under the broad umbrella of resistance training. The mechanics of weightlifting and applied coaching is covered extensively in practical classes. Students practice and implement testing procedures for assessment of muscular strength and power, and utilise modern methodology (EMG, force plate, LPTs) to analyse movement and quantify biomechanical variables and training loads. Advanced training periodisation is covered in depth and students will make use of these training load data in planning and developing resistance exercise programmes.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Appraise and report current applied and research-based literature relating to a given resistance training system;
2. Demonstrate advanced resistance training exercises, and critically evaluate, identify and solve problems in client conduct of these exercises;
3. Apply muscular strength and power testing methodologies and analysis and extrapolate findings in both applied and research settings;
4. Formulate resistance training programs for healthy and athletic populations on the contextualised basis of testing outcomes and literature.

Class Contact: Lab 1.5 hrs; Lecture 1.5 hrs

Assessment: Test, Practical test of knowledge and application of muscular strength and power assessment methodologies, 15%. Examination, Practical examination of powerlifting and/or Olympic lifting demonstration and coaching, 40%. Report, Analysis of physical requirements required in a sport/athletic scenario, and subsequent resistance training program with supporting literature, 30%. Test, Theory test, 15%.

AHE2202 Functional Kinesiology

Locations: Footscray Park.

Prerequisites: AHE1101 - Structural Kinesiology

Description: This unit covers the structure and function of the major joints of the human body, muscle actions and some of the causes and consequences of impairment to the musculoskeletal system.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Interpret the structure and function of the components of the major joints of the human body;
2. Review the causes and consequences of various impairments to the musculoskeletal system;
3. Investigate the techniques used for kinesiological analysis and identify applications and limitations;
4. Analyse the findings of functional kinesiology research; and
5. Qualitatively analyse movement patterns and describe joint and muscle actions.

Class Contact: Lab 2.0 hrs; Lecture 1.0 hr

Required Reading: Selected readings will be made available via the unit VU Collaborate site.

Assessment: Exercise, Practical/tutorial assessment involving written and oral presentation on topic questions, 25%. Test, Short answer test, 25%. Examination, Final examination, 50%. Hurdle: To gain an overall pass in this unit students must attend and complete at least 80% of the laboratory sessions.

AHE2250 Sport Coaching Principles

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit positions students to more capably respond to local, national and international sport coaching trends. Students are required to take a broad holistic stance in developing their understanding of what constitutes sport coaching and related theories and methods. Students acquire relevant knowledge of national and international trends in coaching principles and intentionally apply this knowledge to the development of their own micro (local) coaching perspectives, philosophies, goals and behaviours. Students are familiarised with the scope and depth of the Australian and International sport coaching landscape including significant benchmark organisations such as UK Sport Coach, European Sport Union and Canada Sport Coach. Similarly the unit examines the roles of national stakeholders and pillar organisations. These include: Government involvement, Australian Sports Commission, National Sporting Organisations, the Community Club System, Universities/TAFE providers and External Agencies. Furthermore, in terms of equipping students to meet the expected career challenges, foundational knowledge and theory of sport coaching is strongly emphasised. Attention is also paid to the historical roots of sport coaching and historical trends that have shaped contemporary sport coaching. In helping to establish students as reflective practitioners overarching issues that inform coach knowledge and practice are investigated and viewed from a holistic perspective. As such, trends in sport science, communication, professionalisation of coaching, professional development, diversity, excellence, community coaching, and coaching ethics are examined.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Recognise the multidimensional issues that shape coaching thinking and behaviour including: sport science, communication, professional development, diversity, excellence, professionalisation of coaching, and ethics;
2. Recognise, understand and apply sport coaching theories;
3. Have developed and consolidated their concept of what sport coaching is, including the development of a personal coaching philosophy;
4. Be able to identify and compare decisive figures and influences that have shaped the history of sport coaching in Australia;
5. Be familiar with the governing structure and mandatory requirements of sport coaching in Australia and internationally;
6. Have explored the role that technology plays in the delivery of high performance coaching;
7. Possess a fundamental understanding of sport science and sport coaching research skills; and
8. Have developed writing skills particularly in the context of university studies and assessments.

Class Contact: Lecture 1.5 hrs; PC Lab 1.5 hrs

Required Reading: Selected readings will be made available via the unit VU Collaborate site.

Assessment: Project, Development of short, medium and longer versions of Coaching Philosophy, 25%. Presentation, Tutorial Engagement - Typical tutorial tasks including debate, class readings, discussion, hurdle tasks and in-situ learning, 20%. Portfolio, Compilation and presentation of e-portfolio, 30%. Examination, Final Exam, 25%.

AHE2251 Sport Coaching Environment, Planning and Delivery

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit examines the roles of national stakeholders and pillar organisations such as UK Sport Coach, European Sport Union and Canada Sport Coach. Similarly the unit examines the roles of national stakeholders and pillar organisations. These include: Government involvement, Australian Sports Commission, National Sporting Organisations, the Community Club System, Universities/TAFE providers and External Agencies. Furthermore, in terms of equipping students to meet the expected career challenges, foundational knowledge and theory of sport coaching is strongly emphasised. Attention is also paid to the historical roots of sport coaching and historical trends that have shaped contemporary sport coaching. In helping to establish students as reflective practitioners overarching issues that inform coach knowledge and practice are investigated and viewed from a holistic perspective. As such, trends in sport science, communication, professionalisation of coaching, professional development, diversity, excellence, community coaching, and coaching ethics are examined.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Recognise the multidimensional issues that shape coaching thinking and behaviour including: sport science, communication, professional development, diversity, excellence, professionalisation of coaching, and ethics;
2. Recognise, understand and apply sport coaching theories;
3. Have developed and consolidated their concept of what sport coaching is, including the development of a personal coaching philosophy;
4. Be able to identify and compare decisive figures and influences that have shaped the history of sport coaching in Australia;
5. Be familiar with the governing structure and mandatory requirements of sport coaching in Australia and internationally;
6. Have explored the role that technology plays in the delivery of high performance coaching;
7. Possess a fundamental understanding of sport science and sport coaching research skills; and
8. Have developed writing skills particularly in the context of university studies and assessments.

Class Contact: Lecture 1.5 hrs; PC Lab 1.5 hrs

Required Reading: Selected readings will be made available via the unit VU Collaborate site.

Assessment: Project, Development of short, medium and longer versions of Coaching Philosophy, 25%. Presentation, Tutorial Engagement - Typical tutorial tasks including debate, class readings, discussion, hurdle tasks and in-situ learning, 20%. Portfolio, Compilation and presentation of e-portfolio, 30%. Examination, Final Exam, 25%.
coaches to actively build their professional competence. Hence a specific focus is placed on program planning, communication skills and delivery style, management skills, ethical and legal obligations, business and financial considerations, and research and computer skills.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:

1. Articulate the underlying principles of periodised planning and create their own periodised plan using Visual Coaching Pro on-line program;
2. Locate, understand, and critically evaluate sport coaching research;
3. Create and deliver a professional oral presentation to an audience of their peers using electronic media;
4. Communicate and work professionally with others; and
5. Employ safe coaching principles and identify legal obligations.

**Class Contact:** Lecture 1.5 hrs; Tutorial 1.5 hrs

**Required Reading:** Selected readings will be made available via the unit VU Collaborate site.

**Assessment:**
- Test, Week 4: Team-Based Learning quiz, 20%.
- Test, Week 10: Team-Based Learning quiz, 20%.
- Assignment, Program development and planning assignment, 30%.
- Presentation, Group Case Study Presentation, 30%.

---

**AHE3100 Advanced Exercise Physiology**

**Locations:** Footscray Park.

**Prerequisites:** SCL1002 - Exercise Physiology/RBM1528 - Human Physiology 2either/or

**Description:** In this unit students gain an in-depth understanding of the physiological mechanisms involved during the acute responses to exercise and chronic adaptations to training. The unit focuses on the mechanisms responsible for the adaptations of the various systems (i.e. cardiovascular, respiratory, metabolic, endocrine, and neuromuscular) of the human body as a result of exercise and training interventions undertaken in both normal and extreme environmental conditions. The unit also examines the impact of the physiological adaptations induced by exercise and training interventions on human health and human performances. Students are introduced to advances in the different sub-disciplines of exercise physiology, including molecular physiology, metabolism, cardiovascular and respiratory physiology, and neuromuscular physiology. During the practical classes, students are familiarised with the laboratory techniques used to measure acute responses to exercise and chronic adaptations of the various systems and training interventions in both normal and adverse conditions (heat and hypoxic conditions are created in the environmental exercise laboratory). During the tutorials, students are given the opportunity to develop their critical thinking and their academic writing skills.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:

1. Adapt their understanding of the physiological mechanisms to gauge the acute responses to exercise and chronic adaptations to training;
2. Evaluate the role played by the responses of the different systems on human health and human performances;
3. Analyse, interpret, and discuss results from exercise physiology experiments; and
4. Critically analyse the scientific literature in the area of exercise physiology.

**Class Contact:** Lab 2.0 hrs; Lecture 1.0 hrs

**Lectures:** 24 x 1 hour (2 lectures per week); Labs/tutorials: 12 x 2 hours.

**Assessment:**
- Essay, Short essay covering theoretical and practical knowledge (assessed within the first six weeks of semester), 17.5%.
- Essay, Three short essays covering theoretical and practical knowledge (3 x 17.5%); assessed between week 6 and week 11 of semester), 52.5%.
- Examination, Final examination (Short/long answer and multiple choice questions), 30%.
- Hurdle 1: To demonstrate development of placement skills required by the accrediting body, Exercise and Sport Science Australia (ESSA), students are required to attend and complete 80% of laboratory sessions to gain an overall pass in the unit.

---

**AHE3101 Advanced Biomechanics**

**Locations:** Footscray Park, (Biomechanics Laboratory).

**Prerequisites:** AHE2102 - Sports Biomechanics

**Description:** This unit aims to develop an understanding of advanced biomechanics topics and methods with a focus on gait and posture control in adults, children and specific populations (eg aging). Using interfaced force plates, digital video cameras and 3D movement analysis systems, experience is gained in the collection and analysis of external and internal forces, angular and linear kinematics, and muscle activation. Other advanced analysis techniques are integration using digital methods, inverse dynamics from ground reaction forces and anthropometric constants, centre of pressure, friction and slipping. Impulse momentum relationships and leverage are studied using high-impact activities such as running, jumping and lifting.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:

1. Determine motions of the body during typical activities, and quantify the forces acting on the body during movement;
2. Gauge the scope and limitations of different experimental and analytical techniques used to quantify human movement, interpret motion data accurately, and evaluate studies of human movement; and
3. Utilise the analytical skills necessary to perform a biomechanical analysis of human movement.

**Class Contact:** Lab 2.0 hrs; Lecture 1.5 hrs

**Required Reading:** To be advised by lecturer.

**Assessment:**
- Test, Class test (2 x 10%), 20%.
- Report, Laboratory report based on the experimental results and associated literature for kinematic and kinetic analysis, 25%.
- Project, Group research project - write a report and present to the class utilising own experiment to gather quantitative biomechanical data, 15%.
- Examination, End of semester - multiple choice, 40%. Hurdle: To gain an overall pass in this unit students must attend and complete 80% of the laboratory sessions.

---

**AHE3111 Sport and Social Analysis**

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** This unit takes as its major focus the nature of sport, leisure, human movement and sport science in Australia. Analysis of these is informed by poststructuralism, feminism, cultural studies and social history. These approaches are linked by a common concern to adapt a critical perspective in which the inequalities of class, gender, sexuality, race, ethnicity, disability and age are revealed to be central to any attempt to understand sport. In terms of implementing change, it is argued that these fields represent an arena for struggle as they occupy a contradictory position in Australia. This provides the opportunity to reintroduce and reformulate the positioning, meanings and opportunities available in sport and leisure.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:

1. Employ poststructuralism, feminism, cultural studies and social history to analyse subject matter in violence, gender, race / ethnicity and economy in sports;
2. Critically review, in writing, both current sociologically informed, and popular, perspectives related to violence, gender, race / ethnicity and economy in sports;
3. Apply critical thinking and professional judgement to assess discourses about major sociological topics; and 4. Present a clear, coherent oral exposition critiquing current understanding on a topic utilising an identified theoretical approach from sociology.

**Class Contact:** Lecture 2.0 hrs Tutorial 2.0 hrs

**Assessment:** Exam, Question 1, 20%; Exam, Question 2, 20%; Assignment, Fieldwork assignment, 30%. Presentation, Class presentation, 30%.

**AHE3112 Career and Professional Development 3**

**Locations:** Footscray Park.

**Prerequisites:** The prerequisite for students in HBEM and ABHR is AHE2213 - CAREER AND PROFESSIONAL DEVELOPMENT. The prerequisite for students in ABHR is AHS1207 - SPORT AND RECREATION CAREER DEVELOPMENT I

**Description:** This unit develops an integrated understanding of using self-understanding activities, goal setting, networking, interviewing techniques, generating a professional image and employment opportunities to equip students towards graduate employment. It develops critical understanding of how to identify their strengths and competencies through education, employment experiences, work integrated learning and extracurricular experiences. It advances job hunting strategies to establish a work integrated learning placement that will provide a pathway into their chosen career and employment in the fields of sport and recreation management and exercise and sport science.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:

1. Analyse skills, career values and personality to gain a clear career direction;
2. Advance self-marketing skills for lifelong career development focussing on communicating achievements during job interviews and professional image management;
3. Adapt and synthesise theoretical knowledge and skills to the workplace by undertaking a career placement in a responsible, accountable and collaborative manner;
4. Build on existing business communication skills and practices to enhance capability to be an effective professional communicator; and
5. Exercise independent critical thinking, practices and judgements and reflect within the career placement at the workplace setting.

**Class Contact:** Equivalent to three hours per week over one semester - comprising a 2 day workshop and a 140 hour career placement.

**Required Reading:** SES CPD Guidelines SES CPD Report Writing Guidelines

**Assessment:** Case Study, Analysis of personal data to gain clearer career directions, 50%. Report, Completion of a 140 hour career placement and professional report, 50%. Total effective word limit 3000 words.

**AHE3114 Clinical Exercise Practice 1**

**Locations:** Footscray Park.

**Prerequisites:** AHE2006 - Exercise Interventions for Healthy Populations or equivalent

**Description:** This unit is designed as the first part of a Capstone project taken by students in the final year of the ABHE program. It is designed to consolidate the students’ undergraduate clinical training via an advanced professional work placement and a reflective, evidence-based analysis of this placement. The placement aspect of this unit introduces students to the professional roles of clinical exercise physiologists and offers perspectives on the roles of other team members in rehabilitation processes. Students have opportunities to observe clinical exercise professionals in the design, implementation and evaluation of exercise and physical activity programs, and learn about the equipment, facilities and program planning used in exercise delivery for clinical populations. Students have opportunities to practise exercise science in the service of apparently healthy individuals. Students are supervised in the workplace by an approved supervisor, with additional mentoring by university staff. Under supervision, students practice with actual clients and document their training experiences under the ESSA practicum category of ‘apparently healthy’ category. The theoretical aspect of the second unit (SCL3002) includes a critical reflection of the placement, informed both by theoretical knowledge from the disciplines of physiology, biomechanics, motor control, anatomy, psychology, sociology, and ethics, and professional knowledge from resistance training, exercise interventions, first aid and career and professional development.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:

1. Critically apply skills and knowledge acquired in clinical exercise studies to a professional setting involving exercise interventions with apparently healthy populations;
2. Collect and interpret data discriminating between clinical and
functional (eg exercise capacity) outcomes; 3. Evaluate exercise and physical activity interventions with an emphasis on the graduated transfer from client dependence to self-management within this group/community; 4. Identify and critically review the ethical and legal responsibilities regarding the provision of clinical exercise services; and 5. Use evidence bases to construct a synthesis of different approaches in the design and provision of clinical exercise services for apparently healthy individuals/populations.

**Class Contact:** Lab 1.5 hrs, Tutorial 1.5 hrs. **Contact time:** Lab: 5 x 1.5 hrs and Tutorial, 7 x 1.5 hrs lab (LO04a teaching gym): weeks 1, 2, 4-6, 11. **Tutorial:** weeks 3, 7-10, 12. **Supervised placement:** 140 hours; not necessarily in one block or at one institution.

**Assessment:** Examination, Theory Placement Readiness Exam (hurdle), 10%. Examination, Practical Placement Readiness Exam (hurdle), 10%. Portfolio, 10%. 140 hour placement logbook, and training and reflective reports for 4 clients regarding efficacy of exercise interventions for >20 hours of training, 70%. Examination, Assessment of Practical Skills (a selection from the skills taught in tutorials), 10%.

**Hurdle 1:** To demonstrate skills required for professional registration with Exercise and Sport Science Australia (ESSA) students must pass both the theory and practical readiness exams with scores of at least 50% to pass this unit. **Hurdle 2:** To gain an overall pass in this unit students must attend and complete 80% of the tutorial classes. The hurdle tests must be completed before the student commences placement.

**AHE3116 Social Dimensions of Sport and Exercise**

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** Students have the opportunity to investigate current social factors that have a bearing on participation in exercise and sport and its potential health benefits. Factors that may enhance participation or those that may be barriers include: age, gender, sexual orientation, ability/disability, socioeconomic status, religion and race/ethnicity. Furthermore, the concepts of workplace design, ergonomics and assessment of occupational injuries and rehabilitation. Students are introduced to the Occupational health and safety; the risks, regulations and interventions. The concepts of workplace design, ergonomics and assessment will be introduced. Occupational exercise interventions will be discussed from the perspectives of the worker, the exercise physiologist as well as safety management within this group/community; and 6. In collaboration with others, demonstrate responsibility and accountability for own learning through a coherent oral presentation.

**Class Contact:** Lecture 1.5 hrs, Tutorial 1.0 hr.

**Required Reading:** Coakley, J, Hallinan, C & McDonald, B 2011, 2nd edn, Sports in society: issues and controversies in Australia and New Zealand, Australia: McGraw-Hill. All other class materials, including tutorial readings, tutorial questions and other information will be available on the online learning platform.

**Assessment:** Presentation, Group presentation, 20%. Test, Class quiz/short answer (weeks 4 and 8) at 20% each, 40%. Assignment, Assignment, Assignment, 20%. Assignment, Assignment, 20%.

**AHE3117 Clinical Exercise Studies 2**

**Locations:** Footscray Park.

**Prerequisites:** AHE2002 - Clinical Exercise Studies 1 Nil.

**Description:** Students explore exercise as applied for its therapeutic and preventive benefits for people living with, or at risk of, chronic diseases, injuries, or disabilities. The unit addresses the evidence bases regarding modes of exercise, intensity, duration, frequency, volume and progression for a range of ongoing (ie. chronic) cardiopulmonary, metabolic, musculoskeletal, neurological and multi-systemic pathologies that are known to respond positively to exercise. The unit also addresses, using a case-based method, chronic and complex health conditions, the effects of commonly used medications, surgery, and other interventions for the range of chronic cardiopulmonary, metabolic, musculoskeletal and neurological pathologies, and the effects of these interventions on expected acute and chronic exercise responses on different population groups.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:

1. Explore and critically evaluate research and other literature relevant to clinical exercise practice;
2. Adapt this research knowledge to clinical cases of clients with chronic and complex health conditions;
3. Apply professional judgement and appropriately select test and monitoring protocols for the assessment of exercise and functional capacities for different populations;
4. Use initiative and judgement in planning and problem solving to apply the knowledge and skills to negotiate exercise interventions, for clients with chronic and complex health conditions, and clearly communicate recommendations taking account of the full context of clients’ lives including concurrent interventions; and
5. Demonstrate critical thinking and professional decision-making of an exercise physiologist through communication, ethics and note taking.

Class Contact: Lecture: 12 x 1.5 hours; Lab: 12 x 1.5 hours.

**Required Reading:** Wilson, P 2011, 1st edn. Exercise for special populations, Philadelphia: Wolters Kluwer Health/Lippincott Williams & Wilkins. Each week there are specific readings and/or resources suggested to enhance the learning outcomes of the lecture.

**Assessment:** Test, Mid semester test - multiple choice and short answer, 25%. Assignment, SOAP notes - Respond in pairs and provide presentation, 35%. Examination, Final - multiple choice, short and extended answer questions, 40%.

Hurdle: To gain an overall pass in this unit students must participate in case conferences. Total effective ward limit 3000 words.

**AHE3119 Clinical Exercise Studies 3**

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** Students further explore fields of clinical exercise therapy in this unit. Students are introduced to the Occupational health and safety; the risks, regulations and interventions. The concepts of workplace design, ergonomics and assessment will be introduced. Occupational exercise interventions will be discussed from the perspectives of the worker, the exercise physiologist as well as safety environment/case management. Students will increase their understanding of the physical demands of work, and of occupational injuries and rehabilitation.

**Credit Points:** 12
Learning Outcomes: On successful completion of this unit, students will be able to:
1. Select, evaluate and critically appraise the occupational health literature relating to occupational demands or work-related health conditions, and plan and apply strategies;
2. Evaluate, select and justify appropriate test and monitoring protocols for different work places and for the assessment of exercise and functional capacities for people with particular occupational demands or work-related health conditions;
3. Critically evaluate, design and implement clinical exercise programmes, appropriate for the workplace/home environment;
4. Apply professional judgement to construct programmes that will promote a healthy lifestyle in the workplace, with a view to primary and secondary prevention of avoidable illness and injury;
5. Apply knowledge and skills to assess and design work places, plan exercise interventions for clients with varying occupational demands and work-related health conditions; and
6. In collaboration with others use initiative and judgement to propose an ergonomically suitable workplace.

Class Contact: Weekly 2hr lectures and fortnightly 2 hr labs

Required Reading: Students will be provided with information about weekly reading material.

Assessment: Test, Mid-semester test - multiple choice and short answer questions, 25%. Assignment, Collaborative written assignment - ergonomic assessment of workplace, 35%. Examination, Final exam - multiple choice and extended answer questions, 40%. Total effective word limit 3000 words.

AHE3120 Exercise Science Career Development

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit is designed as the first part of a Capstone project taken by students in their final year of their program. It is designed to consolidate the students’ undergraduate training via an advanced professional work placement and a reflective, evidence-based analysis of this placement. The placement aspect of this unit introduces students to professional roles and offers perspectives on the roles of other team members in the professional setting. Students observe exercise professionals in the design, implementation and evaluation of exercise and physical activity programs, and learn about the equipment, facilities and program planning used in exercise delivery for healthy populations. Students have opportunities to practise exercise science in the service of apparently healthy individuals. Students are supervised in the workplace by an approved supervisor, with additional mentoring by university staff. The theoretical aspect of the second unit (AHE3200) includes a critical reflection of the placement, informed both by theoretical knowledge from the disciplines of physiology, biomechanics, motor control, anatomy, psychology, sociology, and ethics, and professional knowledge from resistance training, exercise interventions, first aid and career and professional development. This unit is designed to support students to obtain positive career outcomes by following a career development model. It will equip them to be proactive and strategic in career planning, aware of the variety of exercise and sport science career outcomes and to develop self-understanding to enable them to target their career actions.

Credit Points: 12

AHE3125 Applied Exercise Psychology

Locations: Footscray Park.

Prerequisites: SCL1003, Exercise and Sport Psychology

Description: This unit provides the student with an understanding and critical analysis of the role of psychological principles in exercise from an applied perspective. It will enable students to understand how to plan and anticipate outcomes of evidence-based physical activity/exercise interventions. This unit utilises psychological theory to explain causes and correlates of exercise adherence and exercise avoidance. The unit builds on Exercise Psychology (AHE1106) to examine psychological interventions, and demonstrate the utility of exercise psychology models in enhancing adherence to exercise programs for the clinical treatment of patients or clients. Within the unit students will develop an evidence-based exercise intervention. Facilitators and barriers to participation are also explored.

Credit Points: 12

AHE3126 Motor Control

Locations: Footscray Park, City Flinders.

Prerequisites: Nil.

Description: This unit introduces students to the neuro-mechanical basis of the control of human movement as it relates to exercise and sport, at the central, spinal and peripheral levels of the nervous system. Areas covered are: movement physiology (brain, muscle and spinal control), movement control (gait, reaching, vision, fatigue), development and aging and atypical control, movement representation in the brain and the neural correlates of learning and plasticity.
AHE3200 Professional Ethics
Locations: Footscray Park.
Prerequisites: Nil.
Description: This unit is designed to develop students’ awareness and appreciation of the ethical dimensions of the educator’s, the practitioner’s and the administrator’s role within sport, exercise science and physical education. It develops students’ ability to critically analyse the ethical components of the many interventions, issues, practices and relationships within the sport/exercise science/human movement profession so that students’ function within those roles will be ethically informed. This unit provides an opportunity for students to integrate and apply their discipline-specific knowledge and skills acquired through their course to their transition to their chosen careers. Students conduct a project exploring their personal conceptualisation of their career field; explore the ethical dimensions of roles in this career; and develop knowledge and skills to enable them to be proactive and strategic in their planning in the industry sectors. Topics explored include views of contemporary exercise and sport science practice; changing understandings of exercise, sport and health interventions; professional ethics; career professional development, and exercise and sport science industry engagement.
Credit Points: 12
Learning Outcomes: On successful completion of this unit, students will be able to:
1. Critically analyse and ethically evaluate theoretical knowledge and technical information with autonomy, responsibility and judgement in order to both anticipate and creatively solve problems related to professional practice and relationships; 2. Adopt the concepts of ethical inquiry to the construction of professional policy in these workplaces; 3. Critically assess the ethical implications of globalisation and its effects on the workplace and the local community; and 4. Create and defend logically coherent positions with respect to ethical issues.
Class Contact: Lecture 2.0 hrs; Tutorial 1.0 hrs.
Required Reading: Selected readings will be made available via the unit VU Collaborate site.
Assessment: Test, Unit test; extended answer response to one question (week 5), 25%. Test, Unit test; extended answer response to one question (week 9), 25%. Report, Capstone Project: note information below, 40%. Presentation, Collaborative Group Conference Presentation, 10%. "The Capstone Project and Conference Presentation is a collaborative research paper or site report dealing with an ethical issue.

AHE3219 Adapted Physical Education
Locations: Footscray Park.

Prerequisites: Nil.
Description: This unit provides students with an opportunity to investigate the importance of advocacy in the field of physical education, physical activity and sport science. It will require students to utilise literature related to inclusive practice and evaluate this in a practical setting.
Credit Points: 12
Learning Outcomes: On successful completion of this unit, students will be able to:
1. Communicate a coherent and independent exposition of core knowledge of physical education, physical activity and values of health and advocacy in written form; 2. Critically analyse and review theoretical knowledge and practices and adapt these to develop innovative programs with school aged children in physical activity settings; 3. Investigate and analyse a variety of physical education and related issues to develop professional approaches to address specific issues when working with school aged children in physical activity settings; 4. Exhibit professional, ethical and socially sensitive judgements by adopting knowledge and skills to make inclusive and culturally relevant outcomes to physical activities; and 5. Integrate a broad technical and theoretical knowledge of physical education, physical activity, exercise and sport science and investigate the notion of advocacy in this context.
Class Contact: Lecture 1.0 hrs; Tutorial 2.0 hrs
Required Reading: Selected readings will be made available via the unit VU Collaborate site.
Assessment: Practicum, Plan, Deliver, Reflect upon Physical Activity sessions, 50%. Assignment, Investigative report, 50%.

AHE5901 Minor Thesis (Full-Time)
Locations: Footscray Park, Via clinical placements.
Prerequisites: Nil.
Description: This unit enables students to critically analyse and reflect on knowledge and skills gained in previous studies to research, investigate and develop new knowledge. Students work independently to introduce a topic, formulate an investigation, draw conclusions and submit a suitably formatted thesis or performance. The thesis would normally be assessed by at least two expert examiners from an appropriate area of expertise. At the beginning of semester students may be required to attend some lectures.
Credit Points: 48
Learning Outcomes: On successful completion of this unit, students will be able to:
1. Demonstrate an integrated and comprehensive understanding of literature relating to an approved topic; 2. Critically analyse and reflect on information and research with the aim of contributing to a new body of knowledge or practice; 3. Interpret and disseminate research information to a range of informed and by audiences; and 4. Utilise specialised cognitive and technical skills to independently plan, design and produce a minor research thesis.
Class Contact: Independent research in addition to regular meetings with the student’s supervisor(s).
Required Reading: Selected readings will be made available via the unit VU Collaborate site.
Assessment: Thesis, The thesis will normally be assessed by at least two expert examiners from an appropriate area of expertise (10-12,000 word limit), 100%.

AHE5902 Minor Thesis (Part-Time)
Locations: Footscray Park, Via clinical placements.
Prerequisites: Nil.
Description: This unit enables students to critically analyse and reflect on knowledge
and skills gained in previous studies to research, investigate and develop new knowledge. Students work independently to introduce a topic, formulate an investigation, draw conclusions and submit a suitably formatted thesis or performance. The thesis would normally be assessed by at least two expert examiners from an appropriate area of expertise. At the beginning of semester students may be required to attend some lectures.

Credit Points: 24

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Demonstrate an integrated and comprehensive understanding of literature relating to an approved topic;
2. Critically analyse and reflect on information and research with the aim of contributing to a new body of knowledge or practice;
3. Interpret and disseminate research information to a range of informed and lay audiences; and
4. Utilise specialised cognitive and technical skills to independently plan, design and produce a minor research thesis.

Class Contact: Independent research in addition to regular meetings with the student's supervisor(s).

Required Reading: Selected readings will be made available via the unit VU Collaborate site.

Assessment: The thesis will normally be assessed by at least two expert examiners from an appropriate area of expertise. Thesis, The thesis will normally be assessed by at least two expert examiners from an appropriate area of expertise (10-12,000 word limit), 100%.

AHE5903 Research for Practitioners

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit provides students with the ability to ‘consume and apply research’. The focus of the unit is on presenting principles of the research process from concept to research question through to design, method, and quantitative/qualitative techniques for data collection, analysis, and interpretation. Students will be able to critically appraise, interpret, and disseminate research information to various audiences in a process considered an example of best practice in the profession for which the student is being trained. They will plan and execute a substantial research-based project, capstone experience and/or piece of scholarship.

Credit Points: 24

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Critically appraise the sourcing of research information relevant to the focus of study in contemporary and emerging professional and scholarly contexts;
2. Conceptually map quantitative and qualitative methodologies to evaluative approaches and rationalise their application to a specific project;
3. Discern the relationship between the magnitude of effect and the magnitude of the p value in quantitative research scenarios;
4. Source information for a project, identifying stakeholders, scientific boundaries and resources and make recommendations based on sound logical reasoning;
5. Critically interpret and disseminate research and project outcomes in appropriate scholarly verbal and/or written form to both specialist and non-specialist audiences; and
6. Plan and execute a substantial evaluative research project based in professional practice that includes ethical aspects.

Class Contact: Lecture 2.0 hrs/tutorial 1.0 hr/week, two hours lectures and one, one hour tutorial per week

Assessment: Report, Project scoping identifying stakeholders and boundaries, 15%. Review, Review of relevant literature and justification of methodology, 15%. Report, Final Report, Evaluative report with recommendations and conclusions, 35%. Presentation, Present the findings and evaluation to an audience of stakeholders or peers, 35%. Total effective word limit 12,000 words.

AHE5904 Advanced Integrated Case Management

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit is the culmination of the course-work within the Master of Clinical Exercise Science and Rehabilitation. It draws upon all the knowledge and skills required of a professionally qualified and accredited Clinical Exercise Physiologist. Students are presented with an array of case studies, examining issues of diversity for healthcare practitioners, and covering the NURAP criteria in such a way that requires critical interpretation and dissemination of the information within the context of an interprofessional model of best practice in healthcare. By the end of this unit, students will have an understanding of what it means to work interprofessionally with practitioners from the medical, psycho-social and other models of practice, thus, to be fully prepared for employment in the field of Clinical Exercise Science and Rehabilitation.

Credit Points: 24

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Critically appraise an EP model of best practice within an interprofessional model of healthcare for clients living with chronic disease;
2. Demonstrate conceptual understanding of what it means to work interprofessionally with practitioners from the medical, psycho-social and other models of practice;
3. Demonstrate conceptual understanding of client centredness within both solo practice and an interprofessional model of healthcare;
4. Examine and analyse a broad range of client diversity issues that may be encountered by healthcare practitioners;
5. Critically appraise research relating to the assessment of clients with cardiorespiratory, metabolic, neuro-muscular, and/or psychological pathologies for everyday living; and
6. Critically appraise current best practice research of interventions for clients with cardiorespiratory, metabolic, neuro-muscular, and/or psychological pathologies for everyday living.

Class Contact: Seminar 3.0 hrs

Assessment: Case Study, Written case study, 50%. Presentation, Presentation of case study findings, 25%. Assignment, Critical debate, 25%. Students must also complete an IPE expose activity - Graded satisfactory / not satisfactory.

AHH0421 Honours Thesis

Locations: Footscray Park.

Prerequisites: Nil.

Description: The Honours Thesis is designed to be an educational experience that gives students the opportunity to conceptualise, design, implement and evaluate a specific research project related to human movement. Unlike a Masters or Doctoral thesis, the Honours thesis is not expected to, although it may, contribute to a discipline’s body of knowledge. The broad aim of the Honours thesis is to promote the development of the student as an independent researcher. The specific aims are to develop and use the knowledge and skills necessary to conduct a research project and present a formal written thesis. The student should generally be able to display the resourcefulness and academic rigour required of an independent researcher.

Credit Points: 48
On successful completion of this unit, students will be able to:
1. Identify/construct a research problem or issue;
2. Review the relevant literature;
3. Determine appropriate methods (including ethics) to study the problem;
4. Collect and analyse data, using suitable quantitative, qualitative or other appropriate methods and techniques;
5. Report and discuss the results in the context of the review of literature, draw conclusions, evaluate the process undertaken and make recommendations for future research and for practice; and
6. Present the whole process clearly and accurately in a formal thesis, normally between 7000 and 15,000 words.

Class Contact: Seminar 2.0 hrs
The research process will be monitored by regular meetings with the supervisor in light of the agreed- upon thesis proposal. On the advice of the supervisor, students may be required to undertake coursework studies to acquire or develop the knowledge and skills required to successfully complete the thesis.

Required Reading: Selected readings will be made available via the unit VU Collaborate site.

Assessment: The final thesis will be examined by two academics with expertise in the specific area of the research. These may be internal or external to the School and will not include the supervisor. This examination will constitute 100% of the assessment. Each examiner will independently recommend one of the following outcomes to his/her assessment of the thesis: pass without further examination; pass subject to corrections to the satisfaction of the School’s Honours Courses Committee; deferred for submission after major revision; fail. In the event that there is a major disagreement between the examiners, a third examiner will be appointed.

AHS1108 Sport and the Media

Locations: Footscray Park.
Prerequisites: Nil.

Description: In this unit students gain an understanding of how the media operates within Australian society generally and within sporting contexts specifically. In particular, it examines the way in which media impacts on sporting clubs, leagues and associations. This unit also provides students with the requisite practical skills to engage in successful media management when employed in the field of sport and recreation management. The underlying theme of this unit is that sport and the media are engaged in a mutually interdependent relationship, in which each benefit from contact with the other.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Analyse the psychological nature (dimensions) of play and leisure and the relationship, in which each benefit from contact with the other;
2. Contextualise progress through the developmental stages of play in childhood and leisure during adult life;
3. Debate the affective psychological processes such as leisure attitude, personality and motives that are believed to influence individual undertakings in play and leisure and the relationship, in which each benefit from contact with the other;
4. Articulate knowledge of the variety of events and the role of diverse service providers as well as the resources available in the event management field.

Class Contact: Lecture 1.0 hrs, Seminar 3.0 hrs, Tutorial 1.5 hrs, Workshop 8.0 hrs, Lectures: 12 x 1 hour; Tutorials: 12 x 1.5 hour; Field work: 20 hours.

Required Reading: Allen, J. O Toole, W. Harris, R. & McDonnell, I., 2011, 5th edn, The final thesis will be examined by two academics with expertise in the specific area of the research. These may be internal or external to the School and will not include the supervisor. This examination will constitute 100% of the assessment. Each examiner will independently recommend one of the following outcomes to his/her assessment of the thesis: pass without further examination; pass subject to corrections to the satisfaction of the School’s Honours Courses Committee; deferred for submission after major revision; fail. In the event that there is a major disagreement between the examiners, a third examiner will be appointed.

AHS2300 Event Management in Sport and Recreation

Locations: Footscray Park.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Apply effective communication, teamwork and relationship building with the main event stakeholders;
2. Critically reflect on, evaluate and improve upon individual and team performance during an event management process and write a final event evaluation report;
3. Employ leadership skills, effective teamwork, initiative and problem-solving in the sport or recreation event management process;
4. Apply the theories and professional practices of all stages of the planning, operation and evaluation of sport and recreation event management to a real live event; and
5. Articulate knowledge of the variety of events and the role of diverse service providers as well as the resources available in the event management field.

Class Contact: Lecture 1.0 hrs, Seminar 3.0 hrs, Tutorial 1.5 hrs, Workshop 8.0 hrs, Lectures: 12 x 1 hour; Tutorials: 12 x 1.5 hour; Field work: 20 hours.

Required Reading: Allen, J. O Toole, W. Harris, R. & McDonnell, I., 2011, 5th edn, The final thesis will be examined by two academics with expertise in the specific area of the research. These may be internal or external to the School and will not include the supervisor. This examination will constitute 100% of the assessment. Each examiner will independently recommend one of the following outcomes to his/her assessment of the thesis: pass without further examination; pass subject to corrections to the satisfaction of the School’s Honours Courses Committee; deferred for submission after major revision; fail. In the event that there is a major disagreement between the examiners, a third examiner will be appointed.

AHS2305 Social Psychology of Recreation

Locations: Footscray Park.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Apply effective communication, teamwork and relationship building with the main event stakeholders;
2. Critically reflect on, evaluate and improve upon individual and team performance during an event management process and write a final event evaluation report;
3. Employ leadership skills, effective teamwork, initiative and problem-solving in the sport or recreation event management process;
4. Apply the theories and professional practices of all stages of the planning, operation and evaluation of sport and recreation event management to a real live event; and
5. Articulate knowledge of the variety of events and the role of diverse service providers as well as the resources available in the event management field.

Class Contact: Lecture 1.0 hrs, Seminar 3.0 hrs, Tutorial 1.5 hrs, Workshop 8.0 hrs, Lectures: 12 x 1 hour; Tutorials: 12 x 1.5 hour; Field work: 20 hours.

Required Reading: Allen, J. O Toole, W. Harris, R. & McDonnell, I., 2011, 5th edn, The final thesis will be examined by two academics with expertise in the specific area of the research. These may be internal or external to the School and will not include the supervisor. This examination will constitute 100% of the assessment. Each examiner will independently recommend one of the following outcomes to his/her assessment of the thesis: pass without further examination; pass subject to corrections to the satisfaction of the School’s Honours Courses Committee; deferred for submission after major revision; fail. In the event that there is a major disagreement between the examiners, a third examiner will be appointed.
underlie various contemporary leisure behaviours; and 4. Argue how leisure experiences lead to psychosocial outcomes for people including personal development.

Class Contact: Lecture 1.0 hr, Tutorial 1.0 hr. Lectures: 12 x 1.5 hours; Tutorials: 12 x 1 hour.

Assessment: Essay, Short essay - observation, 20%. Essay, Research essay, 30%. Test, Two in-class quizzes - (2 x 25%), 50%. Total effective word limit 3000 words.

AHS3503 Legal Issues in Sport and Recreation

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit of study examines selected prominent legal issues affecting the sport and recreation industries in Victoria and Australia-wide. It analyses the relationship between Federal, State and Local government law on a range of topics, including: personal injury (negligence and insurance law); contract and employment issues; land access; management and maintenance; anti-discrimination law and certain criminal offences dealing with sexual assault and child abuse, while providing guidance for students on when to obtain legal representation; and how to identify a potential legal problem.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Understand a range of legal issues, and their consequences, relevant to the professional experience of employees and independent contractors in the field of recreation management;
2. Understand terms, institutions, sources, content and practices of law in society as they apply to professional activities in the recreation industry (courts visits);
3. Appreciate the importance of legal relations through the law of contract, as well as aspects of dispute prevention and resolution, including litigation as a last resort;
4. Understand common law duties of care and their relationship with professional indemnity insurance in the area of accident compensation;
5. Appreciate the role of human rights and antidiscrimination law in terms of staff management and access to recreational services;
6. Understand various rights and obligations under criminal and employment laws;
7. Identify problems with legal dimensions, and to develop viable and preventative risk management strategies (sport or recreation organisations [including local government] legal issues);
8. Use analytical procedures to assess the effectiveness of legal regulation, formal dispute resolution and prevention in the field of recreation; and
9. Deal with legal practitioners and sources of law.

Class Contact: Lecture 1.5 hours; Tutorial 1.0 hours; Lectures: 12 x 1.5 hours; Tutorials: 12 x 1 hour; Field work: 10 hours.

Required Reading: Online resources associated with Government and law institutions: Australasian Legal Information Institute database (www.austlii.edu.au).

Assessment: Test, Mid-semester test (500 words), 30%; Presentation, Group presentation on a selected legal issue (WIL) (1500 words per student), 30%. Examination, End-of-semester take home examination (WIL) (1000 words), 40%.

AHS4031 Honours Thesis (Full-Time)

Locations: Footscray Park.

Prerequisites: Nil.

Description: The Honours Thesis is designed to be an educational experience that gives students the opportunity to conceptualise, design, implement and evaluate a specific research project related to sport administration. Unlike a Masters or Doctoral thesis, the Honours thesis is not expected to, although it may, contribute to a discipline's body of knowledge. The broad aim of the Honours thesis is to promote the development of the student as an independent researcher. The specific aims are to develop and use the knowledge and skills necessary to conduct a research project and present a formal written thesis. The student should generally be able to display the resourcefulness and academic rigour required of an independent researcher. More specifically the student should be able to: identify/construct a research problem or issue; review the relevant literature; determine appropriate methods (including ethics) to study the problem; collect and analyse data, using suitable quantitative, qualitative or other appropriate methods and techniques; report the results, discuss the results in the context of the review of literature, draw conclusions, evaluate the process undertaken and make recommendations for future research and for practice; and present the whole process clearly and accurately in a formal thesis normally between 10,000 and 20,000 words.

Credit Points: 48

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Conduct a research project;
2. Present a formal written thesis;
3. Demonstrate an understanding of the depth and breadth of knowledge and skills associated with a particular research area; and
4. Demonstrate the academic rigour to design, carry out and evaluate a sports administration related research project.

Class Contact: Tutorial 2.0 hrs. The research process will be monitored by regular meetings with the supervisor in light of the agreed-upon project proposal.

Required Reading: Selected readings will be made available via the unit VU Collaborate site.

Assessment: The final thesis will be examined by two academics with expertise in the specific area of the research. These may be internal or external to the School and will not include the supervisor. This examination will constitute 100% of the assessment. Each examiner will independently recommend one of the following outcomes to his/her assessment of the thesis: pass without further examination; pass unit to corrections to the satisfaction of the School's Honours Courses Committee; deferred for resubmission after major revision; fail. In the event that there is a major disagreement between the examiners, a third examiner will be appointed. An additional requirement of the unit is that the student must make at least two oral presentations to members of the Sport Management and Policy Division throughout the duration of their honours year on topics related to their thesis.

AHS4032 Honours Thesis (Part-Time)

Locations: Footscray Park.

Prerequisites: Nil.

Description: The Honours Thesis is designed to be an educational experience that gives students the opportunity to conceptualise, design, implement and evaluate a specific research project related to sport administration. Unlike a Masters or Doctoral thesis, the Honours thesis is not expected to, although it may, contribute to a discipline's body of knowledge. The broad aim of the Honours thesis is to promote the development of the student as an independent researcher. The specific aims are to develop and use the knowledge and skills necessary to conduct a research project and present a formal written thesis. The student should generally be able to display the resourcefulness and academic rigour required of an independent researcher. More specifically the student should be able to: identify/construct a research problem or issue; review the relevant literature; determine appropriate methods (including ethics) to study the problem; collect and analyse data, using suitable quantitative, qualitative or other appropriate methods and techniques; report the results, discuss the results in the context of the review of literature, draw conclusions, evaluate the process undertaken and make recommendations for future research and for practice;
and present the whole process clearly and accurately in a formal thesis normally between 10,000 and 20,000 words.

**Credit Points:** 24

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Conduct a research project;
2. Present a formal written thesis;
3. Demonstrate an understanding of the depth and breadth of knowledge and skills associated with a particular research area; and
4. Demonstrate the academic rigour to design, carry out and evaluate a sports administration related research project.

**Class Contact:** The research process will be monitored by regular meetings with the supervisor in light of the agreed-upon project proposal.

**Required Reading:** Selected readings will be made available via the unit VU Collaborate site.

**Assessment:**
- The final thesis will be examined by two academics with expertise in the specific area of the research. These may be internal or external to the School and will not include the supervisor. This examination will constitute 100% of the assessment.
- Each examiner will independently recommend one of the following outcomes to his/her assessment of the thesis: pass without further examination; pass with unit to corrections to the satisfaction of the School’s Honours Courses Committee; deferred for resubmission after major revision; fail. In the event that there is a major disagreement between the examiners, a third examiner will be appointed. An additional requirement of the unit is that the student must make at least two oral presentations to members of the Sport Management and Policy Division throughout the duration of their honours year on topics related to their thesis.

**AHX5501 Sport Community Partnerships**

**Locations:** City Flinders.

**Prerequisites:** Nil.

**Description:** This unit examines the ways in which sport organisations may partner and collaborate with other organisations to achieve mutually beneficial outcomes. These partnerships and collaborative arrangements will range from commercial agreements to partnerships with non-profit community-based organisations. Attention will be given to the different forms these arrangements may take, and the specific outputs arising from these arrangements. Students will be expected to contribute to case study discussion and provide examples of innovative arrangements for specific sport associations.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Critique theories of sport stakeholder synergies for developing sport partnerships;
2. Analyse sport partnership developments through the appraisal of sport partnership case studies;
3. Critically review sport partnership theory as applied to sport partnership developments; and
4. Evaluate the distinction between business agreements, community / business agreements and community agreements.

**Class Contact:** Tutorial 3.0 hrs

**Required Reading:** Selected readings will be made available via the unit VU Collaborate site.

**Assessment:**
- Exercise, Web-based discussions, 30%. Case Study, Sport community partnership, 30%. Report, Case study report, 40%.

**AHX5503 Sport Business Project**

**Locations:** City Flinders.

**Prerequisites:** Nil.

**Description:** This unit directly relates to individual students’ sport business organisation or interests. The major project will be decided by individuals in consultation with the lecturer and the project content should benefit the chosen sport business organisation. Students are expected to implement project management strategies that apply the skills and knowledge gained and further developed during lectures. That is, a communications plan, risk and issues management strategies, task assignments and evaluation plan.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Critically review various sport organisation business cases across commercial, private, public, and nonprofit entities;
2. Analyse and design an innovative project that is a result from the synopsis on the identified case;
3. Justify to a specialist audience the relevance and applicability of the proposed project for a targeted sport organisation; and
4. Evaluate the professional quality and relevance of projects and the applicability these have to the context for which they have been designed.

**Class Contact:** Tutorial 3.0 hrs

**Required Reading:** Selected readings will be made available via the unit VU Collaborate site.

**Assessment:**
- Project, Project proposal, 30%. Report, Final report, 50%. Presentation, Class presentation, 20%.

**SCL1001 Personal Training**

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** This unit deals with the business and practice of personal training. Students will be encouraged to gain skills associated with sound business practices (i.e., marketing and promotions, advertising, client retention, record-keeping, insurance and legal issues) relevant to operating as a personal trainer either within an existing fitness business or as a sole operator. There will also be a focus on using knowledge gained from other fitness-oriented units of study to design tailor-made programs for clients. In terms of professional issues, students will be exposed to the concept of networking, professional accreditation and registration and how to stay up-to-date with new trends, programs and services via published research, conferences, trade shows, online resources and professional associations. Finally, students will be exposed to a variety of personal training employment options.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Apply basic principles of fitness to the practical program delivery of professional personal training;
2. Apply sound business practices relevant to operating as a personal trainer;
3. Design a variety of strength, stretching, cardiovascular, nutritional and mind/body programs applicable to clients;
4. Understand how the fitness and personal training industry operates in Australia and worldwide, especially regarding the process of professional accreditation; and
5. Understand how to gain employment in a variety of personal training settings including fitness centres, personal training studios, parks and outdoor areas, corporate environments, health farms, hotels, resorts and cruise ships, apartments and body corporate settings, and mobile personal training services.

**Class Contact:** Lab 1.0 hrs Lecture 2.0 hrs

**Required Reading:** The Hysomollis et al text remains one of the best in the field for practical fitness assessment and programming. Other research articles and conference powerpoints will be provided via the VU Collaborate system. Hysomollis, C, Buttfrant, D & Bucky, N 2006, Weight training for Australian football, Lothian Books, South Melbourne.

**Assessment:**
- Test, Test Theory completed after first week of two week burst mode, 25%. Assignment, Logbook Assignment, 50%. Test, Practical test, 25%.
SCL3001 Exercise, Health and Disease

Locations: Footscray Park.
Prerequisites: HIE2006 - Exercise Interventions for Healthy Populations
Description: This unit of study explores the relationship between regular physical activity (or lack thereof) and the incidence and severity of lifestyle-related diseases, such as cardiovascular disease, obesity, diabetes, cancer, lung disease osteoporosis and osteoarthritis. It considers the risk factors for the development of these diseases and how these can be modified by exercise. The practical component will explore screening tools for various diseases and considerations for exercise testing and prescription in clinical populations. The unit is ideal preparation for the Master of Clinical Exercise Science and Rehabilitation to become an Exercise and Sports Science Australia (ESSA) accredited Exercise Physiologist.
Credit Points: 12
Learning Outcomes: On successful completion of this unit, students will be able to:
1. Critically review the risk factors for the development of lifestyle-related, age-related, and other common diseases and conditions in relation to contemporary multi-ethnic Australian demographics;
2. Critically examine the evidence behind the current exercise guidelines for lifestyle-related chronic diseases and conditions;
3. Interrogate the relationship between symptoms of chronic disease and sedentary behaviours and demonstrate intellectual independence in solving complex, authentic problems;
4. Interpret appropriate screening tools to identify risk factors and stratify accordingly for chronic lifestyle-related diseases and conditions ahead of participation in an exercise program, exemplifying professional accountability;
5. Critically interpret the risk factors for metabolic, respiratory, cardiovascular and musculoskeletal, and neurological diseases and conditions that require consultation with a medical practitioner before participating in, or changing, a physical activity program; and
6. Collaborate to resolve complex problems with cultural sensitivity and communicate solutions to wide-ranging audiences.
Class Contact: Lab 2.0 hrs Lecture 2.0 hrs
Assessment: Test, 3 x in class tests on seminar lecture and tutorial material, 20%. Assignment, Write up as a case study (from lab/tutorial work), 20%. Practicum, 3 x assess practical skills required to perform initial clinical screening of clients with chronic lifestyle-related diseases, 20%. Examination, Exam of all theoretical/material presented in all activities, 40%.

SCL3002 Sport and Exercise Science Capstone

Locations: Footscray Park.
Prerequisites: Nil.
Description: This unit is designed as the second part of a Capstone project taken by students in the final year of the ABHE program. It is designed to consolidate the students’ undergraduate clinical training via contemplative inquiry, interview and post-interview reflection of current practitioners (accredited exercise physiologists) and clinicians (e.g. cardiologists, endocrinologists, dietitians, physios etc) and a reflective, evidence-based analysis of key conditions affecting the health of society. The theoretical and applied aspects of this unit include a critical reflection of the role, scope and impact of professionals who treat clients (patients) with clinical conditions, informed both by theoretical knowledge from the disciplines of physiology, biomechanics, motor control, anatomy, psychology, sociology, and ethics, and professional knowledge from resistance training, exercise interventions, first aid and career and professional development. Students are required to participate in a number of key phases and activities of the program or project and write a major report, with a conference presentation, that outlines the processes and outcomes of the project.
Credit Points: 12
Learning Outcomes: On successful completion of this unit, students will be able to:
1. Conceptually map and interrogate the issues and challenges of designing, planning and implementing an exercise intervention as part of the clinical treatment plan of a population group with a specified condition, in order to achieve optimal health and well-being outcomes;
2. Critically reflect upon the provision of services to the population group living with this condition, by both accredited exercise physiologists and other clinicians;
3. Use evidence bases to construct a synthesis of different approaches in the design and provision of clinical exercise services for this group;
4. Identify and critically review the ethical and legal responsibilities, and professional and interprofessional requirements, regarding the provision of clinical exercise services to this group (within the context of a standard treatment regimen); and
5. Compose a reflective research paper and conference presentation which will outline the review of literature and evidence-based methods of intervention established to improve health and well-being for this group.
Class Contact: Lecture 1.5 hrs Tutorial 1.0 hr
Required Reading: Selected readings will be made available via the unit VU Collaborate site.
Assessment: Annotated Bibliography, Endnote file comprising references relating to the chosen clinical case study condition of interest (week 3), 5%. Other, Clinician (e.g. cardiologist, endocrinologist, dietitian, physio) and practitioner (Accred. Ex. Physiologist, AEP) interview questions (week 6), 5%. Report, Clinician (e.g. cardiologist, endocrinologist, dietitian, physio) and AEP interview script, and student reflective report (week 10), 40%. Case Study, Case study of population group intervention and conference style presentation on case study (submit in week 11; presentations in week 11+12 classes), 50%.

SCL3003 Corrective Exercise Prescription and Injury Management

Locations: Footscray Park.
Prerequisites: HIE2006 - Exercise Interventions for Healthy Populations
Description: Injuries are the unwanted side effects of active engagement in sport and physical activity (e.g., it is estimated that annually, 1 in 6 Australians suffers a sports-related injury). Exercise professionals often witness injuries first-hand and are frequently responsible for initial injury management until professional help (e.g., sports medicine physicians, accredited exercise physiologists and physiotherapists) is sought when major injuries occur or for the ongoing management of minor injuries. In contrast with the typical treatment model of rehabilitation after injury, it is well known that “prevention is better than cure”. Too often injury prevention is neglected, as the focus is on post-injury rehabilitation. In this respect, exercise professionals should possess an evidence-based approach to address neuromuscular dysfunction in apparently healthy clients/athletes via corrective exercise training consisting of preventative measures (“pre-habilitation”) to reduce the likelihood of injury, and promote a safe and sound return to exercise, physical activity or sport participation if injury does occur. Please Note: It is a requirement that students possess current First Aid and CPR certification from a recognised provider (e.g., St John’s Ambulance, Lifesaving Victoria, Red Cross) prior to enrolling in this Unit.
Credit Points: 12
Learning Outcomes: On successful completion of this unit, students will be able to:
1. Investigate common injuries that occur in sport and with physical activity, and
1. Analyse and synthesise information regarding specific physiological and other
   demands of a mode of training or sport;  
2. Critically evaluate and apply physical training practices within different modes of training and sports, in order to optimise
   the physical capacities that are important for performance;  
3. Devise conditioning programs for a variety of athletes demonstrating critical thinking, creativity and
   judgement, based on training variables important for the achievement of physical performance goals;  
4. Formulate athlete monitoring systems (specific to sport/s) in diverse contexts and present data on the success of these models in an effective
   manner; and  
5. Adapt and manipulate training variables, so as to achieve desired physical responses from individual athletes.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:

1. Analyse and synthesise information regarding specific physiological and other
   demands of a mode of training or sport;  
2. Critically evaluate and apply physical training practices within different modes of training and sports, in order to optimise
   the physical capacities that are important for performance;  
3. Devise conditioning programs for a variety of athletes demonstrating critical thinking, creativity and
   judgement, based on training variables important for the achievement of physical performance goals;  
4. Formulate athlete monitoring systems (specific to sport/s) in diverse contexts and present data on the success of these models in an effective
   manner; and  
5. Adapt and manipulate training variables, so as to achieve desired physical responses from individual athletes.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:

1. Analyse and synthesise information regarding specific physiological and other
   demands of a mode of training or sport;  
2. Critically evaluate and apply physical training practices within different modes of training and sports, in order to optimise
   the physical capacities that are important for performance;  
3. Devise conditioning programs for a variety of athletes demonstrating critical thinking, creativity and
   judgement, based on training variables important for the achievement of physical performance goals;  
4. Formulate athlete monitoring systems (specific to sport/s) in diverse contexts and present data on the success of these models in an effective
   manner; and  
5. Adapt and manipulate training variables, so as to achieve desired physical responses from individual athletes.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:

1. Analyse and synthesise information regarding specific physiological and other
   demands of a mode of training or sport;  
2. Critically evaluate and apply physical training practices within different modes of training and sports, in order to optimise
   the physical capacities that are important for performance;  
3. Devise conditioning programs for a variety of athletes demonstrating critical thinking, creativity and
   judgement, based on training variables important for the achievement of physical performance goals;  
4. Formulate athlete monitoring systems (specific to sport/s) in diverse contexts and present data on the success of these models in an effective
   manner; and  
5. Adapt and manipulate training variables, so as to achieve desired physical responses from individual athletes.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:

1. Analyse and synthesise information regarding specific physiological and other
   demands of a mode of training or sport;  
2. Critically evaluate and apply physical training practices within different modes of training and sports, in order to optimise
   the physical capacities that are important for performance;  
3. Devise conditioning programs for a variety of athletes demonstrating critical thinking, creativity and
   judgement, based on training variables important for the achievement of physical performance goals;  
4. Formulate athlete monitoring systems (specific to sport/s) in diverse contexts and present data on the success of these models in an effective
   manner; and  
5. Adapt and manipulate training variables, so as to achieve desired physical responses from individual athletes.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:

1. Analyse and synthesise information regarding specific physiological and other
   demands of a mode of training or sport;  
2. Critically evaluate and apply physical training practices within different modes of training and sports, in order to optimise
   the physical capacities that are important for performance;  
3. Devise conditioning programs for a variety of athletes demonstrating critical thinking, creativity and
   judgement, based on training variables important for the achievement of physical performance goals;  
4. Formulate athlete monitoring systems (specific to sport/s) in diverse contexts and present data on the success of these models in an effective
   manner; and  
5. Adapt and manipulate training variables, so as to achieve desired physical responses from individual athletes.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:

1. Analyse and synthesise information regarding specific physiological and other
   demands of a mode of training or sport;  
2. Critically evaluate and apply physical training practices within different modes of training and sports, in order to optimise
   the physical capacities that are important for performance;  
3. Devise conditioning programs for a variety of athletes demonstrating critical thinking, creativity and
   judgement, based on training variables important for the achievement of physical performance goals;  
4. Formulate athlete monitoring systems (specific to sport/s) in diverse contexts and present data on the success of these models in an effective
   manner; and  
5. Adapt and manipulate training variables, so as to achieve desired physical responses from individual athletes.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:

1. Analyse and synthesise information regarding specific physiological and other
   demands of a mode of training or sport;  
2. Critically evaluate and apply physical training practices within different modes of training and sports, in order to optimise
   the physical capacities that are important for performance;  
3. Devise conditioning programs for a variety of athletes demonstrating critical thinking, creativity and
   judgement, based on training variables important for the achievement of physical performance goals;  
4. Formulate athlete monitoring systems (specific to sport/s) in diverse contexts and present data on the success of these models in an effective
   manner; and  
5. Adapt and manipulate training variables, so as to achieve desired physical responses from individual athletes.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:

1. Analyse and synthesise information regarding specific physiological and other
   demands of a mode of training or sport;  
2. Critically evaluate and apply physical training practices within different modes of training and sports, in order to optimise
   the physical capacities that are important for performance;  
3. Devise conditioning programs for a variety of athletes demonstrating critical thinking, creativity and
   judgement, based on training variables important for the achievement of physical performance goals;  
4. Formulate athlete monitoring systems (specific to sport/s) in diverse contexts and present data on the success of these models in an effective
   manner; and  
5. Adapt and manipulate training variables, so as to achieve desired physical responses from individual athletes.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:

1. Analyse and synthesise information regarding specific physiological and other
   demands of a mode of training or sport;  
2. Critically evaluate and apply physical training practices within different modes of training and sports, in order to optimise
   the physical capacities that are important for performance;  
3. Devise conditioning programs for a variety of athletes demonstrating critical thinking, creativity and
   judgement, based on training variables important for the achievement of physical performance goals;  
4. Formulate athlete monitoring systems (specific to sport/s) in diverse contexts and present data on the success of these models in an effective
   manner; and  
5. Adapt and manipulate training variables, so as to achieve desired physical responses from individual athletes.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:

1. Analyse and synthesise information regarding specific physiological and other
   demands of a mode of training or sport;  
2. Critically evaluate and apply physical training practices within different modes of training and sports, in order to optimise
   the physical capacities that are important for performance;  
3. Devise conditioning programs for a variety of athletes demonstrating critical thinking, creativity and
   judgement, based on training variables important for the achievement of physical performance goals;  
4. Formulate athlete monitoring systems (specific to sport/s) in diverse contexts and present data on the success of these models in an effective
   manner; and  
5. Adapt and manipulate training variables, so as to achieve desired physical responses from individual athletes.
pneumonia, bronchiectasis, cystic fibrosis, tuberculosis, respiratory distress syndrome, and acute respiratory tract infections.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:

1. Demonstrate, evaluate and apply knowledge of normal and abnormal metabolism related to the pathophysiology of ESSA-defined metabolic and respiratory conditions;

2. Research, evaluate, and critically appraise the literature relating to clinical exercise testing and exercise prescription for metabolic and respiratory diseases; and

3. Critically evaluate and apply knowledge of clinical exercise testing and exercise prescription for patients presenting with metabolic and respiratory conditions.

Class Contact: Lab 2.0 hrs; Lecture 2.0 hrs

Assessment: Report, GP report, 10%; Test, 4 x in-class individual and team quizzes (7.5% each), 30%; Practicum, 3 x in-class practical assessments (Hurdle), 30%; Portfolio, Case study presentation and written report, 30%. Hurdle 1: To gain an overall pass in this unit, students must attend and complete 80% of the tutorial sessions. Hurdle 2: Successful completion of the end of semester practical examination (receive at least 60% in the practical exam).

SCL6103 Exercise Assessments and Interventions for Cardiovascular Conditions

Locations: Footscray Park.

Prerequisites: Nil.

Description: The learning for this unit of study focuses on exercise assessments and interventions for cardiovascular conditions; this being a core knowledge and skills category requirement for graduates seeking professional accreditation with Exercise & Sports Science Australia (ESSA). It will include exercise testing and prescription for a range of conditions, including but not limited to cardiovascular pathophysiology and rehabilitation including ischemic, myocardial, pericardial and valvular disease, heart failure, and hypertension.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:

1. Comprehend, analyse and apply knowledge to operate within the scope of professional roles available to clinical exercise practitioners, and how these intersect with the roles of other health professionals; 2. Evaluate, assess and design assessment methods and protocols; 3. Critically analyse and interpret data with high degrees of accuracy to discriminate between clinical and functional (eg exercise capacity) outcomes; 4. Appraise, recommend and deliver exercise interventions; and 5. Integrate and evaluate the use of evidence-based medicine in the design and provision of clinical exercise services.

Class Contact: Lecture 2.0 hrs; Tutorial 2.0 hrs

Assessment: Examination, Weekly theory quizzes, 35%; Practicum, Practical assessments, 30%; Practicum, End of semester practical exam (Hurdle), 35%. Hurdle 1: To gain an overall pass in this unit, students must attend and complete 80% of the tutorial sessions. Hurdle 2: Successful completion of the end of semester practical examination (receive at least 60% in the practical exam).

SCL6104 Clinical Exercise Practice

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit of study meets the National University Course Accreditation (NUCAP) core knowledge and skills criteria for professional education in clinical exercise practice. Students will be introduced to a range of professional roles undertaken by clinical exercise physiologists and be offered perspectives on the roles of other team members in the interdisciplinary rehabilitation processes. Students will have opportunities to observe clinical exercise professionals in the design, implementation and evaluation of exercise and physical activity programs, and to learn about equipment, facilities and program planning that are used in exercise delivery for clinical populations. Learning will be conducted in a practical case-based clinical setting under supervision whilst working with clients carrying a range of chronic conditions. Students will be supervised in the workplace by an approved supervisor, with additional mentoring by university staff. Under supervision, students will practise with real clients and document their learned experiences working as student practitioners with clients.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:

1. Comprehend, analyse and apply knowledge to operate within the scopes of professional roles available to clinical exercise practitioners, and how these intersect with the roles of other health professionals; 2. Evaluate, assess and design assessment methods and protocols; 3. Critically analyse and interpret data with high degrees of accuracy to discriminate between clinical and functional (eg exercise capacity) outcomes; 4. Appraise, recommend and deliver exercise interventions; and 5. Integrate and evaluate the use of evidence-based medicine in the design and provision of clinical exercise services.

Class Contact: Lecture 2.0 hrs; Tutorial 2.0 hrs

Required Reading: Selected readings will be made available via the unit VU Collaborate site.

Assessment: Assignment, Clinical "SOAP" Note writing, 10%; Examination, End of semester written examination, 30%; Practicum, Practical practicum supervisor feedback report, 60%. Hurdle: Student must pass a placement preparation exam in order to commence clinical placements.

SCL6201 Psychology for Rehabilitation

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit of study aims to develop in students a basic understanding of the psychological aspects of rehabilitation. It is not intended that graduates of the unit will be equipped to provide the primary psychological care of rehabilitation clients because in most instances they are part of a team which includes clinical and neuropsychologists. However, they should have an understanding of the psychological aspects of the rehabilitation process. The unit will include the following topics: counselling and interview skills - verbal and nonverbal, listening skills, body language, human interaction; human behaviour and development, lifestyle, life cycle, life crisis, life development; coping with grief and loss; coping with chronic pain; stress management, anxiety and depression; self-confidence, development and maintenance, particularly in the transitions which occur during rehabilitation; motivation, intrinsic, extrinsic, goal orientations, self-efficacy, goal setting, physical, psychological and technical.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Comprehend, compare and contrast the psychological processes in rehabilitation;
2. Critically evaluate the importance and influence of client-practitioner relationships in rehabilitation;
3. Practise, test, revise and learn to use mental skills in applied settings;  
4. Evaluate, assess and develop strategies to improve client self-management, adherence and compliance to rehabilitation programs; and  
5. Critically analyse the importance of counselling and support for clients during the rehabilitation process. When to refer to other appropriate allied health professionals. 

Class Contact: Lecture 2.0 hrs

Assessment: Case Study, Case Study, 15%. Assignment, Review paper, 35%. Assignment, Intake interview, 50%.

SCIL6202 Exercise Assessments and Interventions for Musculoskeletal Conditions

Locations: Footscray Park.

Prerequisites: Nil.

Description: The learning for this unit of study focuses on exercise assessments and interventions for musculoskeletal conditions; this being a core knowledge and skills category requirement for graduates seeking professional accreditation with Exercise & Sports Science Australia (ESSA). This unit of study will cover a range of topics relating to acute, sub-acute, and chronic musculoskeletal conditions in practice. The theory component of this unit will cover the pathophysiology and presentation of a wide range of conditions throughout the musculoskeletal system. The practical component will cover a range of assessment procedures, including tests relating to posture and gait assessment; palpation & surface anatomy; manual muscle testing, goniometry; passive/resisted muscle testing and special tests.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Comprehend, explain and apply a comprehensive knowledge of a range of acute, sub-acute and chronic musculoskeletal conditions;  
2. Critically evaluate research relating to a range of assessment procedures and techniques to allow for competent assessment of acute, sub-acute and chronic musculoskeletal conditions; 
3. Assess, understand and summarise clinical statuses, stages of rehabilitation and relevant testing procedures for musculoskeletal conditions; 
4. Critically understand and evaluate evidence relating to test results for acute, sub-acute and chronic musculoskeletal conditions; and  
5. Integrate, discriminate and apply a thorough understanding of the ethical and professional elements of client management.

Class Contact: Tutorial 1.0 hr Practical 12 x 2 hours

Assessment: Test, in class quizzes, 20%. Assignment, Written report and presentation, 20%. Examination, End of semester practical examination (HURDLE), 30%. Examination, End of semester written examination, 30%. Total effective work limit 6,000 words. Hurdle 1: To gain an overall pass in this unit, students must attend and complete 80% of the tutorial sessions. Hurdle 2: Successful completion of the end of semester practical examination (receive at least 60% in the practical exam).

SCIL6203 Exercise Assessments and Interventions for Neurological Conditions

Locations: Footscray Park.

Prerequisites: Nil.

Description: The learning for this unit focuses on exercise assessments and interventions for neurological conditions; this being a core knowledge and skills category requirement for graduates seeking professional accreditation with Exercise & Sports Science Australia (ESSA). This unit will give students information on exercise methods and their applications for clients with a range of neurological pathologies. The unit will cover the exercise assessment and exercise prescription for a range of neurological conditions including (but not limited to): back pain and spinal surgeries; neural impingement syndromes, stroke and acquired brain injury, spinal cord injury, multiple sclerosis, Parkinson’s disease, and muscular dystrophy.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Demonstrate an advanced and integrated understanding of a range of acute, sub-acute and chronic neurological and neuromuscular conditions;
2. Research and apply established theories and methods to clinical exercise physiology practice when working with clients with neurological and neuromuscular conditions. 
3. Critically analyse, evaluate, and synthesise complex information about a range of assessment procedures and techniques to facilitate evidence-based and competent assessment of a range of neurological and neuromuscular conditions.  
4. Critically analyse, evaluate, and synthesise complex information about a range of exercise methods to facilitate evidence-based and competent exercise prescription for a range of neurological and neuromuscular conditions. 
5. Integrate and transmit knowledge, skills, and ideas associated with the assessment and exercise-based treatment of neurological and neuromuscular conditions to a range of stakeholders, including healthcare professionals and clients.

Class Contact: Lab 2.0 hrs Lecture 2.0 hrs

Assessment: Essay, 2000 word literature review based on one of the neurological conditions examined in lectures and tutorials., 20%. Presentation, Group-based peer-teaching presentation of exercise assessment, prescription, and instruction based on a neurological case study., 25%. Test, In-class test consisting of 10 multiple choice questions knowledge and five short-answer questions assessing factual knowledge and clinical reasoning., 20%. Other, Practical exam assessing clinical skills using role-play, 35%. Hurdle 1: Successful completion of the end of semester practical examination (receive at least 60% in the practical exam).

SCIL6204 Occupational Health and Exercise Rehabilitation

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit of study meets the National University Course Accreditation (NUCAP) core knowledge and skills criteria for professional education in occupational health and exercise rehabilitation. Students will practice the measurement, interpretation and communication of physiological data of workers and how these interrelate to workers’ exposure to environmental and occupational stressors. Students will explore the role of exercise conditioning for manual processes and office/home workers in managing risks factors (including lifestyle factors) and/or current or past injuries and preventable illnesses/diseases. They will also practise the prescription of both individual and group work-oriented exercise programmes involving workers in simulated or actual work tasks. Students will develop awareness of cultural and socio-economic issues that might affect the workplace, and the assessment of workers for workplace injuries and recommended therapies/exercise management and rehabilitation.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Research, evaluate, and critically appraise the clinical exercise testing literature relating to the measurement and interpretation of physiological/psychological data obtained from the workplace/home environment; 2. Critically evaluate, design, and implement clinical exercise programmes appropriate for the workplace/home environment; 3. Competently develop programmes that will promote a healthy lifestyle in the workplace, with a view to primary and secondary prevention of avoidable illness and injury; 4. Critically examine and appraise cultural and socio-economic issues that might affect clinical exercise testing and prescription in the workplace; 5. Compare and contrast medicinal effects of prescription/non-prescription medicine for conditions relevant to the workplace/home environment; 6. Research, evaluate, and critically apply skills that identify modes, frequencies, intensities, and volumes of exercise that are contraindicated for clients in the workplace/home environment with Accredited Exercise Physiology-target pathologies, from both an acute and chronic perspective.

Class Contact: Lecture 2.0 hrs Tutorial 2.0 hrs

Assessment: Best, Mid semester written exam, 25%. Assignment, Literature review, Manual Handling, Functional Job Analysis, or Office Ergonomic Assessment, 50%. Presentation, Oral presentation, 20%. Practicum, Site visits (hurdle requirement), 5%.

SES3000 International Sports Study Tour: Practicum

Locations: Footscray Park, Off-Campus.

Prerequisites: Nil.

Description: This unit is designed for students enrolled in the College of Sport and Exercise Science and acts to facilitate international experiences and learning opportunities. Specifically this unit will call upon students to utilise the skills, knowledge and expertise that they have developed during their degree in a range of community contexts in an international setting. The focus of this unit is for the student to begin to gain an understanding of your own cultural values and then explore the language, culture and sports system of the country that they are visiting by engaging in reflection about a series of real life intercultural teaching and learning experiences. These experiences will be grounded primarily within direct participatory engagement with a variety of sport communities such as attending professional sporting events, joining in grass roots practice, and incidental physical activity. This will result in a broadening of your experience and understanding of communities of practice and result in an ability to engage more critically, and with greater diversity, on one’s return to Australia. This unit is designed for students in 2nd and 3rd years and enrolment in this unit is subject to an application process that requires approval from the course coordinator.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students are expected to be able to:
- Compare various communities of sport practice in an international setting
- Explain the major cultural and social influences that come to shape these communities of practice
- Develop skills in observation and analysis and use these to assess the strengths and weaknesses of various communities of practice
- Relate the experience of being involved in communities of practice in an international setting to one’s own sport and exercise communities in Australia

Class Contact: 36 hours which will be delivered in burst mode in an off shore setting

Required Reading: None

Assessment: None

SES3001 International Sports Study Tour: Communities

Locations: Footscray Park, Off-Campus.

Prerequisites: Nil.

Description: This unit of study is designed for students enrolled in the College of Sport and Exercise Science and acts to facilitate international experiences and learning opportunities. Specifically this unit will call upon students to utilise the skills, knowledge and expertise that they have developed during their degree in a range of community contexts in an international setting. The focus of this unit is for the student to begin to gain an understanding of your own cultural values and then explore the language, culture and sports system of the country that they are visiting by engaging in reflection about a series of real life intercultural teaching and learning experiences. These experiences will be grounded primarily within direct participatory engagement with a variety of sport communities such as attending professional sporting events, joining in grass roots practice, and incidental physical activity. This will result in a broadening of your experience and understanding of communities of practice and result in an ability to engage more critically, and with greater diversity, on one’s own communities of practice. This unit is designed for students in 2nd and 3rd years and enrolment in this unit is subject to an application process that requires approval from the course coordinator.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students are expected to be able to:
- Demonstrate an understanding of other cultures and societies through sport and exercise in an international context;
- Compare various sports settings and explain cross cultural similarities and differences;
- Develop attributes in problem-solving, using information, oral and written communication, working autonomously and collaboratively and working in socially and culturally diverse contexts;
- Develop long term relationships with future professionals in sport and exercise in the international location through sports engagement and various student interactions;
- Connect their professional skills and knowledge (for example sports coaching, training etc) to international settings through a practicum experience.

Class Contact: 36 hours which will be delivered in burst mode in an off shore setting

Required Reading: None

Assessment: Other, Photo essay of community practices in sport and exercise, Pass/Fail. Practicum, Volunteer placement in international sports setting, Pass/Fail. Minimum effective word limit of 3000 words in total, or equivalent.
Prerequisites: Nil.

Description: This unit of study is designed to develop theoretical knowledge and technical skills in applying group fitness strategies and approaches. An understanding of how group fitness influences fitness participation, and engagement and adherence in physical activity is fostered including analysis of strategies to encourage and support participation. Knowledge of planning, developing and delivering group fitness activities, including leading and managing groups, delivery of exercise, and modification of activities to client fitness levels will all be applied to practice. Students will develop their knowledge and skills through exploration of a range of group fitness activities such as choreographed and non-choreographed exercise to music activities, bootcamp, aqua aerobics, mind and body, cycle, boxing, and circuits.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Critically review the role of group fitness strategies to support health and encourage participation in physical activity;
2. Devise and apply group fitness strategies and approaches to encourage participation in physical activity;
3. Consolidate and synthesise group fitness knowledge to develop resources to support professional practice;
4. Present effective instruction in group fitness activities to support participation in physical activity;
5. Reflect on professional practice in group fitness to develop knowledge of the fitness profession.

Class Contact: Lecture 1.0 hr, Tutorial 2.0 hrs

Required Reading: Selected readings will be made available via the unit VU Collaborate site.

SFI2001 Fitness Training Systems

Locations: Footscray Park.

Prerequisites: Nil.

Description: In this unit students will develop knowledge and skills in the application of fitness training systems based on contemporary practice in fitness and exercise training to support participation in physical activity. An understanding of training principles, including modifications to programs, and planning, developing and delivering programs will be fostered through practical activities. Students will explore, analyse, research, develop and deliver programs in a range of training systems such as kettleball TRX, gymstick, myofascial release, plyometrics, cross training, and functional fitness to apply their knowledge and skills to professional practice for developing functional movement outcomes for participation.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Critically review and evaluate the efficacious use of a fitness training system to support participation in physical activity and health;
2. Devise and apply fitness training systems to encourage participation in physical activity;
3. Consolidate and synthesise knowledge of fitness training systems to develop resources to support professional practice;
4. Present effective instruction in fitness training systems to support participation in physical activity;
5. Communicate knowledge and ideas about fitness training systems to others in a clear, coherent and independent manner.

Class Contact: Lecture 1.0 hr, Tutorial 2.0 hrs

Required Reading: Selected readings will be made available via the unit VU Collaborate site.

Assessment: Report, Review of research on a fitness training system, 30%. Test, Practical test, 20%. Project, Develop a program using a fitness training system, 20%. Presentation, Multimedia presentation on a fitness training system aimed at clients, 30%.

SFI3000 Fitness Training for all Populations

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit is designed to encourage students to reflect on and understand the design and delivery of fitness and physical activities for all individuals. Students will consider a range of variables influencing participation in exercise and fitness (e.g., personal, sociocultural, socioeconomic, psychological) to develop an appreciation of diverse needs and specific requirements of individuals. Literature related to inclusive practice will be evaluated in relation to engagement in fitness and physical activity to develop knowledge and skills to support participation. Students will report on inclusive practice in the profession and explore how to develop programs to be sensitive and responsive to all participants.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Critically analyse and review theoretical knowledge and practices and adapt these to develop innovative programs in physical activity settings;
2. Investigate and analyse a variety of issues to develop professional approaches to address specific issues when working with different population groups;
3. Exhibit professional, ethical and socially sensitive judgements by adapting knowledge and skills to make inclusive and culturally relevant outcomes to physical activities;
4. Integrate a broad technical and theoretical knowledge of physical activity, exercise and fitness to the notion of inclusive practice in this context.

Class Contact: Lecture 1.0 hr, Tutorial 1.5 hrs

Required Reading: Selected readings will be made available via the unit VU Collaborate site.

Assessment: Report, Research report on inclusive practice, 30%. Case Study, Development of a program for inclusive practice, 40%. Report, Research report on practicum experience — observe diverse population group fitness activities, 30%.

SFS6001 Current Issues and Trends in Football

Locations: Footscray Park.

Prerequisites: Nil.

Description: In this unit students are provided with a broad sport/football industry context. This (global) context will be used to position what are the most current and pressing issues in the industry. Issues will be considered at three levels of application, industry organisational, and individual athlete/coach performance level. Current issues relate to matters that will significantly influence the short and long term future of the (football) industry and may include macro trends (such as the rising popularity of football in Asia), organisational changes (such as the application of financial fair play regulation) or football performance issues (such as the increasing application of digital technologies to improving, measuring but also broadcasting performance). The unit has been developed for students from a variety of disciplinary backgrounds, and the main purpose of the unit is to ensure all students have a consistent basis upon which to consider the current state of the industry - and what will drive change in the immediate future and in years to come. The unit is foundational in regards to preparing students for a dynamic and constantly changing football industry environment.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Assess the main drivers of change in the football industry and how this may
Selected readings will be made available via the unit VU Collaborate site.

On successful completion of this unit, students will be able to:

- Interprofessional Collaboration: From Policy to Practice in Health

This unit is designed to develop the student's awareness of the principles of integrity and ethical conduct in sport business and sport science/performance management. The unit will facilitate the development of the student's ability to understand the ethical underpinnings and implications of various policies, practices and relationships in order to promote best practice and integrity in sport operations. Special attention will be paid to ethical reasoning and its practical application to key issues (e.g., anti-doping, match fixing, anti-discrimination); and those related to sport governance and management; as well as sport medicine and allied health practice.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:

1. Evaluate personal and professional development in the area of integrity and ethics throughout the unit;
2. Analyse integrity principles and ethical reasoning approaches as applied to practical sport cases;
3. Critique complex sport business or applied sport science/performance management issues; problems, policies, practices and behaviours; and
4. Argue effectively as principle-based practitioners.

**Class Contact:** 8 hours face-to-face in burst mode; 28 hours on-line.

**Required Reading:** Selected readings will be made available via the unit VU Collaborate site.

**Assessment:**

**SFS6003 Communication in An Interprofessional Practice**

**Locations:** City Flinders.

**Prerequisites:** Nil.

**Description:** The capacity of exercise science professionals to work as a member of a team comprising individuals from various professions directly determines the success of a football conditioning / injury management program. In this unit students will gain an understanding of the theoretical concepts underpinning communication and interprofessional practice and how to implement these in the football environment. This unit will develop the knowledge and skills necessary for successful football department interprofessional practice. The material will assist sport scientists to communicate effectively with other professionals and occupational groups for the benefit of footballers. The delivery of the unit is a combination of self-directed learning and interactive workshops focusing on theoretical knowledge and practical skills. The skills gained by students in this unit are applicable for current and future work in the football sector.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:

1. Contextualise organisational communication practices in relation to interpersonal, structural and technological issues;
2. Discuss and apply significant communication theories and research in relation to common issues arising in contemporary organisational communication;
3. Plan and execute a case study which synthesises a critical understanding of theory and practice in a contemporary organisation; and
4. Present complex material which articulates the application of theory to organisational communication practice.

**Class Contact:** Tutorial 2.5 hrs 15 hours face-to-face in burst mode and 15 hours on-line.

**Required Reading:** Interprofessional Collaboration: From Policy to Practice in Health and Social Care Audrey Leathard, Taylor & Francis, 24 Jul 2003.

**Assessment:**
- Journal, Students will post on a discussion board a series of written reflections based on inter-professional practice experiences in their workplace., 20%.
- Case Study, Students will use a case study based on common issues arising in contemporary organisational communication to contextualise and apply theories, 30%.
- Assignment, Students will interrogate and report a real world case study of organisational change where a communication strategy or plan was put in place, 50%.

**SFS6004 Integrated Athlete to Monitoring**

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** Sports scientists must be able to monitor their athletes on a daily basis. Athlete load can be monitored internally (how the athlete feels) and externally (the work the athlete does during training) which can then be used as a marker of the athletes adaptation to their training program. This unit will give students exposure to the various methods of athlete monitoring and provide a framework for integrating this information into a single interface. Students will gain an understanding of the theory and application of athlete monitoring including: jumps testing, GPS, training load, match load and markers of adaptation to training load (including maladaptation). Students will develop the ability to critically appraise the various player load variables used by sport scientists.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:

1. Evaluate personal and professional development in the area of integrity and ethics throughout the unit;
2. Analyse integrity principles and ethical reasoning approaches as applied to practical sport cases;
3. Critique complex sport business or applied sport science/performance management issues; problems, policies, practices and behaviours; and
4. Argue effectively as principle-based practitioners.

**Class Contact:** 8 hours face-to-face in burst mode; 28 hours on-line.

**Required Reading:** Selected readings will be made available via the unit VU Collaborate site.

**Assessment:**

**SFS6005 Monitoring Load and Recovery in Football**

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** The capacity of exercise science professionals to work as a member of a team comprising individuals from various professions directly determines the success of a football conditioning / injury management program. In this unit students will gain an understanding of the theoretical concepts underpinning communication and interprofessional practice and how to implement these in the football environment. This unit will develop the knowledge and skills necessary for successful football department interprofessional practice. The material will assist sport scientists to communicate effectively with other professionals and occupational groups for the benefit of footballers. The delivery of the unit is a combination of self-directed learning and interactive workshops focusing on theoretical knowledge and practical skills. The skills gained by students in this unit are applicable for current and future work in the football sector.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:

1. Contextualise organisational communication practices in relation to interpersonal, structural and technological issues;
2. Discuss and apply significant communication theories and research in relation to common issues arising in contemporary organisational communication;
3. Plan and execute a case study which synthesises a critical understanding of theory and practice in a contemporary organisation; and
4. Present complex material which articulates the application of theory to organisational communication practice.

**Class Contact:** Tutorial 2.5 hrs 15 hours face-to-face in burst mode and 15 hours on-line.

**Required Reading:** Interprofessional Collaboration: From Policy to Practice in Health and Social Care Audrey Leathard, Taylor & Francis, 24 Jul 2003.
On successful completion of this unit, students will be able to:
1. Analyse a case study, gathering and analysing data and writing a thesis.
2. Design a project, research proposal, 30%. Exercise, Weekly online exercise based on the content of the module, 70%.
3. Devise a literature review, gathering and analysing data and writing a thesis.
4. Consolidate results from various tools into a recommendation on subsequent load for an individual athlete; and
5. Translate load monitoring results to coaches, athletes and stakeholders via written communication.

**SFS7001 Research Methods**

**Locations:** Footscray Park, Online.
**Prerequisites:** Nil.
**Description:** This unit focuses on integrating the basic principles of quantitative and qualitative research methods with a contemporary approach to data analysis built on magnitude-based inferences in the specifics of sport sciences. The unit will provide graduates with the skills to conduct applied research that is relevant to the role of football practitioners, and to analyse and communicate research outcomes in a manner that can be understood by a variety of stakeholders (e.g. scientific community, coaches etc.). It will include a study of research methods both qualitative and quantitative, planning, forming and designing proposals, undertaking a literature review, gathering and analysing data and writing a thesis.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Analyse and critique the different types of load on an athlete;
2. Design a plan which combines a range of load monitoring tools and reflect different methods of data collection;
3. Interpret results from a range of monitoring tools and implement different statistical methods to determine athlete responses and variations;
4. Consolidate results from various tools into a recommendation on subsequent load for an individual athlete; and
5. Translate load monitoring results to coaches, athletes and stakeholders via written communication.

**Class Contact:** 10 hours face-to-face in burst mode and 14 hours on-line.
**Required Reading:** Selected readings will be made available via the unit VU Collaborate site.
**Assessment:** Assignment, Literature review of a selected load monitoring tool, 30%. Report, Design and implement a monitoring program on one or more athletes, 35%. Case Study, Based on several case studies students will formulate a written report on athlete load to a coach, 35%.

---

**SFS7002 Exercise Prescription in Football**

**Locations:** Footscray Park.
**Prerequisites:** Nil.
**Description:** High performance staff in football must be able to design appropriate conditioning programs to enhance the athletic capacity of footballers. This unit will give students exposure to the various methods of football-specific conditioning and provide a framework for integrating this information into a single program. Students will gain an understanding of the theory and application of conditioning, including physical capacities to develop, training principles, program progression and possible interference effects of various exercise modalities on each other. Students will develop the ability to critically appraise the conditioning programs used by high performance staff.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Contextualise and review the important physical capacities for football players;
2. Implement a range of training types to enhance important capacities;
3. Interpret results from a range of monitoring tools to manipulate training;
4. Verify the effectiveness of a training program; and
5. Articulate training results to coaches, athletes and stakeholders using verbal and written communication that is appropriate for the context and audience.

**Class Contact:** Workshop 2.0 hrs
**Assessment:** Assignment, Assignment on determinants of muscle function, 35%. Assignment, Assignment on assessing strength, power, speed and agility, 35%. Case Study, Based on several case studies students will formulate a written and verbal report on the success of a training program to a coach, 30%.

---

**SFS7003 Data Analytics & Technology**

**Locations:** Footscray Park.
**Prerequisites:** SFS6001 - Current Issues and Trends in Football/SFS7001 - Research Methods
**Description:** The information available to a sports scientist is diverse and constantly increasing due to advancements in technology and database and communication systems. Similarly data related to club memberships, promotional strategies, player contracts andviewership is readily available to sporting club managers. There is a need in sport to store, analyse, consolidate and interpret data and communicate this information to coaches and support staff in a timely manner. Additionally the sports scientist must be able to translate this information into practice. This unit will introduce students to data analytics (e.g. finding meaningful patterns within large data sets) and its use in sport. Students will learn how to manage large data sets from a range of sources including athlete tracking (e.g. GPS), injury, match statistics and athlete wellbeing. Students will be introduced to a range of analysis techniques and will learn how to develop their own algorithms and identify key-performance indicators. Students will learn how to critically appraise and use technology in order to complement their knowledge base and practice.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Design, implement and evaluate methods for the management of data;
2. Devise algorithms to identify key-performance indicators within data sets obtained from various sources;
3. Implement a range of statistical methods to interpret data that can be used for both short and long term practical applications;
4. Critically appraise and use technology to complement their knowledge base and
practice; and 5. Lucidate complex information based on big data sets to coaches and support staff.

**Class Contact:** 2.5 hours per week for 12 weeks; online lectures and online tutorials. Thirty (30) hours for one semester, comprising online lectures and burst mode face-to-face tutorials. The expectation for independent learning is 3 hours per week. Recommended out-of-class activities include: reading the assigned research papers, assignment work, study/revision of lecture content.

**Required Reading:** Research articles from 2014/2015 will be prescribed on a weekly basis to make it clear to students that this topic is quickly evolving and progressing and they must constantly read new research to stay up to date.

**Assessment:** Test, Four online quizzes, 40%. Project, Data analysis project, 45%. Presentation, Video-based presentation about the results of the project, 15%.

**SFS7004 Minor Thesis**

**Locations:** Footscray Park.

**Prerequisites:** SFS7001 - Research Methods

**Description:** In this unit, students independently conduct research which demonstrates their ability to define a problem, and search and review the relevant literature. Students develop a methodology and apply it to an appropriate problem or situation. They will develop good data collection and analysis skills, presenting the results in a written thesis of high standard. A supervisor is allocated to each student.

**Credit Points:** 24

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Critically review relevant and current scholarly literature/s relating to the thesis topic;
2. Conduct a substantial independent research project under supervision with a high level of personal autonomy and accountability;
3. Work collaboratively and ethically in designing and conducting research and communicating research outcomes;
4. Interrogate and challenge complex information, and synthesise a range of conceptual and empirical materials to draw defensible conclusions; and
5. Authoritatively and effectively communicate structured, coherent ideas in a sustained written composition at a standard acceptable for academic peer review.

**Class Contact:** Regular meetings with the chosen supervisor for the minor thesis will be of 1 hour per week. The remaining hours will be dependent on the data collection process.

**Required Reading:** Given the nature of this unit, the required readings will be provided by each Minor Thesis Supervisor at the beginning of the semester.

**Assessment:** Thes, Minor Thesis - Written work of 14,000 - 16,000 words, Pass/Fail.

**SFS7005 Industry Project**

**Locations:** Industry, Footscray Park. The Capstone task can be undertaken within any football club of choice.

**Prerequisites:** SFS7001 - Research Methods

**Description:** This unit focuses on drawing from theoretical knowledge and practical skills that the students developed during their degree, with the aim of producing a portfolio of evidence of how the introduction of a new methodology in the workplace changes its current practice. At the conclusion of this unit, students will have gained the ability to work independently and under supervision to conduct a defined workplace project and communicate the findings. The main difference with the Minor Thesis is that a Capstone must produce a measurable and applicable change to current practice which is documented mainly through the collection of a portfolio and presented via oral presentation.

**Credit Points:** 24

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Conceptually map the gaps in the current practice of their discipline inclusive of different cultural perspectives;
2. Work independently and collaboratively to conduct investigation with a high level of personal autonomy and accountability;
3. Critically review scholarly literature that may assist in conducting an investigation;
4. Devise a plan to apply outcomes of the investigation to innovate practice; and
5. Effectively communicate outcomes of the intervention to different stakeholders at both the local and global level.

**Class Contact:** Thirty-six (36) hours for one semester comprising 6 hours of face-to-face meetings with nominated supervisor and 30 hours of independent work in the workplace.

**Required Reading:** The required readings will be discussed with the supervisor of the project.

**Assessment:** Presentation, Oral presentation on the project proposal, 20%. Portfolio, Collection of evidence of the investigation performed and modification of the practice, 60%. Report, Written report summarising the results of the investigation, 20%.

**SFS7006 Talent Identification and Development in An International Context**

**Locations:** Footscray Park.

**Prerequisites:** SFS6004 - Integrated Athlete Monitoring

**Description:** This module is focused on the development of talent ID methodology in football. It will increase the graduates’ ability to design and direct training sessions that are tailored to the needs of football players according to their biological age and skill level. This unit will assist the students to gain deep knowledge regarding the training tools utilised in the development of young football players, with the ultimate aim of having a holistic view of training and strength & conditioning in youth football.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Conceptually map and reflect on the successful models of football player development to implement them in a plan;
2. Critically review and dispute new and available technologies to apply them in the development of young athletes; and
3. Design and evaluate specific training plans based on the performance models available for different age groups.

**Class Contact:** 30 hours in a one-week burst mode. Contact hours will be organised as follow: Five days of class, each with 6 hours of learning (4h of face-to-face class + 2h of attendance at a training session). Depending on the availability of youth football teams this could change slightly, but overall there will be 20h of face-to-face classes and 10h of training attendance.

**Assessment:** Assignment, Reflective journal aimed at creating a theoretical plan of Talent ID, 50%. Presentation, Oral Presentation; Implementation of plan, 50%.

**SFS7007 Global Leadership and Human Resource Management in Football**

**Locations:** Footscray Park.

**Prerequisites:** Nil

**Description:** This unit has been developed to provide students with an understanding of advanced concepts in leadership and human resources management applied to the specific context of football. As graduates of this Master degree, students will enter...
the football workplace which is typically very challenging and unstable in nature. This unit will provide the students with both the theoretical knowledge and practical tools to appreciate their own leadership style and improve the way they interact with other staff members and manage group dynamics.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Conceptually map leadership theory, practice and contemporary issues in a globalised football environment taking a critical perspective;
2. Show evidence of enhanced personal knowledge, skills and attributes (including cultural competence) as they relate to the effective exercise of leadership in football;
3. Develop a personal leadership statement and action plan that demonstrates sound critical analysis and an informed appraisal of an authentic sport leader;
4. Reflect on their current level of ability to both lead and work within teams to identify and solve complex problems, motivate and inspire others and act strategically in football; and
5. In collaboration with others, critically reflect on responsibility and accountability for conflict management and mediation.

Class Contact: 24 hours in a one week burst mode. Six, 4-hour classes within a one week burst mode module.

Assessment: Assignment, Reflective Journal to craft a leadership statement and plan, 50%. Presentation, Oral Presentation aimed at implementing a leadership plan, 50%.

SFS7008 Industry Internship

Prerequisites: SFS6001 - Current Issues and Trends in Football, SFS6002 - Sport Integrity and Ethics, SFS6005 - Monitoring Load and Recovery in Football.

Description: The aim of this unit is to provide students with an opportunity to gain workplace experience in a professional or semi-professional sporting environment. Building upon the knowledge acquired in the previous two semesters, students will be encouraged to independently perform tasks under supervision, and to lead the operations in a professional and ethical manner. The unit will also prepare students with knowledge, skills and attitudes required to enter the workforce as a professional in sport.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Critique the theoretical and practical knowledge acquired in the core units to design and implement evidence-based practices appropriate for the environment in which they are operating;
2. Critically reflect on their own role in the industry and the relationships with other professionals in the team;
3. Exhibit an ability to work ethically and safely in the industry;
4. Evaluate and debate the effectiveness of the practices implemented with other professionals; and
5. Conceptually map the necessary skills required to gain employment in the industry.

Class Contact: A minimum of 140 hours of placement within a 12-week period is required to satisfy the requirements of this unit.

Required Reading: Selected readings will be made available via the unit VU Collaborate site.

SFS7009 Video Analysis in Football Codes

Locations: Footscray Park.

Prerequisites: Nil.

Description: The industry of sport science and high performance in football codes requires practitioners to be aware of - and proficient in - many different areas of knowledge. Among them, video analysis is experiencing a period of incredible growth, due to the improvements in technology allowing coaches and sport scientists to film, code and analyse games or training sessions with relative ease. This unit aims at providing students with an advanced understanding of the requirements for video analysis in elite football settings by engaging with world-leader industry partners and by interacting with professionals in all major football codes in Melbourne. At the end of this unit you will be an accredited video analyst with theoretical knowledge of performance analysis, technical expertise, and in tune with how video analysis is used in sport science research. Important Note: this unit will require the use of a specific video analysis software that operates only on Apple Mac. Please contact the unit coordinator to discuss available options if you do not own a Mac and if you cannot get regular access to one for the duration of this unit.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Master fundamental video analysis skills in the football codes by demonstrating competence with an industry recognised best practice analysis program;
2. Deconstruct theory, technical and tactical elements of a game, categorise patterns and analyse results; and
3. Critically reflect on the game analysis and present to an interprofessional audience.

Class Contact: This unit will be featuring approximately 24 hours of content, organised as follows: An initial 4-hour online introductory block. A combination of burst-mode intensive weekends face-to-face online material. Three 4-hour intensive visits to football clubs’ Head of Performance Analysis.

Required Reading: Selected readings will be made available via the unit VU Collaborate site.

Assessment: Test, Online-based Quizzes to test knowledge of the basic elements of Video Analysis in Football., 25%. Project, Coding and analysis of pre-recorded football games., 25%. Presentation, Video-based presentation of the results of the project., 25%. Practicum, Set-up a live recording and coding session during a game., 25%.

SFS7010 Applied Sports Statistics

Locations: City Flinders.

Prerequisites: Nil.

Description: This unit focuses on integrating the basic principles of quantitative and qualitative research methods with a contemporary approach to data analysis built on magnitude-based inferences in the specific contexts of sport sciences. The unit will provide graduates with the skills to conduct applied research that is relevant to the role of football practitioners, and to analyse and communicate research outcomes in a manner that can be understood by a variety of stakeholders (e.g. scientific community, coaches etc.). It will include a study of research methods both qualitative and quantitative, planning, forming and designing proposals, undertaking a literature review, gathering and analysing data and writing a thesis.
**Credit Points:** 12  

**Learning Outcomes:** On successful completion of this unit, students will be able to:  
1. Analyse and critique contemporary perspectives and theories related to research in the field of sport and in particular football;  
2. Clarify the essential elements and processes involved in undertaking quality research in sport;  
3. Devise a literature review or analysis of current research in the field; and  
4. Design a research project to be undertaken as part of a minor thesis or industry project.

**Class Contact:** Unit is offered online with a 2 day face to face burst mode at the City Flinders campus.

**Assessment:** Project, Research proposal, 30%. Exercise, Weekly online exercise based on the content of the module, 70%.

**SFS7011 Enhancing Muscular Performance**

**Locations:** Online.

**Prerequisites:** Nil.

**Description:** High performance staff in football must be able to design appropriate conditioning programs to enhance the athletic capacity of footballers. This unit will give students exposure to the various methods of football-specific conditioning and provide a framework for integrating this information into a single program. Students will gain an understanding of the theory and application of conditioning, including key physical capacities to develop, training principles, program progression and possible interference effects of various exercise modalities on each other. Students will develop the ability to critically appraise the conditioning programs used by high performance staff.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:  
1. Justify the physiological and mechanical basis underlying balance, strength, power, speed and agility;  
2. Evaluate and critique current muscular and movement assessment techniques;  
3. Critique and implement current knowledge and research of training methods to optimise balance, strength, power, speed and agility; and,  
4. Present work at the appropriate academic standard.

**Class Contact:** Unit is offered 100% online.

**Assessment:** Assignment, Assignment on determinants of muscle function, 35%. Assignment, Assignment on assessing strength, power, speed and agility, 35%. Case Study, Based on several case studies students will formulate a written and verbal report on the success of a training program to a coach, 30%.

**SFS7012 Sports Analytics**

**Locations:** Footscray Park.

**Prerequisites:** SFS6001 - Current Issues and Trends in Football SFS7010 - Applied Sports Statistics

**Description:** The information available to a sports scientist is diverse and constantly increasing due to advancements in technology and database and communication systems. Similarly data related to club memberships, promotional strategies, player contracts and viewing data is readily available to sporting club managers. There is a need in sport to store, organise, consolidate and interpret data and communicate this information to coaches and support staff in a timely manner. Additionally the sports scientist must be able to translate this information into practice. This unit will introduce students to data analytics (e.g. finding meaningful patterns within large data sets) and its use in sport. Students will learn how to manage large data sets from a range of sources including athlete tracking (e.g. GPS), injury, match statistics and athlete wellbeing. Students will be introduced to a range of analysis techniques and will learn how to develop their own algorithms and identify key-performance indicators. Students will learn how to critically appraise and use technology in order to complement their knowledge base and practice.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:  
1. Design, implement and evaluate methods for the management of data;  
2. Devise algorithms to identify key performance indicators within data sets obtained from various sources;  
3. Implement a range of statistical methods to interpret data that can be used for both short and long term practical application;  
4. Appraise and use technology to complement their knowledge base and practice; and  
5. Elucidate complex information based on big data sets to coaches and support staff.

**Class Contact:** Thirty (30) hours for one semester, comprising online lectures and burst mode face-to-face tutorials. The expectation for independent learning is 3 hours per week. Recommended out-of-class activities include: reading the assigned research papers, assignment work, study/revision of lecture content.

**Required Reading:** Selected readings will be made available via the unit VU Collaborate site.

**Assessment:** Test, Two online quizzes, 20%. Test, Two online quizzes, 20%. Project, Data analysis project, 45%. Presentation, Video-based presentation about the results of the project, 15%.

**SFS7013 Applied Research Project**

**Locations:** Industry, Footscray Park, The Capstone task can be undertaken within any football club of choice.

**Prerequisites:** SFS7010 - Applied Sports Statistics

**Description:** This unit focuses on drawing from theoretical knowledge and practical skills that the students developed during their degree, with the aim of producing a portfolio of evidence of how the introduction of a new methodology in the workplace changes its current practice. At the conclusion of this unit students will have gained the ability to work independently and under supervision to conduct a defined workplace project and communicate the findings. The main difference with the Minor Thesis is that a Capstone project must produce a measurable and applicable change to current practice which is documented mainly through the collection of a portfolio and presented via oral presentation.

**Credit Points:** 36

**Learning Outcomes:** On successful completion of this unit, students will be able to:  
1. Conceptually map the gaps in the current practice of their discipline inclusive of different cultural perspectives;  
2. Work independently and collaboratively to conduct investigation with a high level of personal autonomy and accountability;  
3. Critically review scholarly literature that may assist in conducting an investigation;  
4. Devise a plan to implement outcomes of the investigation to innovate practice; and  
5. Effectively communicate outcomes of the intervention to different stakeholders at both the local and global level.

**Class Contact:** Thirty-six (36) hours for one semester comprising 6 hours of face-to-face meeting with nominated supervisor and 30 hours of independent work in the workplace.

**Required Reading:** The required readings will be discussed with the supervisor of the project.

**Assessment:** Presentation, Oral presentation on the project proposal, 20%. Portfolio.
Collection of evidence of the investigation performed and modification of the practice, 60%. Report, written report summarising the results of the investigation, 20%.

**SFS7014 Developing Talented Players**

**Locations:** Footscray Park.

**Prerequisites:** SFS6005 - Monitoring Load and Recovery in Football

**Description:** This module is focused on the development of talent ID methodology in football. It will increase the graduate's ability to design and direct training sessions that are tailored to the needs of football players according to their biological age and skill level. This unit will assist the students to gain deep knowledge regarding the training tools utilised in the development of young football players, with the ultimate aim of having a holistic view of training and strength & conditioning in youth football. This unit will be offered within a study tour as part of a 5-year partnership agreement between Victoria University and the Real Madrid Graduate School/UEM. The partnership includes different activities focused on staff and student mobility and it extends onto other courses within the College of Sport and Exercise Science. This unit will be part of a set of two units offered in a 2-week residential period.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:

1. Conceptually map and reflect on the successful models of football player development to implement them in a plan;
2. Critically review and dispute new and available technologies to apply them in the development of young athletes; and
3. Design and evaluate specific training plans based on the performance models available for different age groups.

**Class Contact:** 30 hours in a one-week burst mode. Contact hours will be organised as follows: five days of class, each with 6 hours of learning (4h of face-to-face class + 2h of attendance at a training session). Depending on the availability of youth football teams this could change slightly, but overall there will be 20h of face-to-face classes and 10h of training attendance.

**Assessment:** Presentation, Oral Presentation; Implementation of plan, 30%. Assignment, Reflective Journal aimed at crafting a theoretical plan of Talent ID, 70%.

**SFS7015 Learning to Lead People in High Performance Teams**

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** This unit has been developed to provide students with an understanding of advanced concepts in leadership and human resources management applied to the specific context of football. As graduates of this Master degree, students will enter the football workplace which is typically very challenging and unstable in nature. This unit will provide the students with both the theoretical knowledge and practical tools to appreciate their own leadership style and improve the way they interact with other staff members and manage group dynamics. This unit will be offered within a study tour as part of a 5-year partnership agreement between Victoria University and the Real Madrid Graduate School/UEM. The partnership includes different activities focused on staff and student mobility and it extends onto other courses within the College of Sport and Exercise Science. This unit will be part of a set of two units offered in a 2-week residential period.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:

1. Conceptually map leadership theory, practice and contemporary issues in a globalised football environment taking a critical perspective;
2. Show evidence of enhanced personal knowledge, skills and attitudes (including cultural competence) as they relate to the effective exercise of leadership in football;
3. Create a personal leadership statement and action plan that demonstrates sound critical analysis and an informed appraisal of an authentic sport leader;
4. Reflect on their current level of ability to both lead and work within teams to assess and solve complex problems, motivate and inspire others and act strategically in football; and
5. In collaboration with others, reflect on responsibility and accountability for conflict management and mediation.

**Class Contact:** 24 hours in a one-week burst mode. Six, 4-hour classes within a one-week burst mode module.

**Assessment:** Presentation, Oral Presentation aimed at implementing a leadership plan, 30%. Assignment, Reflective Journal to craft a leadership statement and plan, 70%.

**SFS7016 Performance Analysis in Football**

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** The industry of sport science and high performance in football codes requires practitioners to be aware of and proficient in - many different areas of knowledge. Among them, video analysis is experiencing a period of incredible growth, due to the improvements in technology allowing coaches and sports scientists to film, code and analyse games or training sessions with relative ease. This unit aims at providing students with an advanced understanding of the requirements for video analysis in elite football settings by engaging with world leader industry partners and by interacting with professionals in all major football codes in Melbourne. At the end of this unit you will be an accredited video analyst with theoretical knowledge of performance analysis, technical expertise, and in tune with how video analysis is used in sport science research. Important Note: this unit will require the use of a specific video analysis software that operates only on Apple Mac. Please contact the unit coordinator to discuss available options if you do not own a Mac and if you cannot get regular access to one for the duration of this unit.

**Assessment:** Test, Online-based Quizzes to test knowledge of the basic elements of Video Analysis in Football, 25%. Project, Coding and analysis of pre-recorded football games, 25%. Presentation, Video-based presentation of the results of the
SFS7017 Minor Thesis
Locations: Footscray Park.
Prerequisites: SFS7010 - Applied Sports Statistics
Description: In this unit, students independently conduct research which demonstrates their ability to define a problem, and search and review the relevant literature. Students develop a methodology and apply it to an appropriate problem or situation. They will develop good data collection and analysis skills, presenting the results in a written thesis of high standard. A supervisor is allocated to each student.
Credit Points: 36
Learning Outcomes: On successful completion of this unit, students will be able to:
1. Critically review relevant and current scholarly literature/relating to the thesis topic;
2. Conduct a substantial independent research project under supervision with a high level of personal autonomy and accountability;
3. Work collaboratively and ethically in designing and conducting research and communicating research outcomes
4. Interrogate and challenge complex information, and synthesise a range of conceptual and empirical materials to draw defensible conclusions; and
5. Authoritatively and effectively communicate structured, coherent ideas in a sustained written composition at a standard acceptable for academic peer review.
Class Contact: Regular meetings with the chosen supervisor for the minor thesis will be of 1 hour per week. The remaining hours will be dependent on the data collection process.
Required Reading: Given the nature of this unit, the required readings will be provided by each Minor Thesis Supervisor at the beginning of the semester.
Assessment: Thesis, Minor Thesis - Written work of 14,000 - 16,000 words, Pass/Fail.

SHE1001 Nutrition and Health for Physical Education
Locations: Footscray Park.
Prerequisites: Nil.
Description: This unit introduces students to nutrition, healthy eating practices and the economic and sociocultural reasons behind people's food choices. It explores the main nutrient groups, and how diet and nutrition have a critical role in the promotion of healthy living and the prevention of chronic lifestyle-related diseases. Students investigate good and bad nutritional practices and how they affect growth, development and activity levels. While the unit looks broadly at global nutritional trends, it also emphasises current and emerging trends across Australia. The unit takes a sociological approach to understanding some of the lifestyle and social factors that impact people's food choices, including fast diets, body image, stereotypes and the media.
Credit Points: 12
Learning Outcomes: On successful completion of this unit, students will be able to:
1. Apply theoretical knowledge of nutritional requirements for health and wellness;
2. Demonstrate knowledge of the Australian Guide to Healthy Eating;
3. Employ a health promotion framework to improve healthy eating; and
4. Investigate how social and economic factors affect nutrition and food choices.
Class Contact: Lecture 1.0 hrs Tutorial 1.5 hrs
Required Reading: Selected readings will be made available via the unit VU Collaborate site.
Assessment: Test, Online test, 10%. Test, In-class test, 10%. Assignment, Food diary, 30%. Presentation, Multimedia presentation, 50%.

SHE1002 Growth Development and Ageing
Locations: Footscray Park.
Prerequisites: Nil.
Description: This unit provides a basis for the application of knowledge in growth, development and ageing in health, physical education, and human movement. It examines physical growth, and the cognitive, psycho-social, and motor development of humans from childhood into adulthood. Genetic and environmental factors that interact to influence the processes of human growth, development and ageing are explored from a developmental perspective. The unit focuses on human development across the lifespan to give a balanced perspective on age-related changes in human function.
Credit Points: 12
Learning Outcomes: On successful completion of this unit, students will be able to:
1. Apply research-based knowledge of the physical growth, and the cognitive, psycho-social and motor development of humans throughout the lifespan;
2. Explain the developmental factors that interact to influence growth, development, and ageing;
3. Apply and adapt knowledge about physical growth and human development in health and physical education and human movement to advise on age specific programs; and
4. In collaboration with others, clearly and coherently communicate the adoption of concepts, principles or techniques in growth, development and ageing to specific situations.
Class Contact: Lecture 1.5 hrs Tutorial 1.5 hrs
Assessment: Report, Report, 20%. Presentation, Group presentation, 30%. Examination, Mid-term exam, 20%. Examination, Final exam, 30%. Total effective word limit 3000 words.

SHE2001 Adolescent Health
Locations: Footscray Park.
Prerequisites: Nil.
Description: This unit explores concepts, issues and programs dealing with the physical, psychosocial, cognitive, emotional and social health and well-being of adolescents. The unit addresses health issues facing young adults, such as family, challenge, risk and safety, as well as global, national and school/community health issues including depression, suicide, bullying, resilience, anxiety, body image, self-esteem, identity and self-concept. The unit also examines the role harm minimisation and the media play in the development of drug education. Students will identify appropriate health resources that are available at local, state, national and international levels. The unit includes strategies that adolescents can use to feel safe in their communities.
Credit Points: 12
Learning Outcomes: On successful completion of this unit, students will be able to:
1. Investigate and argue the impact of physical, cognitive, psychological and social perspectives on adolescent health and well-being;
2. Analyse the major factors affecting the mental health of adolescents and discuss a range of protective measures to reduce the risk of mental disorders and illness;
3. Evaluate a variety of resources designed to support the mental health and well-being of adolescents; and
4. Apply their knowledge of current educational approaches to issues such as risk taking, drug and alcohol abuse, bullying and violence.
Class Contact: Lecture 1.0 hrs Tutorial 1.5 hrs
Required Reading: Selected readings will be made available via the unit VU Collaborate site.
**Assessment:** Project, Preparation for presentation, 20%. Test, 2 x Online tests, 20%. Presentation, In-class presentation, 20%. Assignment, Health session plans, 40%.

**SHE2002 Sexuality and Relationships**

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** This unit examines the sexual health of individuals, groups, and populations. It explores the role families play in identity construction and affirmative relationships. Using a socio-biological model, students explore a range of sociocultural, biological, developmental, psychological and legal theories and practices, and their connection to identity and sexuality. Students analyse relationship development, identity formation, same sex attraction and sexual and familial relationships. They investigate harmful discourses, practices, and behaviours such as homophobia, bullying and stereotyping that obstruct the development of affirmative relationships. The unit explores in detail issues such as mandatory reporting and the regulatory and legal frameworks related to human sexuality. Students use a development model to explore human reproduction. They examine the sexual health of people across the lifespan, and in particular the sexual health of adolescents and young people. They also investigate sexual practices such as abstinence, sexually transmitted infections and STI prevention. Students are encouraged to think critically and collaboratively in order to discuss ways to support young people struggling with relationships and sexual/gender identification.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Analyse sociocultural influences that affect human sexuality and relationships;
2. Evaluate effectiveness of comprehensive and non-comprehensive sexuality programs;
3. Evaluate, assemble and deliver teaching and learning resources for sexual health education; and
4. Demonstrate knowledge of legal, social and developmental factors that affect human sexuality.

**Class Contact:** Lecture 1.0 hrs Tutorial 1.5 hrs

**Required Reading:** Selected readings will be made available via the unit VU Collaborate site.

**Assessment:** Presentation, Group presentation, 20%. Essay, Essay dealing with a human sexuality issue, 35%. Practicum, Report and delivery of sexuality program, 45%.

**SHE3001 Social Bases of Health: Global Perspectives**

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** This unit exposes students to historical and theoretical models of health with application to health education and physical education. Health and wellbeing are considered from individual and population perspectives. Concepts around identity are explored, including the social and cultural factors that influence health outcomes. Students are encouraged to explore the interdisciplinary nature between health and a range of social determinants such as socioeconomic status, physical activity, the environment, gender, religion, communities, sexuality and the media. The unit focuses on both the Australian and global health contexts and examines ways to improve health outcomes among at-risk groups.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Differentiate between the biomedical and social models of health;
2. Determine how social issues affect health outcomes at individual and population levels;
3. Interpret a global health issue and investigate ways for improvement;
4. Collaboratively present and critique a global health issue; and
5. Evaluate and provide positive constructive feedback to peers.

**Class Contact:** Lecture 1.0 hrs Tutorial 1.5 hrs

**Required Reading:** Selected readings will be made available via the unit VU Collaborate site.

**Assessment:** Assignment, Health session plans, 40%.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Explain and analyse the social ecological model of health;
2. Critically analyse health promotion foundations, theories, behaviour changes, strategies and implementation processes for future applications within the health industry;
3. Design a health promotion campaign that addresses a global health issue; and
4. Communicate to a range of audiences the efficacy of a health promotion program and the strategies, policies and theories that underpin it.

**Class Contact:** Lecture 1.0 hrs Tutorial 1.5 hrs

**Required Reading:** Selected readings will be made available via the unit VU Collaborate site.

**Assessment:** Essay, Essay dealing with a human sexuality issue, 35%. Practicum, Report and delivery of sexuality program, 45%. Test, Online test relating to lectures, readings and tutorial material, 20%.

**SHS5000 Research Methods in Sport and Exercise Science**

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** This unit provides an overview of research and research methods including the philosophies, principles of research, research approaches; the research process; research practice; and research methods. The unit focuses on planning, implementing and reporting research through the development of a review of research and a research proposal. Students will be guided in effective communication skills, preparation and presentation of a research proposal, and writing of a literature review. Students will develop knowledge of a range of research approaches and skills to critically review research and the research process and in developing, conducting and reporting on research projects. The research proposal and literature review will form the basis for a research project to be conducted as part of the honours course.

**Credit Points:** 24

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Critically review, analyse and consolidate knowledge of the underlying principles and concepts in one or more disciplines in sport and exercise science;
2. Design and propose a piece of research and scholarship in sport and exercise science with
some independence  3. Elucidate a clear and coherent exposition of knowledge and ideas to a variety of audiences about research and research methods  4. Implement technical skills to propose a research project in sport and exercise science

Class Contact: Seminar 2.0 hrs

Required Reading: The selection and preparation of a detailed literature review by the student is an integral component of this unit. Selected readings will be made available via the unit's VU Collaborate site.

Assessment: Presentation, Oral presentation of research proposal (10-15 minutes), 15%. Assignment, Honours proposal (3,000 words), 30%. Assignment, Literature review, 50%. Report, Progress Report, 5%.

SHS5001 Research Skills in Sport and Exercise Science

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit will support and complement the work of research supervisors by helping students develop their research skills and knowledge relevant to professional development in research and in other careers. Students will contribute and reflect on the research process, ethics in research, and their personal research experience and research skills and knowledge through the development of a research journal, an ethics essay and a research portfolio. Students will be guided in effective communication skills, reflective thinking skills and the development of other capabilities necessary for the preparation, design, conduct, and presentation of research projects.

Credit Points: 24

Learning Outcomes: On successful completion of this unit, students will be able to:

1. Critically review, analyse and consolidate knowledge to identify and provide solutions to problems in research
2. Exhibit cognitive and technical skills to demonstrate a broad understanding of research concepts in sport and exercise science
3. Apply advanced skills to evaluate research and to evaluate their own research skills and development
4. Present clear and coherent ideas about research and their own research skills and development
5. Exercise critical thinking and judgement in evaluating ethics, research, and their own research development

Class Contact: Seminar 2.0 hrs

Required Reading: Selected readings will be made available via the unit's VU Collaborate site.

Assessment: Essay, Reflective ethics essay, 30%. Journal, Reflective journal on research skill development, 40%. Portfolio, Professional development portfolio on research experiences, 30%.

SHS5002 Honours Thesis

Locations: Footscray Park.

Prerequisites: SHS5000 - Research Methods in Sport and Exercise Science

Description: The Honours Thesis presents students with a research experience that provides the opportunity to conceptualise, design, implement and evaluate a specific research project. The Honours Thesis will allow students to develop and use knowledge and skills to conduct a research project and present a formal written thesis. The unit aims to develop the research experience, advanced analytical skills and theoretical background required as an independent researcher and as necessary as a prerequisite for a higher degree by research (Masters or PhD). To do this, students select, design and undertake original research on a sport and exercise science related topic with the guidance of a supervisor and submit a written thesis for examination (10,000-15,000 words).

Credit Points: 48

Learning Outcomes: On successful completion of this unit, students will be able to:

1. Execute a piece of research and scholarship in sport and exercise science with some independence and in collaboration with others
2. Exercise critical thinking and judgement in developing new understanding in sport and exercise science
3. Elucidate a clear and coherent exposition of knowledge and ideas to a variety of audiences
4. Implement knowledge and technical skills to produce research outcomes in sport and exercise science

Class Contact: Individual research supervision.

Required Reading: The selection and preparation of a detailed literature review by the student is an integral component of preparing the Honours Thesis.

Assessment: Thesis, 10,000-15,000 word thesis, 100%. The Honours Thesis will be examined by two qualified academics with expertise in the specific area of research. At least one (and preferably both) of the examiners must be external to the College and Institute for Sport Exercise and Active Living (SEAL).

SHS5003 Honours Thesis (Part-Time)

Locations: Footscray Park.

Prerequisites: SHS5000 - Research Methods in Sport and Exercise Science

Description: The Honours Thesis presents students with a research experience that provides the opportunity to conceptualise, design, implement and evaluate a specific research project. The Honours Thesis will allow students to develop and use knowledge and skills to conduct a research project and present a formal written thesis. The unit aims to develop the research experience, advanced analytical skills and theoretical background required as an independent researcher and as necessary as a prerequisite for a higher degree by research (Masters or PhD). To do this, students select, design and undertake original research on a sport and exercise science related topic with the guidance of a supervisor and submit a written thesis for examination (10,000-15,000 words).

Credit Points: 24

Learning Outcomes: On successful completion of this unit, students will be able to:

1. Execute a piece of research and scholarship in sport and exercise science with some independence and in collaboration with others
2. Exercise critical thinking and judgement in developing new understanding in sport and exercise science
3. Elucidate a clear and coherent exposition of knowledge and ideas to a variety of audiences
4. Implement knowledge and technical skills to produce research outcomes in sport and exercise science

Class Contact: Individual research supervision.

Required Reading: The selection and preparation of a detailed literature review by the student is an integral component of preparing the Honours Thesis.

Assessment: Thesis, 10,000-15,000 word thesis, 100%. The Honours Thesis will be examined by two qualified academics with expertise in the specific area of research. At least one (and preferably both) of the examiners must be external to the College and Institute for Sport Exercise and Active Living (SEAL).

SMG7140 The Social Ecology of Active Living

Locations: St Albans.

Prerequisites: Nil.

Description: Policies and programs targeting behaviour in isolation often fail to enhance active living and wellbeing. A socio-ecological framework recognises that behaviour does not occur in a vacuum and highlights the broader social determinants of active living. This unit analyses various critical issues in an integrated way using international and multidisciplinary approaches. Students will have the opportunity to investigate the social factors that have a bearing on active living and its potential health benefits, including age, gender, sexuality, (dis)ability, socioeconomic status,
On successful completion of this unit, students will be able to:

1. Critically analyse aspects of active living and wellbeing from a socio-ecological perspective;
2. Synthesise and contrast different perspectives on active living and wellbeing;
3. Develop alternative conceptions of active living and wellbeing; and
4. Utilise sociological method and inquiry to inform individual practice and challenge the construction of one’s own beliefs in relation to active living and wellbeing.

**Class Contact:** Students can expect the course contact hours to equate to 3 hours per unit, per week across a 12 week semester. These hours will comprise a combination of lecture, seminar and tutorial type activities - on line and/or in burst mode.

**Required Reading:** Selected research papers and book chapters, with students encouraged to source research papers relevant to their interests and experiences.

**Assessment:**
- Annotated Bibliography, Active Living and Selected Social Determinant (1500 words), 30%.
- Other, Two (2) Reflective Blogs (800 words each), 20%.
- Project, Group Case Study (Active Living) (individual 2500 words equivalent), 50%.

**SMG7240 Behavioural Aspects of Active Living**

**Locations:** St Albans.

**Prerequisites:** Nil.

**Description:** Improving participation in physical activity and reducing sedentary behaviour are important public health endeavours. As physical activity, and to a certain extent sedentary behaviour, involves a series of voluntary behavioural choices for an individual, it is important to recognise the impact of motivation and ability in active living. Furthermore, to accurately assess patterns of participation in physical activity and sedentary behaviours, and examine the impact of physical activity interventions on participation and health outcomes, it is necessary to accurately measure participation in these behaviours. A socio-ecological framework identifies intrapersonal and interpersonal aspects of behaviour as an important part of overall population behaviour and activity. This unit will take a psychosocial approach to active living. Students will be encouraged to (1) compare and contrast psychosocial theories of health behaviour in relation to physical activity and sedentary behaviour. These theories will be evaluated in light of their relevance to a range of target populations and their ability to guide interventions for health promotion; (2) Evaluate methods to measure participation in physical activity and sedentary behaviour and the apply these measures in a variety of contexts and population groups; (3) Develop strategies to maximise the psychological health benefits of physical activity.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:

1. Appraise methods of measuring participation in physical activity and/or sedentary behaviour and prescribe them to a range of contexts and population groups.
2. Conceptually map theories of health behaviour to physical activity and/or sedentary behaviour interventions;
3. Devise evidence-based strategies that will facilitate individual adherence to physical activity (including reducing sedentary behaviour) and improve wellbeing from both physical and psychosocial perspectives.
4. Critically review theories of health behaviour, particularly as they apply to active living;
5. Evaluate and provide positive constructive feedback to peers.

**Class Contact:** Workshop 3.0 hrs.

**Required Reading:** Selected readings will be made available via the unit VU Collaborate site.

**Assessment:**
- Case Study, Students will apply their knowledge of measurement of physical activity in to a scenario(s). Also includes peer feedback element (900 word equivalent), 20%.
- Essay, Essay / Report - Application of various theoretical behaviour models of health to physical activity behaviour and intervention (3000 words equivalent), 45%.
- Presentation, Seminar Presentation - Recommendations for maximising intervention outcomes (2000 words equivalent), 35%.

**SMG7340 Active Living Programs**

**Locations:** St Albans.

**Prerequisites:** Nil.

**Description:** Implementing effective and sustainable active living programs in the community is an important part of public health promotion and intervention. Programming for increased physical activity requires a well-considered and systematic approach to planning, implementation and evaluation. Program development should be based on the health needs within the target community and have a clear structure, yet be flexible to encourage participation and sustainability. This unit will consider both local active living initiatives and large-scale public health campaigns to provide students with an understanding of applied programming in an active living setting. Students will be encouraged to critique and apply a variety of planning, implementation and evaluation strategies to real world active living programs in order to extrapolate and develop their own methodology for programming in the active living setting. Implementation and evaluation strategies, such as social media, online interfaces, social support and other innovative methods will be discussed, with an emphasis on using high-quality evidence in program planning stages.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:

1. Critically apply high-quality planning, implementation and evaluation strategies for active living programs;
2. Propose and justify processes involved in health needs assessments for a variety of settings; community, workplace, schools, target populations;
3. Interrogate and recommend programming approaches that involve all aspects of a socioecological framework to provide holistic active living programs; and
4. Argue the role and need for specific, evidence-based programs as part of a broader initiative to promote active living in a variety of known and unknown contexts.

**Class Contact:** The Master in Public Health (Global Nutrition and Active Living) is likely to attract practitioners already employed in the field of public health as well as recent graduates. The mode of course delivery is designed to be flexible in order to accommodate prospective students in full or part time employment locally, nationally and off-shore seeking a postgraduate qualification to enhance their professional practice. Accordingly the Master in Public Health (Global Nutrition and Active Living) will not be offered in weekly, real-time, face-to-face mode across a semester. Instead the degree program will be offered in burst seminar mode, supported by on-line learning modules. If students can show cause why they are unable to attend burst sessions then on line learning modules covering the same content as the burst seminars will be available to them. Students can expect the course contact hours to equate to 3 hours per unit, per week across a 12 week semester. These hours will comprise a combination of lecture, seminar and tutorial type activities - on line and/or in burst mode. Students should also expect to spend an equal amount of time in self-directed study.

**Required Reading:** Selected research papers and book chapters, with students encouraged to source research papers relevant to their interests and experiences.

**Assessment:**
- KT (Wiki, Web sites), Wiki contribution - large scale health campaign — critique existing social media or press advertisement/coverage (1500 words), 20%.
- Essay, Essay / Report - Critically appraise existing active living program, integrating race and ethnicity. The unit seeks to provide students with the critical understandings, skills and values necessary to promote active living and wellbeing at individual, group, community and environmental levels.
SMG7440 Policy and Promotion for Physical Activity

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** This unit examines the development and evaluation of global and national policies for promoting physical activity. It will identify key stakeholders in physical activity across the public, private, and civil society sectors. Students will explore major physical activity policy developments and the translation of those policies into practice. Students will also consider how to construct a policy analysis of physical activity issues and reform proposals.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Differentiate terminology associated with growth and motor development; and
2. Evaluate changes in movement skill acquisition; and
3. Analyze the design of practice and use of feedback in skill acquisition with children.

**Class Contact:** Lecture 1.0 hrs, Tutorial 1.5 hrs

**Assessment:** Test, Online Test, 20%. Report, Practical Reports, 40%. Assignment, Reflective Workbook, 40%.

SMG7440 Policy and Promotion for Physical Activity

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** This unit examines the development and evaluation of global and national policies for promoting physical activity. It will identify key stakeholders in physical activity across the public, private, and civil society sectors. Students will explore major physical activity policy developments and the translation of those policies into practice. Students will also consider how to construct a policy analysis of physical activity issues and reform proposals.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Differentiate terminology associated with growth and motor development; and
2. Evaluate changes in movement skill acquisition; and
3. Analyze the design of practice and use of feedback in skill acquisition with children.

**Class Contact:** Lecture 1.0 hrs, Tutorial 1.5 hrs

**Assessment:** Test, Online Test, 20%. Report, Practical Reports, 40%. Assignment, Reflective Workbook, 40%.

SPE1000 Movement Skill Acquisition

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** This unit provides an introduction to the acquisition of movement skills in children. The following areas will be examined: terms and concepts in skill acquisition; movement skill classification; classification of games and sports; characteristics of movement skill learning; stages of learning; theories of movement skill acquisition; motivation and confidence; transfer of learning; practice design; practice distribution; practice variability; and feedback in movement skill acquisition with children. Students will engage in practical activities related to movement skill acquisition in childhood.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Interpret terms and concepts in movement skill acquisition; and
2. Compare different movement skills and activities; and
3. Evaluate changes in movement skill acquisition in children; and
4. Analyse the design of practice and use of feedback in skill acquisition with children.

**Class Contact:** Lecture 1.0 hrs, Tutorial 1.5 hrs

**Assessment:** Test, Online Test, 20%. Report, Practical Reports, 40%. Assignment, Reflective Workbook, 40%.

SPE1000 Movement Skill Acquisition

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** This unit provides an introduction to the acquisition of movement skills in children. The following areas will be examined: terms and concepts in skill acquisition; movement skill classification; classification of games and sports; characteristics of movement skill learning; stages of learning; theories of movement skill acquisition; motivation and confidence; transfer of learning; practice design; practice distribution; practice variability; and feedback in movement skill acquisition with children. Students will engage in practical activities related to movement skill acquisition in childhood.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Interpret terms and concepts in movement skill acquisition; and
2. Compare different movement skills and activities; and
3. Evaluate changes in movement skill acquisition in children; and
4. Analyse the design of practice and use of feedback in skill acquisition with children.

**Class Contact:** Lecture 1.0 hrs, Tutorial 1.5 hrs

**Assessment:** Test, Online Test, 20%. Report, Practical Reports, 40%. Assignment, Reflective Workbook, 40%.

SPE1000 Movement Skill Acquisition

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** This unit provides an introduction to the acquisition of movement skills in children. The following areas will be examined: terms and concepts in skill acquisition; movement skill classification; classification of games and sports; characteristics of movement skill learning; stages of learning; theories of movement skill acquisition; motivation and confidence; transfer of learning; practice design; practice distribution; practice variability; and feedback in movement skill acquisition with children. Students will engage in practical activities related to movement skill acquisition in childhood.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Interpret terms and concepts in movement skill acquisition; and
2. Compare different movement skills and activities; and
3. Evaluate changes in movement skill acquisition in children; and
4. Analyse the design of practice and use of feedback in skill acquisition with children.

**Class Contact:** Lecture 1.0 hrs, Tutorial 1.5 hrs

**Assessment:** Test, Online Test, 20%. Report, Practical Reports, 40%. Assignment, Reflective Workbook, 40%.

SPE1000 Movement Skill Acquisition

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** This unit provides an introduction to the acquisition of movement skills in children. The following areas will be examined: terms and concepts in skill acquisition; movement skill classification; classification of games and sports; characteristics of movement skill learning; stages of learning; theories of movement skill acquisition; motivation and confidence; transfer of learning; practice design; practice distribution; practice variability; and feedback in movement skill acquisition with children. Students will engage in practical activities related to movement skill acquisition in childhood.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Interpret terms and concepts in movement skill acquisition; and
2. Compare different movement skills and activities; and
3. Evaluate changes in movement skill acquisition in children; and
4. Analyse the design of practice and use of feedback in skill acquisition with children.

**Class Contact:** Lecture 1.0 hrs, Tutorial 1.5 hrs

**Assessment:** Test, Online Test, 20%. Report, Practical Reports, 40%. Assignment, Reflective Workbook, 40%.

SPE1000 Movement Skill Acquisition

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** This unit provides an introduction to the acquisition of movement skills in children. The following areas will be examined: terms and concepts in skill acquisition; movement skill classification; classification of games and sports; characteristics of movement skill learning; stages of learning; theories of movement skill acquisition; motivation and confidence; transfer of learning; practice design; practice distribution; practice variability; and feedback in movement skill acquisition with children. Students will engage in practical activities related to movement skill acquisition in childhood.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Interpret terms and concepts in movement skill acquisition; and
2. Compare different movement skills and activities; and
3. Evaluate changes in movement skill acquisition in children; and
4. Analyse the design of practice and use of feedback in skill acquisition with children.

**Class Contact:** Lecture 1.0 hrs, Tutorial 1.5 hrs

**Assessment:** Test, Online Test, 20%. Report, Practical Reports, 40%. Assignment, Reflective Workbook, 40%.
and skills necessary to maintain and enhance their own and others’ physical and movement development for participation and performance in physical activity and movement contexts.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Present a clear coherent and independent exposition of knowledge and ideas in skill acquisition and biomechanics;
2. Classify and analyse the performance of movement skills in physical activity and sport using skill acquisition and biomechanical principles;
3. Determine changes in skill acquisition and performance in children;
4. Apply biomechanical and skill acquisition principles to analyse, develop, and refine movement for participation and performance in a range of physical activities; and
5. Develop understanding to support learners to acquire, apply and evaluate movement skills, concepts and strategic awareness in order to respond creatively and competently in a variety of physical activity contexts and settings.

**Class Contact:** Lecture 1.5 hrs, Tutorial 1.5 hrs

**Required Reading:** Selected readings will be made available via the unit VU Collaborate site.

**Assessment:** Test, Online tests, 20%. Report, Practical reports, 40%. Assignment, Reflective workbook, 40%.

**SPE2000 Rhythmic and Expressive Movement**

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** This unit provides students with an overview and practical experience of rhythmic and expressive movement for children’s physical activity participation. It will examine: movement sequences using different body parts and in response to stimuli; designing and performing imaginative movement sequences; combining elements of effort, space, time, and objects to perform movement sequences; and exploration of rhythmic and expressive movement forms.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Analyse the use of rhythmic and expressive movement in children’s physical activity participation;
2. Apply knowledge of movement concepts to create a movement sequence according to specific criteria;
3. Design and perform an imaginative movement sequence; and
4. Create activities to develop rhythmic and expressive movement forms.

**Class Contact:** Lecture 1.0 hr, Tutorial 2.0 hrs

**Required Reading:** Selected readings will be made available via the unit VU Collaborate site.

**Assessment:** Report, Instructional Plan, 20%. Presentation, Skill Instruction, 20%. Assignment, Resource, 30%. Performance, Rhythmic and expressive movement, 30%. Attendance: Attendance at tutorials is a required component for the satisfactory completion of this unit. A minimum of 80% attendance of all tutorials classes is required to be eligible for a pass in this unit.

**SPE2001 Major and Minor Games**

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** This unit provides students with an overview and practical experience of minor and major games for children’s physical activity participation. Students will develop an understanding of different types of games and sports; knowledge and skills to apply movement concepts and strategies in games and sports; practice specialised movement skills and apply them in different movement situations; transfer movement concepts and strategies; modify games and activities for participation and skill development; and use feedback to improve performance in games and sports. These concepts will be explored through theoretical understanding and participation in minor and major games.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Evaluate different types of games and sports related to physical activity participation;
2. Design experiences to apply movement skills, concepts and strategies in games and sport;
3. Modify games and activities for participation and skill development; and
4. Develop activities to develop specialised movement skills.

**Class Contact:** Lecture 1.0 hr, Tutorial 2.0 hrs

**Assessment:** Presentation, Instructional Experience, 30%. Assignment, Instructional Plans, 40%. Essay, Essay, 30%.
SPE2002 Physiology for Physical Education

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit provides students with discipline specific knowledge and skills in human physiology, with a specific focus on application to physical activity, sport and exercise science, and physical education. Students are introduced to basic physiological structures and functions; examine the physiological systems most involved in human movement; such as the cardiovascular, respiratory, thermoregulatory, neural, endocrine and muscular systems; and explore the acute and chronic responses of these physiological systems to exercise. Knowledge and skills are developed from both a theoretical and practical perspective to enhance knowledge, skills and the application of these knowledge and skills to sport, exercise and physical education.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to: 1. Adapt knowledge of the cardiovascular, respiratory, thermoregulatory, neural, endocrine and muscular systems to contemporary sport, exercise, and physical education settings; 2. Analyse acute and chronic responses to exercise training; 3. Apply knowledge of exercise physiology principles to solve problems in practical physical education and sport situations; and 4. Communicate a clear, coherent and independent exposition of knowledge and ideas in physiology and exercise physiology.

Class Contact: Lab 2.0 hrs Lecture 1.5 hrs

Assessment: Test, Online test, 25%. Report, Laboratory report, 25%. Examination, Final exam, 50%.

SPE2003 History of Sport

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit traces the history of sport and physical education from ancient to modern times. Students are encouraged to seek out the meanings that sport and physical education held for people during different historical periods, and to identify the linkages between current sports and physical education, and their earlier counterparts. This unit enables students to understand and recognize the contextual forces in each historical period that shaped the structure, form, and flavour of society’s sports and active pastimes. It also aims to assist students in gaining an appreciation of different theoretical and methodological approaches to the study of sport and physical activity in society. The unit can be broken down into six broad sections as follows: 1. Introduction to sports historiography and methodology; 2. Physical education and sport in antiquity, with particular reference to Greek and Roman culture; 3. Physical education and sport in the Middle Ages; 4. Physical education and sport during the Renaissance, Reformation and Enlightenment; 5. Sport, the Industrial Revolution and the British Empire; 6. Case studies of modern sport: The modern Olympic Games.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to: 1. Explain research methodologies used concerning the origins of sport; 2. Discuss the development of sport as a significant social force in western civilizations; 3. Locate and analyse documents in the field of sport history; and 4. Determine relationships between historical knowledge and the understanding of current issues associated with sport.

Class Contact: Lecture 2.0 hrs Tutorial 1.0 hr

Assessment: Essay, Essay on the history of sport and related topics, 20%. Exercise, Reading summaries, 40%. Examination, Final examination, 40%.

SPE2004 Growth and Motor Development

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit provides students with discipline specific knowledge and skills in growth and motor development and the development of fundamental movement skills. The following areas will be examined: basic development principles, terms, issues, and theoretical approaches to growth and motor development; physical, cognitive, perceptual and biological growth and development; description of motor behaviour characteristics at different stages of development; movement assessment; and fundamental movement skill development. Students will engage in practical activities related to fundamental movement skills.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to: 1. Differentiate terminology associated with growth and motor development; 2. Evaluate changes that occur in growth and motor development; and 3. Determine the development and assessment of fundamental movement skills.

Class Contact: Lecture 1.0 hr Tutorial 1.5 hrs

Assessment: Report, Fundamental Motor Skill Report, 30%. Assignment, Log Book, 40%. Test, Online Test, 30%.

SPE2007 Minor Games

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit provides students with an overview and practical experience of minor games and athletics for participation in physical education. Students develop an understanding of invasion, striking /fielding, net /wall and target games and athletics and knowledge and skills to apply movement concepts and strategies in games. These concepts are explored through theoretical understanding and participation in minor games and athletics.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to: 1. Critically analyse knowledge of games and athletics for participation in physical education as relevant to contemporary settings; 2. Modify games and activities for participation and skill development with creativity and judgment; 3. Design experiences to apply movement skills, concepts and strategies in games with responsibility and accountability; and 4. Adapt activities to develop movement skills and concepts in games and athletics to suit participant groups.

Class Contact: Lab 1.5 hrs Lecture 1.0 hr

Required Reading: Breed, R & Spittle, M 2011, Developing game sense through tactical learning: a resource for teachers and coaches, Port Melbourne: Cambridge.

Assessment: Presentation, Presentation, 30%. Essay, Essay, 30%. Assignment, Workbook, 40%.

SPE2100 Biophysical Perspectives On Movement

Locations: Footscray Park.
SPE1100 - Principles of Movement Development

Description: This unit explores human movement from a biophysical perspective through the study of functional anatomy, human physiology, and exercise physiology. Students will develop a comprehensive understanding of anatomical concepts in order to determine how the body moves. In doing so, students will study the structure and function of the musculoskeletal, cardiovascular and respiratory systems and how they interact with each other to enable human movement. This unit will detail the mechanisms responsible for the physiological changes during exercise, while also examining the acute and chronic physiological adaptations to training. Students will also investigate the components of fitness, principles of exercise training, training program design, interaction of the three energy systems, factors related to fatigue during exercise, basic fitness testing protocols; and physiological strategies to enhance recovery.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Apply their understanding of biophysical concepts to explain and analyse movement using anatomical terminology;
2. Convey their knowledge of the structure, function and interactions of the musculoskeletal, cardiovascular and respiratory systems;
3. Identify and describe the normal physiological responses to exercise and explain how energy is obtained, stored, transferred and used during exercise; and
4. Critically analyse the acute and chronic physiological adaptations to training, and use the basic principles of training to plan and implement safe and effective training programs.

Class Contact: Lecture: 10 x 1.5 hours Tutorial: 10 x 1.5 hours

Assessment: Test, Online Quiz, 15%; Assignment, Training Program, 25%; Report, Laboratory Report, 20%; Examination, Final Exam, 40%. Equivalent word limit of 3000 words.

SPE2200 Games and Sports

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit provides students with an exploration and experience of games and sports, including athletics, for participation and performance in contemporary physical activity and movement contexts. Students will develop an understanding of different types of games and sports, including athletics; experience the delivery of movement opportunities through games, sports, and athletics; use their knowledge and skills to apply movement concepts and strategies in games, sports and athletics; practice specialised movement skills and apply them in different movement situations; transfer movement concepts and strategies between games; modify games and activities for participation and skill development; and use feedback to improve performance in games, sports, and athletics. These concepts will be explored through theoretical understanding and participation in games, sports, and athletics.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Critically reflect on research methodologies used concerning the origins of sport;
2. Contextualise the development of sport as a significant social force in western civilizations;
3. Analyse and interpret documents in the field of sport history; and
4. Instruct a wide variety of major games and sports as appropriate to contemporary Australia.

Class Contact: Lecture 1.0 hrs Tutorial 2.0 hrs

Assessment: Essay, Essay, 30%; Assignment, Workbook, 40%; Presentation, Instructional experience, 30%.

SPE3002 Major Games

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit is designed to develop knowledge and skills to conduct practical activity sessions involving major games. This unit adopts a Game Sense approach when providing students with an opportunity to apply their knowledge and skills to plan, implement and evaluate group sessions related to major games. There is an emphasis on practical application of concepts to major games and traditional sports from the game categories of invasion games, striking/fielding games, net/wall games, and target games.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Synthesise knowledge and understanding of major games and sports and adapt information as relevant for participation in different games and sports;
2. Plan, implement and evaluate group sessions in a wide variety of games using a Game Sense model;
3. Design and modify the game environment for all participants; and
4. Instruct a wide variety of major games and sports as appropriate to contemporary Australia.

Class Contact: Lecture 1.0 hrs Tutorial 2.0 hrs

Assessment: Assignment, Presentation Plan, 20%; Presentation, Practical Presentation, 40%; Laboratory Work, Tutorial Workbook, 30%; Other, Peer Assessment, 10%.

SPE3004 History of Sport

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit traces the history of sport and physical education from ancient to modern times. Students are encouraged to seek out the meanings that sport and physical education hold for people during different historical periods, and to identify the linkages between current sports and physical education, and their earlier counterparts. This unit enables students to understand and recognize the contextual forces in each historical period that shaped the structure, form, and flavour of a society’s sports and active pastimes. It also aims to assist students in gaining an appreciation of different theoretical and methodological approaches to the study of sport and physical activity in society. The unit can be broken down into six broad sections as follows: 1. Introduction to sports historiography and methodology; 2. Physical education and sport in antiquity, with particular reference to Greek and Roman culture; 3. Physical education and sport in the Middle Ages; 4. Physical education and sport during the Renaissance, Reformation and Enlightenment; 5. Sport, the Industrial Revolution and the British Empire; 6. Case studies of modern sport: The modern Olympic Games.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Develop activities to develop specialised movement skills in games, sports, and athletics; and
2. Contextualise the development of sport as a significant social force in western civilizations;
4. Reflect on relationships between historical knowledge and the understanding of current issues associated with sport.

Class Contact: Lecture 2.0 hrs, Tutorial 1.0 hr

Assessment: Essay, Essay on the history of sport and related topics, 20%. Exercise, Reading summaries, 40%. Examination, Final examination, 40%.

SPE3005 Perspectives On Physical Education

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit provides an opportunity for students to integrate and apply their discipline-specific knowledge and skills acquired through their course to their transition to careers in physical education. Students conduct a project exploring their personal conceptualisation of physical education; explore the ethical dimensions of roles in physical education; and develop knowledge and skills to enable them to be proactive and strategic in career planning in the physical education and associated industry sectors. Topics explored include views of contemporary physical education practice; changing understandings of physical education; professional ethics; career professional development, and physical education and exercise and sport science industry engagement.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Critically analyse and evaluate theoretical knowledge and technical information with autonomy, responsibility and judgment in order to both anticipate and creatively solve problems related to professional practice;
2. Determine and evaluate the ethical implications of professional practice in physical education and associated industry sectors;
3. Articulate a personal conceptualisation of physical education and argue the importance of physical education in the development of the whole person for application in the current job market; and
4. Derive ethical positions and coherently justify that position in relation to their goals in work and learning.

Class Contact: Tutorial 1.5 hrs, Tutorial 1.0 hr

Required Reading: Selected readings will be made available via the unit VU Collaborate site.

SPE3100 Psychosocial Aspects of Health and Physical Activity

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit explores the range of psychosocial influences on health, physical activity, sport and exercise contexts in contemporary society. Students will examine sociological, historical, and psychological concepts that influence health and physical activity, including interactions of personal, social and environmental factors. Topics include the relationship between health and physical activity, psychosocial and health benefits of physical activity participation, physical activity across the lifespan, theories of physical activity participation, physical activity and health promotion interventions and initiatives, inclusiveness and diversity in physical activity, methods of assessing physical activity and sedentary behaviour, national physical activity and sedentary behaviour guidelines, and the role of organisations in promoting physical activity and health. Understanding is developed through researching, analysing, applying contemporary practices in health and movement fields. Students will gain authentic practical experience of recreational and lifelong physical activities underpinning delivery of movement experiences and engagement in health and physical activity such as aquatics, challenge and adventure activities, minor games and modified sports. The unit will enable students to implement psychosocial understandings of lifelong health and participation in physical activity into practice within physical education and exercise and sport science.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Critically evaluate the influence of psychosocial factors on health, physical activity, sport and exercise contexts in contemporary society;
2. Use theoretical knowledge and practical skills to critique health and physical activity promotion initiatives and the assessment of physical activity and sedentary behaviour;
3. Identify and describe how personal, social and environmental contexts shape and provide opportunities for health and physical activity behaviours;
4. Contextualise the importance of participation in recreational and lifelong physical activities as movement experiences in promoting engagement in health and physical activity; and
5. Plan, prepare and participate in appropriate, safe and inclusive movement experiences to support lifelong health and physical activity participation.

Class Contact: Lecture 1.5 hrs, Tutorial 1.5 hrs

Required Reading: Readings will be advised by the Unit Coordinator and detailed in the unit guide.

Assessment: Essay, Psychosocial aspects of health and physical activity, 30%. Assignment, Physical activity assessment, 40%. Report, Recreational and lifelong physical activities, 30%.

SPE3200 Elements and Practice of Movement

Locations: Footscray Park.

Prerequisites: SPE1100 - Principles of Movement Development, SPE1200 - Applied Movement Science

Description: This unit involves the exploration, analysis and development of movement skills and concepts through rhythmic and expressive movement, games and fitness-based activities. Students will apply their skills and knowledge of skill acquisition, biomechanics, and growth and movement development to create and adapt appropriate movement experiences and provide and apply feedback to enhance participation and performance in a range of movement activities. Students will explore the elements and practice of rhythmic and expressive movement and movement for health and fitness in contemporary physical activity and movement contexts such as dance, gymnastics, games, and lifestyle exercise based programs.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Apply knowledge of movement patterns and concepts to create movement sequences according to given criteria with responsibility and accountability;
2. Develop activities to enhance movement skills, participation and performance in rhythmic and expressive movement, games and fitness with creativity and judgement;
3. Analyse their own and others' movement sequences to provide appropriate feedback and instruction; and
4. Compose and perform movement experiences using exposition and analysis of the impact of effort, space, time, objects and people on movement.

Class Contact: Lecture: 10 x 1 hour Tutorial: 10 x 2 hours

Required Reading: Readings will be advised by the Unit Coordinator and detailed in the unit guide.

Assessment: Performance, Rhythmic and expressive movement, 30%. Presentation, Movement instruction, 30%. Assignment, Movement for health and fitness, 40%. Equivalent word limit of 3000 words.
SSC2002 Prevention, Management and Recovery from Injury

Locations: Footscray Park.

Prerequisites: Nil.

Description: Injuries are the unwanted side effects of active engagement in sport. It is estimated that annually one in six Australians suffer a sports related injury. Sport coaches often witness injuries first hand and are often responsible for initial injury management until professional help is sought when major injuries occur and the ongoing management when minor injuries occur. Hence, sport coaches play an important role in the overall management of injuries, and the development of knowledge and expertise of injuries, illness and recovery are vitally important for sport coaches. Coaches who possess at least a fundamental knowledge of injury, illness and recovery will not only feel more competent and confident but importantly, will be able to reduce the stress and overall prognosis for athletes.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Identify common sporting injuries, differentiating factors and musculoskeletal screening techniques.
2. Determine the immune response to exercise, and identify strategies to minimise illness.
3. Evaluate the psychosocial drivers of injury and illness.
4. Acquire knowledge of current best practice in recovery strategies from an evidence-based perspective.
5. Acquires skills in modifying training and competition, to manage injuries, illness or specific populations (e.g., disability).
6. To demonstrate an understanding of ethical practice from the perspective of setting boundaries and the referral process.

Class Contact: Lecture 1.0 hrs, Tutorial 1.5 hrs

Required Reading: Gotlin, RS (ed) 2008, Sports injuries guidebook: athletes’ and coaches’ resource for identification, treatment and recovery, Champaign, IL: Human Kinetics

Assessment: Performance, Practical testing scenarios, 25%. Workshop, Class engagement, 25%. Presentation, Group presentation, 25%. Examination, Final Exam, 25%.

SSC2003 Sport Coaching: Applied Conditioning

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit introduces students to the concept, theories and practical implications of physical conditioning for a range of athlete abilities across a broad spectrum of land-based sports. Critical to both lectures and tutorials are both the theoretical concepts in maximising skill learning and performance; and the practical application of speed training for athletes from beginner to advanced levels.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Demonstrate understanding of current theory and research relating to speed training, including: reaction, acceleration, maximum speed, speed endurance;
2. Appreciate the fundamentals of running mechanics and related drills;
3. Appreciate the fundamentals of agility and related drills;
4. Demonstrate understanding of the key features of aerobic endurance systems (e.g., continuous, interval, Fartlek);
5. Be familiar with a range of flexibility formats (i.e., passive, static, dynamic, ballistic, PNF);
6. Demonstrate understanding of the key features of mobility, warm-up/cool-down and recovery;
7. Be conversant with energy system theory; and
8. Be familiar with appropriate use of water training as an integral component of speed development.

Class Contact: Lecture 1.0 hrs, Tutorial 2.0 hrs

Required Reading: Selected readings will be made available via the unit VU Collaborate site.

Assessment: Practicum, Ongoing practice, 30%. Exercise, Lesson Plan and Exercise Manual - Hurdle task A + B, 10%. Practicum, Practical: PIL session, 30%. Examination, Theory exam, 30%.

SSC3002 Sport Coaching: Talent Identification & Development

Locations: Footscray Park.

Prerequisites: Nil.

Description: The search for sport talent is almost as old as competitive sport. The modern advent of talent identification in sport (TID) dates back to the programs developed in the former Soviet and Eastern bloc countries in the 1960s and 1970s and was responsible for many Olympic successes. Now, some 40 years on, few areas in sport are as contentious as the ongoing debate of TID. While some experts argue that TID potentially provides talented players with opportunities possible to develop their potential, other experts argue that TID science lacks credibility and practice, is often flawed scientifically and/or ethically. It has also been said that “the best form of TID is mass participation.” This unit introduces students to TID and how it has historically been used, and at times misused. Students learn about TID theory and practices but also importantly underlying philosophical questions relevant to TID. There is also a focus on reconciling the dual objectives of mass participation and talent development.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Demonstrate understanding of giftedness and talent in a range of contexts;
2. Distinguish between what is talent identification (and what isn’t talent identification) from a multidisciplinary perspective;
3. Demonstrate understanding of the ethical implications and potential concerns, challenges and dilemmas relating to TID;
4. Demonstrate understanding of the typical stages of long term athlete development (LTAD), as well as current best practice in TID;
5. Work effectively with parents of talented children.

Class Contact: Lecture 1.0 hrs, Tutorial 1.5 hrs

Required Reading: Selected readings will be made available via the unit VU Collaborate site.

Assessment: Report, Laboratory reports, 30%. Presentation, Group presentation, 20%. Other, Class Debate (Presentation), 20%. Examination, Theory Exam, 30%. Non-assessed Class Debates map to LO 5 & 6 and GC 1c, 1d, 2a, 2b.

SSC3003 Sport Coaching: Skill Acquisition

Locations: Footscray Park.

Prerequisites: Nil.

Description: Students are introduced to motor learning or the more applied term, skill acquisition for sport coaching. Lecture and tutorial sessions introduce students to the major topic areas, measurement techniques and interventions that are relevant to teaching, learning, and performing complex movement skills. There is an emphasis on practical application of concepts, as students are asked to analyse skills and design training sessions that make use of the theories, and demonstrate their knowledge of concepts and instructional strategies.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Distil the basic principles and concepts of skill acquisition that apply to sport coaching;
2. Design and implement a range of practical activities for the development of skill acquisition through the practical activities (e.g., skill analysis, training drills, learning interventions) for the particular needs of a diverse range of athletes and coach populations;
3. Interrogate the value of different theoretical concepts in maximising skill learning and performance;
4. Design
technical and tactical skill progressions suitable for basic to advanced level athletes and teams; and 5. Investigate contemporary skill acquisition knowledge as it relates to coaching.

Class Contact: Lecture 1.5 hrs; Tutorial 1.0 hr
Assessment: Report, Major project- written report (includes a 5% hurdle task), 30%. Practicum, Practical application and student contribution: Instructor & peer review, 20%. Report, Tutorial Reports - Written report (4 x 5% each), 20%. Test, Two quizzes (15% each), 30%.

SSC3004 Advanced Sport Coaching Research and Knowledge Transfer

Locations: Footscray Park.
Prerequisites: SSC3005 - Coach and Athlete Development
Description: This unit links with and follows from the capstone unit SSC3005 Coach and Athlete Development. In this current capstone unit, students will be required to apply their learning and capabilities acquired from the 20 course units already completed. More specifically, students will be more actively engaged in their learning goals, study from a career ready perspective, and take a reflective learning perspective to bridge the gap between theory and practice. From a content perspective, the unit is designed to enable students to use available research resources and strategies to better understand; research methodologies, research findings, research transfer and exchange principles, as they relate to coaching and coach effectiveness. Students will also explore the ‘sport science revolution’ and in so doing, build a defensible framework for the implementation of sport science in coaching. This research unit also serves to consolidate multi-disciplinary learning from the key sport science disciplines (e.g., sport biomechanics, exercise physiology, strength and conditioning, ethical behaviour, socio-historical, sport psychology and skill acquisition). Successful completion of this unit will require students to demonstrate via class participation and experiential-based assessment tasks their understanding and appreciation of the three VU graduate learning capabilities and four specific course learning outcomes. Finally, student engagement is maximised through the use of a team-based learning pedagogy in this capstone unit.
Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to: 1. Demonstrate an understanding of fundamental research processes from both knowledge acquisition and knowledge exchange perspectives; 2. Work in teams to consult with coaching industry coordinators to solve ‘real world’ coaching challenges; 3. Successfully, work within and solve problems through the team based learning pedagogy; and 4. Demonstrate polished and professional presentation skills in the culminating graduating research pitch.

Class Contact: Lecture: 12 x 1 hour; Tutorial 12 x 1.5 hours
Required Reading: Selected readings will be made available via the unit VU Collaborate site.
Assessment: Laboratory Work, Research Methods Workshops, 25%. Test, Team Based Learning Quizzes (2), 20%. Assignment, Research methods and statistics assignment, 15%. Project, Knowledge Exchange & Transfer Research Project, 40%.

SSC3005 Coach and Athlete Development

Locations: Footscray Park.
Prerequisites: Nil.
Description: This capstone unit links with, and is a prerequisite to the capstone unit SSC3004 Advanced Sport Coaching Research and Knowledge Transfer. More specifically, students will be more actively engaged in their learning goals, study from a career ready perspective, and take a reflective learning perspective to bridge the gap between theory and practice. This unit is designed specifically to bridge the gap between the research (science) and practical (art) of sport coaching by examining coach and athlete development. Using a combination of traditional face-to-face learning and on-line research activities, students will investigate a coach/athlete development problem in the sport domain. An integral part of this unit is student’s exposure to the varied development experiences of coaches and athletes working in different settings. These learning are geared specifically around the broad theme of career and professional development for both coaches and athletes.

Students are given the opportunity to state and refine a coach and athlete development problem in lectures and tutorials. Students will construct a systematic literature review that focuses on a coach/athlete development problem as developed by students in consultation with sport coaching industry personnel. Successful completion of this unit will require students to demonstrate via class participation and assessments tasks their understanding and appreciation of the three VU graduate learning capabilities and four specific course learning outcomes. Finally, student engagement is maximised through the use of a team-based learning pedagogy in this capstone unit.
Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to: 1. Identify the density of developmental issues faced by coaches and athletes; 2. Locate themselves in relation to stages of coach and athlete development theories/models; 3. Identify the challenges applicable to coaching athletes in the Australian and international context; 4. Develop and refine research skills needed to solve complex coach/athlete development problems; 5. Work in teams to consult with coaching industry coordinators, solve ‘real world’ coaching challenges; and 6. Successfully, work within and solve problems through the team-based learning pedagogy.

Class Contact: Face to face: 4 x 1hr Lecture; 4 x 1.5hr tutorial Fieldwork video data gathering: Students will use remaining contact hours off-campus to conduct coach interviews as part of assessment activities.
Assessment: Test, Coach/athlete development team based learning workshops, 30%. Project, Coach/athlete industry engagement and literature review, 50%. Other, Workshop engagement assessments, 20%.

SS16001 Sport Integrity Leadership

Locations: City Flinders.
Prerequisites: Nil.
Description: This unit investigates concepts of leadership and their association with integrity and ethics at the societal, organisation, group and individual levels. Through personal reflection and relevant literature, plus expert presentations and group discussion of case studies, students will develop the awareness of leadership principles and the competency to apply them to decision making, problem solving, and integrity development in the sport business context, both locally and globally. Each module within the unit builds the students’ knowledge and understanding of integrity leadership in terms of theoretical and conceptual frameworks, approaches to assessment methodology, and intervention design and evaluation.
Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to: 1. Evaluate personal and professional development in the area of leadership integrity throughout the unit; 2. Interpret theoretical and research evidence to link...
integrity, ethics and leadership to the business of sport; 3. Analyse and evaluate complex sport business leadership issues, problems or exemplary practices; and, 4. Synthesise theoretical and evidence-based leadership principles for effective professional communication.

Class Contact: 18 hours face-to-face in week 1 and 18 hours online. 

Required Reading: Recommended readings will be made available via the unit VU Collaborate site. 

SS16002 Sport, Law and Regulation

Locations: City Flinders. 
Prerequisites: Nil. 

Description: Sport - it’s all about the rules! Behind the rules lies the legal framework. This unit identifies the legal frameworks of sport: the constitution and rules of sporting organisations, their rule-making processes, contracts, risk management, duties of care in relation to facilities, equipment and participation, selection processes and the possible legal challenges to them, conduct rules, integrity, discipline both on and off the field and more. The unit will be delivered with the assistance of major sporting organisations.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to: 
1. Analyse and present knowledge of key legal areas and their application to sport; 
2. Critically review a range of legal issues in sport; 
3. Investigate relevant legal principles, legislation and rules to issues arising in sport contexts; 
4. Critique the application of law in the policies, practices and culture of a sporting organisation or club; and 
5. Contextualise and solve problems in a range of applied practical cases in elite and/or community-based sport organisations.

Class Contact: Tutorial 3.0 hrs Workshop/Seminars: 9 hours 

Assessment: Test, Short Answer, 1 hour, 20%. Report, Field Experience Project Report, 40%. Case Study, Case Studies Report, 40%.

SS16003 Strategic Sport Marketing

Locations: City Flinders. 
Prerequisites: Nil. 

Description: This unit in Strategic Sport Marketing develops knowledge and skill in the marketing process as it relates to strategic market planning; segmentation, targeting, positioning, and delivery in consideration of multiple analysis models; processes implemented to understanding the sport consumer; application of logistical processes to aid in delivering products and services; and the promotional and public relations activities across traditional and specialised areas of the sport industry. Primary focus will be on the application of marketing principles to specific sport scenarios.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to: 
1. Substantiate the intricacies of the sport marketing mix, sport marketing analysis, and sport marketing planning through the integration of socially responsible and ethical practices. 
2. Appraise the value of sport marketing research internal reports, intelligence systems, decision support systems, and consumer behaviour analysis to better understand consumers and make appropriate strategic decisions for sport organisations. 
3. Analyse the relationship of quality product and logistical management to successful retail management, sales management, and e-marketing management. 
4. Evaluate the role of communication management in the enhancement of promotions, advertising, and sponsorships for various sport businesses. 
5. Implement emerging competencies in the areas of social media and digital/mobile networking; international and global marketing; and various impacts and legacies.

Class Contact: Lecture 3.0 hrs 

Assessment: Case Study, Multi-stage case study., 30%. ICT (Wiki, Web sites), Weekly discussion board contributions., 30%. Report, Marketing plan report (includes a 15-20 minute Multimedia presentation.), 40%.

SS16004 Strategic Planning and Management for Sport Business

Locations: City Flinders. 
Prerequisites: Nil. 

Description: This unit in Strategic Planning and Management for Sport Business will focus on applying various concepts and analytical tools to strategic organisational problems and issues in sport business management with the end goal of resolution leading to optimisation for the total sport enterprise. Through analysis of the forces that shape strategic decisions, and the basic tools sport managers and leaders use in their attempt to maximise the value of the sport organisation, students will use team processes, agendas, brainstorming techniques, critical thinking skills, and creativity tools to explain how to move sport organisations forward in a positive direction towards a vision.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to: 
1. Design short-term and long-term strategic decisions using financial, marketing research, operations and sales data. 
2. Formulate a strategic business plan that articulates the implementation of strategic changes to a real sport business. 
3. Evaluate the methods for making substantive recommendations to senior management of a sport organisation involving several areas of the company simultaneously. 
4. Implement techniques of strategic planning and management to a variety of sport business situations. 
5. Analyse and research sport business industry problems in a wide variety of sport organisational settings in order to evaluate findings and prioritise change.

Class Contact: Lecture 3.0 hrs 
Assessment: Case Study, Case Analysis 1, 15%. Case Study, Case Analysis 2, 15%. ICT (Wiki, Web sites), Weekly discussion board contributions., 30%. Report, Strategic planning report (includes a 15-20 minute Multimedia presentation.), 40%.

SS17001 Sport Media and Communications

Locations: City Flinders. 
Prerequisites: Nil. 

Description: This unit aims to develop the cognitive and communication skills of sports managers. This will be done by introducing students to a number of key media management concepts and communications perspectives. The unit will cover areas including role of communications in management, personal communications, working with and utilising the various forms of media, the expanding use of the Internet in communications and sports, crisis management, sociological and legal issues, and
social responsibility and ethics.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Analyse the sport media and communications environment with knowledge of the relationship between sport and the media, historical development, current applications and key organisations (context);
2. Implement the Strategic Sport Communications Model (SSCM) to organisational and leadership communications in sport, strategic management of sport organisations, and the relationship between sport media and sport organisations;
3. Critique various methods for operationalising personnel, mass, digital, mobile, and social media communication strategies using applicable media methods
4. Interpret competitive market dynamics and opportunities in an organisational context of integrated marketing communications, public relations, and crisis communication within the sport media and communications landscape;
5. Evaluate the various sociological, legal, ethical, and social responsibility issues inherent to sport media and communications.

**Class Contact:** Tutorial 3.0 hrs; 9 hours online.

**Required Reading:** Selected readings will be made available via the unit VU Collaborate site.

**Assessment:**
- Case Study, Case study analysis., 15%. Case Study, Case study analysis., 15%.
- Report, Sport communications and new media., 25%. Project, Communication plan., 45%.

**SS17002 Sport Facility and Event Management**

**Locations:** City Flinders, Universidad Europea, Madrid, Spain.

**Prerequisites:** Nil.

**Description:** This unit provides students with both in-depth theoretical knowledge and practical understanding of the administrative functions that support the professional management of sport facilities and sport events. The unit will focus on elements of planning, design, management, and delivery. Special emphasis will be given to risk management, security and safety, service quality, and performance evaluation. The unit will be structured around case analysis and problem solving utilising class discussions, guest speakers, and facility/event visitations. This unit is part of a set of two units offering a two week study abroad experience in Madrid, Spain which "lifts and shifts" the classroom from the VU home campus to Real Madrid and includes guest speakers. The cost is included in the unit fees and covers standard airfare, accommodation and a meal plan. Students wishing to upgrade or deviate from the set plan are responsible for the additional costs. Mid-year enrolments are not eligible to do the study tour in their first semester.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:
1. Evaluate the ever evolving process of the globalisation of sport;
2. Devise a global structure of the sport industry;
3. Critically reflect on the power relations and who are the key global players influencing the development and progress of sport (business);
4. Critically review the interpersonal relationship between sport and culture in the industry and provide well-informed opinions about planned and unplanned cultural changes;
5. Critique the links between political agendas and sport business; and
6. Propose critical opinions about sport and its place in a global society.

**Class Contact:** Seminar 4.0 hrs; Thirty-six (36) hours for one semester comprising a 4 hour introductory seminar, and 32 hours of blended learning including online activities and study abroad trip to Madrid, Spain.

**Required Reading:** Selected readings will be made available via the unit VU Collaborate site.

**Assessment:**
- Literature Review, Critical popular article on a sport business issue., 30%. Case Study, Case study analysis., 20%. Case Study, Case study analysis., 25%. Presentation, Presentation on a current sport business opportunity., 25%.

**SS17004 Sport Economics and Finance**

**Locations:** City Flinders.

**Prerequisites:** Nil.

**Description:** This unit gives students a grounding in the basics of sport economics and finance to enable students to be financially literate and comfortably use numerical data to plan and manage the economic affairs of sport and active recreation enterprises. Students will become proficient in the critical analysis of balance sheets, ratios and financial statements, and cash flow statements. Benefit-risk analysis will be used to compare and contrast different financing tools for both the short and long term. Special attention will be given to financial performance, and how financial ratios can be used to diagnose the financial health of sport and recreation.
organisations, events, tournaments and programs. Techniques for constructing budgets, estimating and monitoring future revenue, expenses, and profit levels will also be discussed.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Exhibit economic and financial literacy as applied to sport business operations;
2. Evaluate financial statements to analyse past performance of sport enterprises;
3. Implement budgeting, pricing, break-even, and forecasting principles to the construction of financial plans for sport enterprises;
4. Critique the impacts and legacies of sport events and programs on municipalities.

Class Contact: 15 hours face to face and 21 hours online.

Assessment: Assignment, Financial diagnosis, 30%. Report, Financial plan., 40%. Project, Economic impact statement, 30%.

SIS7901 Sport Research Thesis

Locations: City Flinders.

Prerequisites: SIS77001 - Research Methods

Description: The sport research thesis provides students with an opportunity to critically reflect on and exhibit the knowledge and skills acquired through the coursework units in a thematic project that addresses a sport business and integrity problem. The thesis should show the student’s ability to propose and design independent, creative and ethical research, written up in a format which adheres to academic conventions, and to propose new knowledge about the problem addressed in the thesis. This makes the thesis a challenging and creative part of the Master’s program. During the research thesis, students will design a research proposal and a clear research strategy, creatively and critically use theoretical insights and concepts relevant to the research, independently conduct empirical research, and report about the research and the results in a clear and systematic way. The research proposal must be approved by the course coordinator and the supervisor.

Credit Points: 24

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Design a research project to investigate a sport business and integrity problem;
2. Critically review theories, concepts, principles and procedures, relevant to the research question;
3. Implement research methodology;
4. Interpret and contextualise research findings;
5. Propose future directions for research to contribute to the wellbeing of local and global communities;

Class Contact: Thirty-six (36) hours for one semester comprising 6 hours of face-to-face meetings with nominated supervisor and 30 hours of independent work in the workplace.

Required Reading: Academic books relevant to the research topic.

Assessment: Presentation, Present research proposal to students and academics in the thematic thesis group, 10%. Thesis, Completion of the research thesis, 70%. Presentation, Present findings at the University Research Symposium, 20%. Students are required to submit a completed research thesis of approximately 16,000 words by the end of this unit and present the findings to an academic audience.

SSM2001 Theory and Instruction of River Craft

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit compiles with industry standards and requirements as established by the Adventure Activity Standards and administered by the Outdoor Recreation Centre. This unit aims to impart theoretical, practical and instructional skills in rafts and open Canadian canoes on still water and down river. Leadership theories, safety and risk management issues (eg. rescue) and procedures for day trips and extended trips with diverse groups will be covered. Students will develop theoretical understandings of river and water flow dynamics and their implication for river travel. As well, they will extend their appreciation of the relationships between rivers and surrounding land, flora and fauna and the need for conservation. The value of river trips in educational and recreational settings will be explored.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Interpret the industry context of river craft and have the opportunity to gain their White Water Guide;
2. Assess the safety issues and risk management of aquatic environments through the exploration of risk management theory and practice;
3. Apply appropriate planning and facilitation strategies to plan and lead trips on Grade 2 rivers;
4. Devise and implement a learning program for diverse groups;
5. Articulate the environmental issues surrounding inland waterways and utilise minimal impact practices to assist in maintaining the sustainability of this environment; and
6. Report the value of river trips as recreational experiences and educational tools.

Class Contact: Lectures: 12 x 1 hour; Tutorials: 12 x 1.5 hours; Field trips: 140 hours.

Assessment: Practicum, Practicum A - Practical skills and field work (WIL equivalent) (750 words), 25%. Practicum B - Practial skills and field work (WIL equivalent) (750 words), 25%. Assignment, Written assignments/presentations (1500 words), 50%.

SSM2002 Career Development and Employability 1

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit aims to bring students into career maturity before they graduate from the course. Students learn the skills, knowledge and insights to become proactive and strategic career builders and gain an understanding of the variety of career options in the sport and recreation industry sectors. They learn the importance of gaining work-related experience and also develop understanding to improve their career outcomes. Students learn job hunting skills by securing a career placement of their choice. This placement should improve students career options and employability after graduation.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Demonstrate significant knowledge and understanding of work and career choices and requirements;
2. Prioritise and reflect on a broad range of strategies for achieving own career and learning goals;
3. Collaborate effectively with responsibility for own and team outcomes, to complete tasks, evaluate and respond to own and others performance using given parameters; and
4. Communicate effectively both orally and in writing, on a broad range of contemporary topics as a professional demonstrating significant control over key genres/ text types.

Class Contact: Tutorial 2.5 hrsHalf day workshop: 3.0 hours; Career placement within sport and recreation industry: 70 hours.

SSM2003 Ethics in Sport Management and Active Recreation

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** This unit is designed to develop the students' awareness and appreciation of the ethical dimensions of sport management and active recreation. The unit will facilitate the development of the students' ability to analyse critically various issues, policies, practices, and relationships within sport so as to inform sport management, active recreation, and professional work cultures. Special attention will be paid to the development of ethical reasoning and its practical application to topics such as: anti-doping, match fixing, diversity and antidiscrimination (e.g., gender and sexuality), race, ethnicity and religion, ability and disability; health and safety (e.g., injuries, children's rights and protection, animal welfare, environmental protection).

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:

1. Understand concepts of ethics, morals, and values;
2. Use critical reasoning to analyse arguments and detect fallacies;
3. Demonstrate knowledge of ethical reasoning and ethical reasoning approaches; and
4. Use ethical reasoning to identify, solve problems, and recommend professional practice improvement in sport, sport management, and active recreation.

**Class Contact:** Lecture 1.0 hrs Tutorial 1.5 hrs

**Assessment:**
- Review: Globalisation Short Papers x 3 (10% each) (each paper would focus on a different region of the world), 30%. Presentation: Presentation on one of the three Globalisation Short Papers listed at Item 1., 10%. Case Study: Case Study Analysis x 3 (10% each), 30%. Report: Analytical Report - Outline 10% & Written Paper 20%, 30%.

SSM2004 Transnational Sport Environments

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** This unit of study examines the business of sport outside of the domestic marketplace, and addresses its internationalisation from various perspectives. It first of all introduces students to key aspects of the international business environment, where nation states, economic systems, government ideologies, and business cultures intersect. Special attention will be given to the ways in which different political and economic systems shape the structure and conduct of sport around the world, and the relationship between international sport and the service economy. The unit also addresses the ways in which the internationalisation of sport is used to expand international trade in sport products, strengthen national identities, accelerate the transnational movement of players and sport professionals, and extend the global reach of sport broadcasting. These issues provide the context for examining the managerial implications and challenges of globalised sport. Topics include sports relationship with social media, professional sport league structures, the economic and social impact of sports broadcasting, and the impact of geography, culture, ethnic heritage and living standards on the organisation of sport and its management in different nations.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:

1. Describe and explain the global spread of football over the last 150 years;
2. Examine the spatial distribution, structure, commercial scale, and community significance of football around the world;
3. Examine the management of football, and critically assess management attempts to rationalise and scientific the game;
4. Evaluate football's role as an instrument of social development, and a vehicle for promoting social causes; and
5. Identify the major political and cultural challenges facing football.

**Class Contact:** Lecture 1.0 hrs Tutorial 1.5 hrs

**Required Reading:** Hemphill/2016 2016 Ethics Toolkit Melbourne/Victoria University

**Assessment:**
- Paper 20%, 30%.
- Final Exam, Final Exam (written), 40%.
- Case Study, Case Study Report, 30%.
- Paper, Paper (written), 20%.
- Presentation, Presentation on one of the three Globalisation Short Papers listed at Item 1., 10%.

SSM2005 Global Studies in Football

**Locations:** Footscray Park.

**Prerequisites:** Nil.

**Description:** This unit adopts a multidisciplinary approach to the study of various codes of football, and will thus involve a fusion of business, economics, sociology, politics, and history. The codes include Australian Rules Football, Rugby League, Rugby Union, Gaelic Football, American Football (Gridiron), Canadian Football (Gridiron), International Rules, (a hybrid game that fuses Gaelic Football with Australian Rules Football), and finally soccer (otherwise known as Football to most of the world's sport followers). This unit pays particular attention to the political, historical, economic, and cultural dimensions of each code of football. This is undertaken at three levels: local, national and international. The unit also seeks to contextualise the increasing globalisation and commercialisation of football through a cross-code analysis of a number of related themes. They include football as a commercial spectacle, football and fandom, football and broadcasting, football and regulation, football and performance technology, football and violence, football and gender, football and ethnicity/race, and football and community. These themes will be examined in a global context, and additionally used to frame the discussion of local issues. Comparative case-studies will be used to illustrate key theories, structures, and processes.

**Credit Points:** 12

**Learning Outcomes:** On successful completion of this unit, students will be able to:

1. Understand concepts of ethics, morals, and values;
2. Use critical reasoning to analyse arguments and detect fallacies;
3. Demonstrate knowledge of ethical reasoning and ethical reasoning approaches; and
4. Use ethical reasoning to identify, solve problems, and recommend professional practice improvement in sport, sport management, and active recreation.

**Class Contact:** Lecture 1.0 hrs Tutorial 1.5 hrs

**Assessment:**
- Review: Globalisation Short Papers x 3 (10% each) (each paper would focus on a different region of the world), 30%. Presentation: Presentation on one of the three Globalisation Short Papers listed at Item 1., 10%. Case Study: Case Study Analysis x 3 (10% each), 30%. Report: Analytical Report - Outline 10% & Written Paper 20%, 30%.
Analysis x 3 (10% each), 30%. Report, Analytical Report - Outline 10% & Written Paper 30%, 40%.

SSM2102 Foundations of Outdoor Education and Adventure Sports

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit considers the history, philosophy and theoretical applications of outdoor education. It explores the relationship between humans and nature, and the opportunities for personal growth through outdoor education programs. The concepts of leadership, safety, group management, program design and organisation are introduced. Students will be required to pay field lab fees within this unit.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Debate the past and future direction of outdoor education; 2. Adapt knowledge and skills and design appropriate activities to develop human potential in given environmental settings; 3. Adapt knowledge and skills of lightweight camping and organize self and others in a camping activity; and 4. Interpret experiences of a range of outdoor education activities with responsibility and accountability for own learning.

Class Contact: Lecture 1.0 hr; Tutorial 2.0 hrs

Assessment: Due to risk management and professional/industry requirements to demonstrate knowledge and skill within both simulated and workplace environments, graded attendance and hurdle tasks apply to laboratory work and practicums. Laboratory Work, Field Lab 1 requirements, 20%; Laboratory Work, Field Lab 2 requirements, 20%. Literature Review, Review of contextually specific articles and readings, 40%; Laboratory Work, Field Lab 3 requirements, 20%.

SSM2103 Historical and Cultural Aspects of Australian Sport

Locations: Footscray Park.

Prerequisites: Nil.

Description: The aim of this unit is to provide students with an understanding of the social and cultural factors that, over time, have influenced the development of sport, recreation and leisure in Australia. The first part of the unit therefore provides an extended narrative framework which explores the evolution of sport in Australia from Aboriginal occupation to the late 20th century, with special emphasis given to developments in the Federation era and in the decades immediately following World War II. A number of sports and pastimes are considered as specific case studies, and students are encouraged to examine these case studies in the light of relevant key ideas, debates and concepts. The unit also includes a Work Integrated Learning project based around aspects of sporting heritage, and with particular attention given to the academic skills of reading, writing and research.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Debate the past and future direction of outdoor education; 2. Adapt knowledge and skills and design appropriate activities to develop human potential in given environmental settings; 3. Adapt knowledge and skills of lightweight camping and organize self and others in a camping activity; and 4. Interpret experiences of a range of outdoor education activities with responsibility and accountability for own learning.

Class Contact: Lecture 1.0 hr; Tutorial 1.0 hrs; Lectures: 12 x 1.5 hour; Tutorials: 12 x 1 hour.

Assessment: Exercise, Tutorial exercises, 20%; Research Paper, Research paper, 20%. Project, WIL project, 20%. Examination, Final examination, 40%.

SSM2104 Programming for Sport Development and Community Action

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit provides an overview of recreation program planning, development and implementation. It seeks to encourage and support the development of a personal program development philosophy based on an appreciation of the scope of recreation program development and recreation benefits. Recreation programs are one of the key mechanisms for consumers to experience a variety of recreation services. The unit aims to provide students with the knowledge and information to develop, plan, document and deliver recreation programs to different client groups. This unit is an essential first-year unit that sets the framework for recreation professionals to gain the skills to organise and deliver recreation services.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Apply Rossman and Schlatter’s (2008, 2011) Program Development Cycle to contemporary recreation programs; 2. Conduct a needs assessment for a range of given recreation programs; 3. Implement and evaluate a recreation program; and 4. Critically analyse the basic social and psychological concepts inherent in programs and what people respond to.

Class Contact: Lecture 1.5 hrs; Tutorial 1.0 hrs

Assessment: Paper 30 %, 40%. Project, WIL project, 20%. Examination, Final examination, 40%.

SSM2201 Bushwalking Leadership

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit complies with industry standards and requirements as established by the Adventure Activity Standards and administered by Outdoors Victoria. Students develop lightweight camping skills, planning and logistics, facilitation and leadership skills to participate in and conduct day and extended overnight bushwalks. They gain sound knowledge of the theories and modes of instruction of bushwalking and an understanding of the physical, psychological and social demands of bushwalking and lightweight camping. Caring for, and appreciation of, the bush environment through the utilisation of minimal impact practices and industry-accepted standards are emphasised.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Advise appropriate bushwalking equipment for different uses and contexts with wide ranging challenges; 2. Evaluate and make evidence-based judgements on the application of bushwalking in an educational and recreational setting as appropriate to various client groups; 3. Adapt navigational concepts and appropriate navigational practice in complex and unpredictable situations; and 4. Analyse and reflect on the historical, philosophical and environmental contexts of bushwalking in Australia and review current requirements related to the safety and well being of individuals and groups; and 5. Collaborate, plan and prepare an extended bushwalk with professional judgement and leadership utilising minimal
environmental impact practices to industry-accepted standards.

Class Contact: Seminar 3.0 hrs

Assessment: Practical, Practical navigation skills and application of theory during field trips, 20%. Test, Written navigation and trip planning test, 40%. Project, Field Lab Planning Project, 20%. Report, Reflective report, 20%.

SSM2202 Safety in the Outdoors

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit examines issues relating to the safe conduct of outdoor education experiences from a range of perspectives. Students develop their understanding of group management in dynamic environments, document preparation, review procedures, and the implementation of appropriate safety skills, as applied to a variety of environments and settings.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Calculate and monitor potential risks for individuals and groups in a range of outdoor experiences;
2. Map, plan and assess potential risks in a range of different types of trips;
3. Assess personal risk and act on information from a range of sources; and
4. Adapt risk assessment procedures to a range of outdoor educational and recreational activities conducted in a range of situations.

Class Contact: Seminar 3.0 hrs

Assessment: Practicum, Professional Practice and application of Theory, 25%. Test, Legal quiz, 30%. Literature Review, Literature search and article reviews, 25%. Presentation, Debate Topic Presentation, 20%.

SSM2204 Sport Sponsorships and Partnerships

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit introduces students to a variety of strategies that may be used to broaden the funding base of organisations and partnerships between organisations. Students are given a sound knowledge and develop skills to apply processes and procedures in sourcing sponsorships and partnerships. The unit concentrates on two aspects: Sponsor objectives and benefits, identifying and approaching sponsors, developing and packaging sponsorship proposals and evaluating the sponsorship. Students have the option to prepare and present a sponsorship proposal in collaboration with a selected club and obtain industry, peer and teacher feedback on the success of the proposal. Partnership objectives and benefits, seeking appropriate partners and sustaining partnerships. Students have the option to prepare and present a partnership proposal in collaboration with a selected club and obtain industry, peer and teacher feedback on the success of the proposal.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Identify various approaches to sport and active recreation)
2. Critically analyse sociological perspectives on sport and recreation in contemporary Australia;
3. Use sociological theories, concepts and methods to analyse and think creatively about empirical problems in relation to contemporary sport in a range of local and global contexts;
4. Communicate sociological ideas about sport and active recreation effectively in oral and written formats, including blogs.

Class Contact: Lecture 1.5 hrs; Seminar 2.5 hrs; Tutorial 1.0 hr; Lectures: 12 x 1.5 hours; Tutorials: 12 x 1 hour for one semester.

Required Reading: Various articles, book chapters and online and audiovisual materials will be used in the course. Electronic copies of, or links to, the required readings will be made available to students on VU Collaborate.

Assessment: Presentation, Class presentation, 30%. Other, Online blog journal (5 x blog), 70%.

SSM3200 Inclusion and Social Responsibility in Sport and Active Recreation

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit invites students to think sociologically about sport and active recreation. Key sociological themes and issues are covered, enabling an understanding of the contemporary social world and how it shapes sport and active recreation. Through this knowledge, students are encouraged to critically examine some of the pressing social challenges concerning sport and active recreation. This includes the Global North and the Global South. The ideas developed in this unit are essential to an understanding of sport and active recreation planning, programming, management, leadership, and marketing, all of which are fundamental processes utilised in the rest of the course. How can sport "make a difference" in society beyond the playing field? Why are there sports identified as boys or girls sports? How do different sports organisations and cultures experience and respond to violence, racism and performance-enhancing drug use? How do professionalism and commercialisation reshape amateur and community expressions of sport? Case studies will be used and relevant sociological theories and concepts put to work. Assessments and exercises will allow students to focus on a chosen aspect of sport, and an particular sports of their interest.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Identify various approaches to sport and active recreation;
2. Critically analyse sociological perspectives on sport and recreation in contemporary Australia;
3. Use sociological theories, concepts and methods to analyse and think creatively about empirical problems in relation to contemporary sport in a range of local and global contexts;
4. Communicate sociological ideas about sport and active recreation effectively in oral and written formats, including blogs.

Class Contact: Lecture 1.5 hrs; Seminar 2.5 hrs; Tutorial 1.0 hr; Lectures: 12 x 1.5 hours; Tutorials: 12 x 1 hour for one semester.

Required Reading: Various articles, book chapters and online and audiovisual materials will be used in the course. Electronic copies of, or links to, the required readings will be made available to students on VU Collaborate.

Assessment: Presentation, Class presentation, 30%. Other, Online blog journal (5 x blog), 70%.
SSM3001 Expedition Leadership

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit complies with industry standards and requirements as established by the Adventure Activity Standards administered by the Outdoor Recreation Centre. In this unit students will develop and apply leadership skills developed in other core and stream units to extended outdoor expeditions. There will be a focus on the theory and practice of expeditioning. Comprehensive risk management planning and implementation will be a feature of the studies. The relevance of expeditioning as an educational and recreational activity will be investigated with particular reference to the development of self-confidence and basic social skills such as trust. The unit will allow students to explore leadership and group management theories and understandings experientially. An extended expedition is considered to be a minimum of eight days in duration. Students will be required to pay field lab fees within this unit.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Conceptualise sport and recreation for development, social responsibility, corporate citizenship, social cause endorsement, and cause-related marketing, and the diverse needs of population groups that are under-represented in sport and active recreation;
2. Analyse and evaluate inclusive and social responsible sport and recreation industry practices;
3. Articulate their personal and professional philosophy of sport and recreation within an inclusive and socially responsible context; and
4. Devise inclusive and socially responsible programs for sport and recreation organisations.

Class Contact: Lecture 1.0 hr; Tutorial 1.5 hrs

Required Reading: Selected readings will be made available via the unit VU Collaborate site.

Assessment: Test, Test in week 6 covering all of the theory, 25%. Assignment, Students to go out to assess the policy and programs of a sport or recreation association (paper - 20%; 5 slides with a 100 word abstract - 5%), 25%. Report, Written report, 40%. Presentation, Presentation, 10%.

SSM3002 Outdoor and Environmental Philosophy

Locations: Footscray Park, St Albans.

Prerequisites: Nil.

Description: This unit explores philosophical perspectives surrounding outdoor education, outdoor recreation and the environment. This unit will challenge students’ understanding of their world through comparing a range of philosophical approaches. Eco-psychotherapy, social ecology and adventure therapy approaches to the outdoors experience will also be discussed. Students will explore the evolution of environmental consciousness, including the consequences of urbanisation. Issues of program design, social justice, gender and accessibility to outdoor education will be explored. The role of the outdoor professional through the development of a personal philosophy will be critically reviewed.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Compare philosophical perspectives relating to outdoor and environmental education;
2. Critically identify a personal and professional commitment and philosophy which reflects values, ethics and morality in relation to experiences in the outdoors;
3. Synthesise issues relating to society and the environment in a socially critical manner;
4. Differentiate current ethical issues in outdoor education/recreation; and
5. Design and implement practical outdoor programs based on a sound theoretical basis.

Class Contact: Lecture 1.0 hr; Tutorial 2.0 hrs

Required Reading: Selected readings will be made available via the unit VU Collaborate site.

Assessment: Literature Review, Online Literature Discussion posts, 15%. Laboratory Work, Field Lab - Rogaine, 10%. Presentation, Philosophy Book presentation, 10%. Exercise, leadership and Personal Philosophy Exercise and Statement, 65%.

SSM3003 Career Development and Employability 2

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit is designed to facilitate a successful transition to employment in the fields of sport and recreation management, outdoor recreation, youth work, exercise and sport science. Students follow a career development model to further develop their ability to proactively manage a career throughout their life. To enable students to advance employment opportunities the unit will integrate: self-understanding activities; career strategic planning; networking; interview techniques; and methods to generate a professional image and workplace achievements. It progresses critical understanding of how to identify strengths and competencies through education; employment experiences; work integrated learning; and extracurricular experiences. The unit enhances job hunting strategies and career insights to establish a career-focused placement designed to provide a pathway into a chosen field and improve the students current employment status.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Analyse skills, career values and personality to gain a clear career direction;
2. Advance self-marketing skills for lifelong career development focussing on communicating achievements during job interviews and professional image.
management;
3. Adapt and synthesise theoretical knowledge and skills to the workplace by undertaking a career placement in a responsible, accountable and collaborative manner;
4. Build on existing business communication skills and practices to enhance capability to be an effective professional communicator; and
5. Exercise independent critical thinking, practices and judgements and reflect within the career placement at the workplace setting.

Class Contact: Four 2.5 hour tutorials, one career networking event, a two day workshop at the end of semester and a 140 hour placement.

Required Reading: Class materials to be provided to students during their first tutorial.

Assessment: Portfolio, Completion of a range of self-marketing activities including an updated resume, business card, career pitch to be used at a business event, 20%.

Workshop, Analysis of personal data to gain definite career directions and performance of a job interview, 30%.

Report, Completion of a 140 hour career placement and professional report, 50%.

SSM3004 Sport Governance in the Global Economy

Locations: Footscray Park.

Prerequisites: Nil.

Description: Sport governance has recently come under severe scrutiny, and as a result many weaknesses have been exposed in the governance systems of both international and national sporting bodies. This unit focuses on governance issues through the full spectrum of sport, and thus includes commercial, corporate, non-profit, government, and community/grassroots sports. Regulatory powers, strategic management, policy development, organisational structure, and sanctioning within the varying national governing bodies will all be addressed. The unit will examine the purpose and principles of sport governance, different models of governance, regulatory powers of governing bodies, and governance as a vehicle for exerting external and internal influence. It will also address the governance roles of national and international sport bodies; the importance of policy and policy development in ensuring effective governance outcomes; current issues impacting governance and policy development within sport organisations; and the role played by strategic planning in the governance process. The unit extends with the formulation of best-practice models of sport governance. Topics will be analysed from multidisciplinary perspective, with an emphasis on political, economic, cultural, geographic, demographic, legal, and regulatory factors.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Analyse, assess, critique or investigate the theory and practice of sport governance;
2. Evaluate the role governance plays in delivering quality sport products and services;
3. Critically assess the current structures and processes that operate in international sport;
4. Succinctly articulate the key governance problems facing international sport; and
5. Formulate best-practice models of sport governance.

Class Contact: Lecture 1.0 hr Tutorial 1.5 hrs

Assessment: Report, Students will undertake a comparative analysis of two national sporting bodies, one from the southern and one from the northern hemisphere, 30%. Project, Students will critically examine the operation of a an international governing body for sport, 30%. Case Study, Students will select a professional sports club for in-depth analysis, 40%.

SSM3005 The International Olympic Movement

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit provides students with a broad knowledge and critical understanding of the globalisation, commercialisation, and acculturation of the modern Olympic Games. This includes the Summer and Winter games, and also extends to the Paralympics. It does this by examining in detail the historical, economic, political, and cultural, literature that addresses the Olympic movement. Its coverage is extensive, and includes a case analysis of the Olympic Movements history, structure, function, service delivery, controversies, and other relevant issues including the ideological and cultural impact of the Olympic ideals. Special attention is given to the bidding process involved in securing an Olympic Games, starting from the pre-bid approval process within municipalities and countries, moving into the bid process to selection, and onward to the preparation, implementation, evaluation of impacts and legacies. The unit also gives students an awareness of the relationships between the Olympic Games and sport-tourism, especially as they relate to Australia in a global context. Additional focus will be given to recent legislative changes in the Olympic Movement, especially Olympic Agenda 2020. The implications of Olympic Agenda 2020 for the Olympic Movements future structure and organisation will be critically assessed.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Articulate the evolution of the Olympic Games from ancient to modern;
2. Appreciate or analyse or assess the commercialisation of the Olympic Games, and reveal the ways in which its commercialisation has threatened its traditional ideals;
3. Evaluate the impact the Olympic Games has had its host cities, focusing on the bidding process, the construction of venues and related infrastructure, and the legacies that are left behind;
4. Review major cultural challenges in the Olympic Movement, and their implications for the Olympic Movements sustainability; and

Class Contact: Lecture 1.0 hr Tutorial 1.5 hrs

Assessment: Research Paper, Exploratory paper - The Olympic ideal: implications for global sport (an international comparison), 30%.

Case Study, Case Study Analysis, 40%.

Report, Analytical Report - Australia and the Olympic Movement (Analyse the influence of the IOC on Australian sport's structures, cultures, and practices), 30%.

SSM3101 Environmental Inquiry, Sustainability and Communities

Locations: Footscray Park, St Albans.

Prerequisites: Nil.

Description: This unit explores the interdependent relationship between humans and the environment with the focus on education for the environment. The aim is to foster a deeper understanding of the concepts of ecological sustainability and the conservation of natural and urban environments through inquiry and practical application.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Analyse their personal relationship with urban and non-urban environments with responsibility and accountability;
2. Critically evaluate the breadth of human relationships and their connections with urban and non-urban environments in Australia and globally;
3. Investigate ecological relationships within different
SSM3102 Understanding Adventure Based Learning
Locations: Footscray Park, St Albans.
Prerequisites: Nil.
Description: This unit complies with industry standards and the Adventure Activity Standards requirements as established by Outdoor Victoria. In this unit emphasis is on developing specific leadership experience with adventure/recreation programs, as well as examining critical leadership and program design elements. Personal leadership skills and styles are developed. The unit integrates adventure-based experiential learning theories, models and concepts with the skills of adventure programming and implementation and the safety procedures necessary to lead the activities. Specific areas of the application of adventure therapy with various client groups are also considered.
Credit Points: 12
Learning Outcomes: On successful completion of this unit, students will be able to:
1. Recommend, sequence and apply facilitation of adventure based learning activities for wide ranging client groups;
2. Critically reflect on the value and application of adventure based learning practices, theories and techniques with responsibility for own learning and professional practice;
3. Plan and manage group safety during activity participation with initiative and judgement;
4. Lead diverse group learning processes, and implement safety procedures to lead the activity;
5. Innovate new strategies to facilitate experiential learning, adventure and recreational pursuits as relevant to contemporary demands of the industry;
6. Integrate leadership styles and personality types using tests, group feedback and self-assessment inventories as a basis for independent life-long learning.
Class Contact: Lecture 1.0 hr Tutorial 2.0 hrs
Assessment: Exercise, Online personality traits test, 10%. Assignment, Lesson plan and delivery of an activity, 25%. Exercise, Field lab race group menu plan, 10%. Exercise, Field lab evaluation, 25%. Assignment, Development and presentation of an adventure program, 30%.

SSM3103 Sport Facility Management
Locations: Footscray Park.
Prerequisites: Nil.
Description: This unit is designed to provide students with theoretical knowledge and practical experience with the administrative functions that support the management, planning and evaluation of sporting and community venues and facilities. The unit draws on the content in sport management, sport marketing and human resources management in sport as a basis to address the issues and problems in sport facility management. The unit aims to provide students with an understanding of key facility management concepts and theories and a capacity to apply these concepts in the sport and recreation facility industry. The skills and knowledge students obtain in this unit contribute to their sport career development.
Credit Points: 12
Learning Outcomes: On successful completion of this unit, students will be able to:
1. Integrate conceptual understandings of strategic planning, operational management, staff development, service delivery, performance evaluation with advanced specialist knowledge and managerial know-how within sport facility management;
2. Adapt and apply theoretical and technical knowledge and skills in diverse contexts that underpin the effective management of sport facilities;
3. Critically review and apply information with initiative and judgement in order to both anticipate and creatively solve problems related to the management of sport facilities; and
4. Exhibit professional judgment, ethical standards, and social sensitivity by adapting knowledge and managerial skills to make decisions that provide inclusive, sustainable and culturally relevant sport facility services.
Class Contact: Lecture 1.0 hr Tutorial 1.5 hrs
Assessment: Report, Field trip review: prepare a report that summarises and critiques facility management practices (WIL) (1000 words), 25%. Report, Facility performance evaluation report: (groups of 3 to 4) collect data and evaluate the performance of a sport or recreation facility (1200 words), 45%. Examination, Demonstrate understanding of key facility management concepts and theories and their industry application (800 words), 30%.

SSM3104 Research and Evaluation in Sport
Locations: Footscray Park.
Prerequisites: Nil.
Description: Research and evaluation are integral elements of sport management. Sport and recreation professionals need to understand the uses, processes and implications of research and evaluation and be able to apply various research and evaluative techniques in their work. This unit provides students with a conceptual and practical introduction to research principles, methodologies, methods and applications. Students will familiarise themselves with the language of research, understand the research process, and learn how to design, conduct and critically review research.
Credit Points: 12
Learning Outcomes: On successful completion of this unit, students will be able to:
1. Analyse the nature of research and evaluation and their applications to sport and active recreation;
2. Critically review research and evaluation literature related to sport and active recreation;
3. Identify and apply basic research principles and methods (quantitative and qualitative) suitable to particular research problems;
4. Present research findings in oral and written formats.
Class Contact: Lecture 1.0 hr PC lab 1.5 hrs: lectures: 12 x 1 hour; labs (tutorials): 12 x 1.5 hours
Required Reading: Required readings Various articles, book chapters and online and audiovisual materials will be used in the course. Electronic copies of, or links to, the required readings will be made available to students on VU Collaborate.
Recommended readings While there is no set textbook for this course, the following books are recommended: - Alan Bryman (2015) Social Research Methods (5th edition). Oxford: Oxford University Press. - A.J. Veal & Simon Darcy (2014) Research Methods in Sport Studies and Sport Management: A Practical Guide. London: Routledge. Support materials and resources VU Collaborate will be used as the site for all support materials and resources. Students are strongly encouraged to
check the SSM 3104 space regularly.

Assessment: Presentation, Oral presentation on research proposal, 20%. Review, Review of research literature, 20%. Test, Quiz to assess understanding of research concepts and principles, 20%. Report, Research report, 40%.

SSM3202 Leadership in the Outdoors

Locations: Footscray Park.

Prerequisites: Nil.

Description: This unit aims to increase students' understanding of the complexities of leadership, and to develop their skills with sound judgment, empathy and knowledge. Development of the students' skills in processing, facilitating and debriefing experiential activities is also a major force as the successful application of these skills enhances the learning outcomes of group and individual experiences in outdoor education programs. Students will be required to pay field lab fees within this unit.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Interrogate different styles of leadership and develop strategies for effective leadership and teaching;
2. Appraise their own identity, personal strengths and weaknesses in relation to leadership issues with responsibility and accountability;
3. Adopt theories of group management and group dynamics within the outdoor environment. Group communication, interaction and solve complex problems arising in outdoor situations;
4. Recognise a range of leadership approaches to crisis management; and
5. Apply experiential learning theory in analysing and solving complex problems.

Class Contact: Lectures, Tutorials and Field time.

Assessment: Due to risk management and professional/industry requirements to demonstrate knowledge and skill within safe simulated and workplace environments, graded attendance and hurdle tasks apply to laboratory work and practicals. Laboratory Work, Field Lab A requirements, 25%. Laboratory Work, Field Lab B requirements, 25%. Practicum, Pill A - Pill requirements, 25%. Practicum, Pill B - Pill requirements, 25%.

SSM3204 Building and Sustaining Sport Participation

Locations: Footscray Park. In addition to an intensive seminar on campus, WIL based in sport and related community workplaces.

Prerequisites: Nil.

Description: The aim of this unit is to expand students' understanding and skills on strategies to enhance players, coaches / instructors, scorers, committee members and umpire / referee participation in organised and non-organised sport. Strategies may vary according to, for example, children, adults, gender, cultural or economic background, age bracket, or the life stage of the participant. Students will work with a selected club on strategies to recruit and retain a targeted group of participants and develop a resource to assist them in the workplace to attract and sustain participants.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Investigate and critique the processes associated with recruiting and retaining participants;
2. Review and reflect strategies used by a community sport / active recreation organisations to encourage participation for a targeted group such as players, coaches / instructors, scorers, committee members or umpires / referees;
3. Consult and negotiate with a manager from a selected sport / active recreation club to create or modify a framework to recruit and retain participants as players, coaches / instructors, scorers, committee members or umpires / referees;
4. Report the participation framework by presenting it to the students, teacher and club manager; and
5. Reflect on how an innovative framework to encourage participation can lead to effective recruitment and retention of a targeted group of participants.

Class Contact: Intensive 2 day seminar and weekly 1 hour meetings comprising class meetings and alternatively club meetings. Students are to attend club meetings external to the university at the location of the selected sport/community club.

Required Reading: A selection of online reading will be prescribed and posted in VU Collaborate.

Assessment: Assignment, A reflective report on the design of the framework and collaboration with the club manager (approx. length 1000 word length), 20%. Assignment, A framework and associated strategies to recruit and retain a targeted group in participation (approx. 1500 word length), 50%. Presentation, A mock presentation to student groups on the framework, 20%. Presentation, A presentation to the club manager on the framework, 10%.

SSM3205 Sport Event Management

Locations: Footscray Park.

Prerequisites: Nil.

Description: This capstone unit has three aims: to provide students with a hands-on approach to the theory, processes and procedures in designing, planning, staging and evaluating sport events; to introduce students to a range of events and increase their knowledge and competency base in the field of event management; and to introduce students to the principles and practices of project management and effective teamwork. This is a capstone final year unit that integrates all sport management principles and professional practices that have been covered in the sport management course. It provides a challenging and engaging event management experience that will transition students to postgraduate life.

Credit Points: 12

Learning Outcomes: On successful completion of this unit, students will be able to:
1. Analyse the resources available in the sport event management field as they relate to the variety of events and the role of diverse service providers;
2. Integrate the conceptual understanding and professional practices of sport management through planning, staging and evaluating a live event;
3. Apply effective communication, teamwork and relationship building with the main event stakeholders;
4. Demonstrate leadership skills, effective teamwork, initiative and problem solving in the sport event management process; and
5. Critically reflect on, evaluate and improve upon individual and team performance during an event management process and write a final event evaluation report.

Class Contact: Lecture 1.0 InTutorial 1.5 hrsFieldwork: 20 hours

Assessment: Examination, Event management exam (short answer 10-12 questions) (1000 words), 20%. Project, Communication, teamwork and event performance (WIL) (1000 words per student - team charter / team plan 15%; Position description assessment 20%), 35%. Report, Major event report / evaluation (1000 words), 25%. Project, Final sport and recreation event assessment by lecturer WIL, 20%.
